COMPUTER & VIDEO GAMES

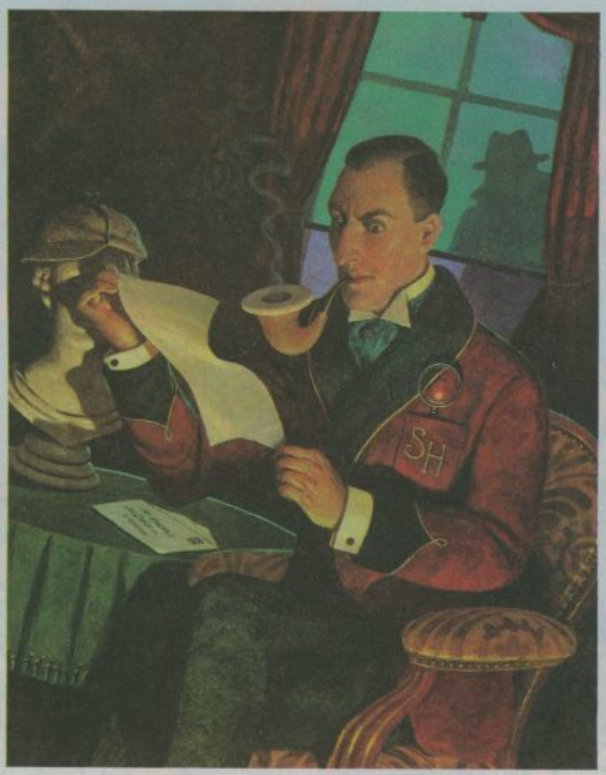
CONTENTS

JANUARY 1984 Vol III No 4



Extra, extra . . .

The ever-popular computer adventure is starting to make inroads into the arcade games sales.

In recognition of the new lease of life being enjoyed by adventures we have a 28 page supplement in this magazine, devoted to Adventure.

Put together by our regular helpline experts, Keith Campbell and Simon Clarke, we have seven pages of Adventure reviews.

There's news of new Adventures shortly to be released, our regular Helpline for those in trouble with particularly knotty problems and a great competition if you can fit our 12 strange objects into our 19 peculiar locations and give us an adventure plot.

We interview Scott Adams, "Mr Adventure" in the US and Philip Mitchell, Melbourne House's Hobbit mastermind from Australia.

News & Reviews

GAMES NEWS 12
We take a look at a strategic tank battle on the Spectrum, Fleet Street's first offerings in the shape of Mirrorsoft.

REVIEWS 25
An *exclusive* review of the brand new International Soccer cartridge for the 64, Video Games World Champion — Andrew Brzezinski checks Parker's Super Cobra.

VIDEOGAMING 40
We have three super Colecovisions each with a Turbo Module and Donkey Kong cartridge to give away in our Name The Game Competition. Our Joystick Jury pass judgement on Popeye for Coleco, Miner 2049'er and Robot Tank for the VCS, Bedlam for Vectrex, and Venture for the Intellivision.

ARCADE ACTION 46
Arcade champion — Julian Rignall tells you how to win at Pole Position.

NEXT MONTH 133

Listings

DEMOLITION 58
Our game of the month, knocking down buildings and climbing girders for Spectrum owners.

PARATROOPER 62
A crack team of paratroopers must be dropped safely behind enemy lines. Can you guide them safely down? For Texas owners.

CRASH LANDING 68
Will ya make it to the airfield? Atari owners up in the air!

ROAD RUNNER 74
The thrills of the race track are captured in this driving game which should drive Dragon 32 owners to distraction.

CRAWLER 78
Can you blast this creepie beast? If you don't like bugs you'll love this BBC Model B game.

TURNIP TURMOIL 96
Cyril the gourmet caterpillar loves fruit but won't eat his greens. It's tough for caterpillars in the Vic-20 garden.

SPACE BLOCKADE 102
David Langford deserves some of the credit for getting this game off the ground. Try to guide Earth's escape shuttles through the massed fleet of alien invaders on the ZX81.

ROX 64 108
Jeff Minter offers up this early 64 space shoot-'em-up as he challenges you to save a planet from a meteor storm.

LOST IN THE JUNGLE 120
It's going to take us more than one issue to tackle this masterpiece. It's a graphic adventure in the land of the giant apes. Sharp MZ-80K owners start here.

Features

MAILBAG 5
Commodore 64 software moans, more on the Jet Pac bug and a reader spots Donkey Kong II in an arcade.

BUG HUNTER 39
Still more bugs in professional tapes.

COMPETITIONS 50
There's 300 free Imagine games to give away including Stonkers. Write a game and win a Micronet modem, plus lots more to be won, each and every month.

PROGRAM EXTRA 112
Our great new feature helps you learn as you play and includes a special word of advice for beginners.

GRAPHICS 129
More from Garry Marshall.

SEVENTH EMPIRE 130
Space fleets tangle in our mighty computer moderated game.

CHARTS 163
Top Tens for popular micros.

THE BUGS 165
Little devils plan havoc for '84.

CHILDISH TRIPE?

Dear Sir,
Print this if you really want to put the cat in among the pigeons! I bought a Spectrum a few weeks ago purely for game-playing, after all, I thought, there must be a decent selection of fairly intelligent games for 35-year-old old-timers like me.

But ye gods!! 90 per cent of games software seems to be puerile childish tripe with serious stuff hard to find. I think it's an absolute disgrace that all people can find to do with their miraculous micros is to chase aliens and such like across the galaxy!

Perhaps game designers are to blame, I don't know, but things are in a sorry state if they haven't the brains to produce games to tax the imagination at least a little!
Mike Goodwin,
Leicester.
Editor's reply: Well, what do YOU think?

NUMBER TROUBLE

Dear Sir,
I own a 48k Spectrum and I have a problem. Please could you tell me if there is an address in the micro in which I can poke a number, switch the computer off and then on again, peek that same address and still find the same number poked in it?
Tim Allen,
Tonbridge,
Kent.
Editor's reply; There are two types of memory chip in a computer: Random Access Memory (RAM) or Read Only Memory (ROM).

RAM can be freely poked to alter its contents, but loses its value when the power to the computer is turned off. ROM, on the other hand, is programmed at the factory and cannot be altered by POKE. It does, though, retain its contents even if power is turned off.

So, unfortunately, there's no way of poking into the Spectrum's RAM and having the value still there if you turn the machine off and then on again, except if you buy a special RAM pack which has a small built-in battery.

FURTHER ADVENTURES

Dear Sir,
In the August issue of your excellent magazine, you published a letter from Mr. J. Bull of Eastbourne. In this letter he wrote of a Donkey Kong machine with gaps in the beams for our hero Mario to jump across.

This game is called Donkey Kong Part II made, if my memory serves me correctly, not by Nintendo but by a games company called Falcon. I have played Donkey Kong Part II in South Africa and Greece and found it was much the same as Donkey Kong apart from slight screen variations. Also it has a delightful little scene at the beginning showing Kong breaking out of prison.

On the first screen, there are the afore-mentioned gaps in the beams, but these need not be encountered as you can "jump" a whole screen as in the normal Donkey Kong.

This is done by climbing up the first ladder, then nudging the joystick twice to the right so Mario still has his back to the player. Now, by jumping to the right our knight in shining boiler suit jumps off the beam and slides down the right of the screen onto the next one — the pie screen.

On the plug screen, any contact with Kong loses one of Mario's lives, but jumping off the top to elude fireballs is still possible on this version. Mario just bounces back up on reaching the bottom unhurt. This requires perfect timing.

Another trick to prolong Mario's life and collect more points is by dropping the hammer on the pie screen, but only on level two upwards, when, on Donkey Kong Part II the conveyor belt moves faster, so Mario must jump against its movement to get anywhere.

It is achieved by moving to the right of the screen on the lower conveyor belt, picking up the hammer on the way. On reaching the side, simply nudge the joystick to the right and it will leave the hammer, bashing away, while Mario hops off to collect a high bonus.

The hammer destroys everything that it touches giving points for this at the same time. Even when the hammer disappears after a while, pies etc, still get bonked by an "invisible" hammer.

As of yet, I have not seen Donkey Kong Part II in Britain. Perhaps other readers have?
Stephen Brown,
Chepstow,
Gwent.

TINKERING WITH TI

Dear Sir,
I am 14-years-old and own a TI99/4a with Extended Basic, a speech synthesiser and a few other peripherals as well.

I have found out, totally by accident, something rather interesting on the TI99/4a in console or Extended Basic.

Type 10 REM and then fill it up with as many control characters as it will let you, I often use CTRL and the comma key as this seems to get the best results. Now enter the line and edit it.

Instead of being blank as it was when you typed it in, it is full of various other characters. The beginning of the line will go off the top of the screen and perhaps the screen will change colour or do something else unusual.

Now move the cursor around, even though you can't see it, using the cursor keys — FCTN and GCTN — and you should see pretty interesting results.

If the system crashes, don't panic, just switch it off wait a second or so and then switch it on again and everything should be alright. Have fun and experiment and you might find something new about your TI.
Stephen Morecroft,
Stalybridge,
Cheshire.

BEATING THE KILLER . . .

Dear Sir,
I would like to point out that in Killer Gorilla Mario will only fall down for no apparent reason if the bonus score runs down or if you stay still too long. In fact, the only thing I find difficult is getting onto the lifts on the 3rd screen — from then on it's just a case of looking out for fireballs and iron beams.

By the way, is all software for the BBC model B compatible with the Electron and is there a Zaxxon game available for either the BBC or Electron?
Mark Dodwell,
Highcliffe,
Dorset.
Editor's reply: Thanks for your tips Mark and yes, most BBC software will work on the Electron, but I suggest you check with the software company before you buy the program. Zaxxon isn't available for the BBC yet, but if one appears, you'll read about it first in our Games News section.

BOMBS LAND ON BRITAIN

'SPECIAL OFFER TO READERS OF COMPUTER AND VIDEO GAMES

SAVE ONCE – ONLY £19.95

Four brand new alien video games for the ATARI 2600 from BOMB – Worth £24.95 each – have just penetrated Britain's atmosphere. And nothing you can do can stop them now. Not at these prices. Save £5.00 by ordering direct by post.

SAVE TWICE – SUPER JOYSTICK CONTROLLER FOR ONLY £6.95

An incredible offer to buyers of these super new video games – Purchase any one of the top titles shown and you can buy a super joystick controller, especially designed for the ATARI 2600, for only £6.95. That's a saving of £5.00 off the normal retail price of £11.95. Remember, this offer only applies when you buy a BOMB.

THE YEARS BEST BARGAIN.

■ Microgames members get free entry into a computerised games exchange list.

Do battle with the heat-seeking missiles as the confrontation progresses through six different landscapes.

■ ATARI 2600 and INTELLIVISION owners will be given release date information on the piggy back keyboards coming soon plus a special 15% discount – you'll be able to get it first at the lowest price.

Annihilate the hostile aliens as they fearlessly attack your laser bases.

But Hurry:

■ This offer can only be made whilst stocks last. Don't delay and be sure to get this great deal.

The battle heats up as squads of aliens move forward relentlessly. A game of speed, wits and dexterity

Escape the asteroids as they attack you with enormous efficiency from all sides.

FREE MEMBERSHIP TO THE MICROGAMES CLUB

Also with any BOMB order comes free membership of this great new club for games freaks who want to play more and pay less.

Just look at these benefits:–

■ The membership kit, complete with your personal Microgames Membership card, will be sent to you with a special discount list for Home Computers and Home Computer Software, including VIC, Commodore and ATARI 400/800.

■ Microgames members can save £££'s on all ATARI, INTELLIVISION, COLECO and VECTREX Games.

Send to BOMB Readers Offer, 6th Floor, 16 Ormond Yard, St. James's, London SW1Y 6JT.
I cannot refuse this special BOMB offer.
Please rush me the following BOMB games
☐ ASSAULT ☐ GREAT ESCAPE
☐ WALL-DEFENDER ☐ Z-TACK
(Please tick) at £19.95 each (incl. V.A.T. and P&P)
☐ (Please tick). 1 Super Joystick Controller at £6.95* (including V.A.T. and P&P)
☐ (Please tick). I wish to become a Free Member of the Microgames Club.*
I enclose my cheque/postal order for a total of £_____ made payable to 'Bomb Readers Offer.'

MY SEARCH FOR KONG

Dear Sir,
I am writing for advice on which Donkey Kong cassette is the best value for my Vic-20 with a 16k expansion.
Carl Toole,
Blackburn,
Lancs.

Editor's reply: We huddled together in the office to debate your question Carl and came to the conclusion that the Anirog version is about the best. Although quite frankly we have yet to see a really good Kong for the Vic.

TALKING MY LANGUAGE

Dear Sir,
I have a Vic-20 with a 64k Rampack. I would like to know if games for the Commodore 64 would be compatible, in particular *The Hobbit*. Also could you tell me what language, apart from Basic, can the Vic-20 be programmed in?
J. Campbell,
Falkirk,
Scotland.

Editor's reply: I'm afraid the Hobbit isn't compatible with the Vic, Mr. Campbell. The only games that are compatible will be text-based. Forth and Assembly Language are available on cartridge from Commodore.

CRASHING SPECTRUM

Dear Sir,
Three months ago I decided to get my trusty 16k Spectrum upgraded, and as it was still under guarantee and I didn't want this invalidated, I duly sent my fully operational machine off to Sinclair Research with the required £40.00.

Now, three months later, I have just returned my machine for the THIRD time, as it appears the infamous Sinclair bugs have been at work again. My once fully working machine crashes every time Sinclair send it back to me. Sinclair seem only too happy to take my money, but they don't seem too keen on giving something back in return. So all you 16k owners — beware!
M. Gilpn,
Woking,
Surrey.

PUBLISHING YOUR GAMES

Dear Sir,
I have recently started buying your magazine each month, and have seen that you publish readers' programs. Could you please tell me the correct procedure for submitting such programs? Is a listing and/or cassette required and would you also please give me details of payment and copyright?
M. D. Reeve,
Derby.

Editor's reply: A program has a better chance of being published if it has an original and interesting theme.

All our games are tested by our review team, so it may be a couple of months before you know whether your program has been successful.

As from this issue, we will be choosing one listing which will become the Game of the Month and the author will receive £25.00. We pay £10.00 for all other games. We retain the first British publishing rights but the copyright remains with the author.

You should send us a tape and a listing, along with one of our software forms found elsewhere in the magazine. If you can't manage a listing just send us a tape and we'll arrange to get a printout. Most importantly don't forget to include your name and address!

DANGEROUS ELEVENSES!

Dear Sir,
I have just spilt a cup of coffee onto one of my Atari discs with a program on it — and now doesn't work!

Please could you tell me if there is a program available somewhere in the UK that would enable me to make a back-up copy of my extremely expensive Atari discs and if so where can I get my hands on it? I have tried many shops but with no luck.
J. Eatough,
Blackburn,
Lancs.

Editor's reply: Unfortunately there is no way of recovering the coffee-flavoured disc, but there are programs available in the classified adverts section of various magazines which claim to be able to back-up discs.

I suggest you write to one of these and ask exactly what this program will do. Please remember that although you are entitled to make a back-up for your own use, it is illegal to sell, lend or hire these copies.

AN UPSET DRAGON . . .

Dear Sir,
Ten months ago I bought a Dragon 32 for Christmas. Six months ago things started to go wrong. First its so called "reliable" tape recorder stopped recording programs for me, then I found the joystick ports were mixed up — that is I had to use the right hand commands for the left joystick and vice-versa!

It has now been a month in the workshop and it doesn't look as if it will be out for quite some time. My friends have experienced similar problems on their Dragons.

So now I'm faced with the problem of buying another computer. I was going to get a Vic-20 but I heard it was going off the market so I am thinking of buying a ZX Spectrum. Can you tell me if it has a good cassette player for loading and recording programs?

Also is Pimania still available for it as I was going to buy it for the Dragon before the cassette became faulty?

Also could you recommend a good word processor?
Martin Thomas,
Co. Dublin,
Ireland.

Editor's reply: Firstly, there has been no official announcement from Commodore that the Vic-20 will be taken off the market. In fact it is selling very well and there is a lot of software available for it.

If you are thinking of buying a Spectrum, don't let the thought of the cassette loading put you off. The machine should work with most cheap recorders without trouble. If you are looking for a word processor — try the Tasword II.

GAMES FOR THE 64 . . .

Dear Sir,
I would like readers to reassure me on a few facts. This Christmas I am getting a Commodore 64 home computer which in my opinion is the best computer for about £200.

Although a lot of British written software is now available, a vast amount of software from America is also attainable.

Most of the latter programs, mainly games, have been based on existing Atari software and some friends have said that these programs seem to be badly programmed or not as good as their Atari counterparts.

As these friends own Atari micros and will be biased I do not know whether they are telling the truth. Also one of my favourite games, Choplifter, is said to be better on the Atari 800 than the Commodore 64 on graphics. As I haven't seen Choplifter on the Commodore 64 I would like to hear other Commodore owner's opinions to put my mind at rest.

I can't see why Commodore 64 games shouldn't be as good as Atari ones. As for the sound, the Commodore 64 is far superior and as to some of the puny sounds on some Atari games these could be vastly improved using the 64.
David Gardner,
Fleetwood,
Lancs.

Editor's reply: Well David, so far we've seen some pretty good games for the 64 — but we'll call on other 64 owners to tell you what they think.

As your childr
so can your

600XL Home Computer.

If you're buying a home computer then you've probably got one major worry. That your children will soon grow out of the system you buy.

With the new ATARI 600XL™ you need have no such fear. Because the ATARI 600XL was not just designed as a home computer, it's designed to build into a complete computer system.

As your children's knowledge of computers increases, so can their home computer, simply by adding any of these extras which will be available soon.

Program Recorder. The inexpensive way to store extra programs, and use the unique Atari sound-through system.

64K Memory Module. Increase the memory from 16K RAM to a massive 64K RAM. Important, as the more memory it has the more it can do.

Touch Tablet. Creates complex on-screen graphics by allowing you to draw on the TV screen.

Trak Ball™ Controller. For a better and more sophisticated arcade style game control.

Super Joysticks.

Colour Printer.

Disk Drive.

80 Column Dot Matrix Printer.

Letter Quality Printer.

Super Joysticks. Gives you a greater competitive edge over your games.

Colour Printer. You can print out your own four colour electronic designs and programs.

Dual Density Disk Drive. Increases your capability by giving you fast access to data, as well as an efficient expanded storage system.

80-Column Dot Matrix Printer. This is for more complex applications with fast telex style print-outs.

Letter Quality Printer. Changes your computer into a sophisticated word processor, producing as many top quality prints as you want.

Of course, you won't need them all now. Your children have first got to learn to master the computer itself. But when they have, and believe us they will, the ATARI 600XL can handle it.

For more details write to: Atari International (UK) Inc., P.O. Box 407, Blackhorse Road, London SE8 5JH.

CHATTING TO YOUR HOME COMPUTER

MICRO COMMAND

Having a quiet chat with your computer will no longer make you a prime candidate for carting off to the funny farm.

You'll be able to chatter away to your hearts content when you plug in this latest interesting add-on for the Spectrum from Vantage Systems.

Micro Command is a new add-on expansion for the 16 or 48k Sinclair Spectrum which will soon make conversations with micro computers common place. The box plugs into the back of the Spectrum and is designed for use with specially commissioned games.

Virgin Games is one software house that is known to be supporting Micro Command with games adapted from their present range.

Micro Command operates by prompting the player to say a particular word three times, for example left or right, and is repeated for all the game's controls. The program re-checks each entry at the end to make a comparison with the words stored in its memory.

The add-on is supplied with a microphone and lead, a detailed instruction manual and demonstration program, which lets you play a shoot-em-up game by just telling it to move left, right and fire.

It all sounds like a *remote* controlled version of *The Golden Shot*. You may not remember the TV show which involved Bob Monkhouse, several apples, a crossbow and Bernie the Bolt. You just don't know what you missed! Anyway — back to the technical stuff . . .

Micro Command is claimed to be the world's first word recognition device available for a home computer, and what's more it's British designed and manufactured.

Vantage Systems, the manufacturers of Micro Command are considering launching a Commodore 64 version and maybe one for the BBC micro if there is sufficient demand.

Micro Command will be available in early December by mail order from Brighton based Vantage Systems for £50.

ATARI BRAVE BRAND NEW FRONTIERS!

ATARISOFT

Atari have decided to extend their range of software to other home computers as well as for the 400/800 and 600XL.

Atarisoft, formed just over a year ago by Atari International, have recently launched a new range of arcade based games for the Spectrum, Vic-20, Commodore 64, BBC, Dragon and Texas.

Said Atari: "Our aim is to bring quality games to other home computers with the aim of keeping them as close to the arcade original as possible." They include such old-time favourites as Pacman, Defender and Robotron as well as some more recent titles like Dig Dug and Centipede.

Having bought the licences to manufacture these games, Atari are now in full swing providing more software for this already overcrowded corner of the market. However it would be nice to see some original titles for the hoards of hungry micro owners instead of yet another version of Donkey Kong or Galaxians.

The games will be available in cassette or cartridge form and the prices range from £14.99 to the more usual £29.99.

IMAGINE GET ALL TANKED UP

STONKERS

War Games are fast taking over from shoot-em-ups as the most popular kind of computer game.

With this in mind Imagine have released Stonkers — a tank battle simulation played against the computer.

The game is a three dimensional hi-res tactical war simulation. Your aim is to outsmart the computer's tank battalion and crush the enemy's army.

The screen display shows a large scale map of the battle field. The program also allows you to have close up shots of various scenes anywhere on the large map.

All the graphics in the game were designed by a team of professional artists. A musician was also employed to make sure that all the sound effects were just right.

Imagine's other Christmas release is Alchemist. The game is a real time graphical adventure in which you play the role of a wizard.

The Liverpool firm are also offering a special Christmas package of Molar Maul and Ah Diddums for £9.50.

The other two titles will both sell for £5.50. Stonkers is available in late November and Alchemist should hit the shops just before Christmas.

WANT TO BE A ROCK SUPERSTAR?

K-TEL

K-Tel, the cut price record people, will be entering the software market with a big bang in the next couple of months.

They will be launching six new games for the Spectrum and four for the Vic-20 in a series of double-sided cassettes in an effort to capitalise on the Christmas market. Not a new innovation perhaps but good value for

G·A·M·E·S N·E·W·S

money with each cassette containing two games.

Featured on the Spectrum will be It's Only Rock 'n' Roll — a role-playing game where you become a budding pop star and Tomb of Dracula, an arcade style game for the 48k micro.

Arena and Alien Swarm are good old shoot-em ups and run in 16k with The Battle of the Toothpaste Tubes coupled with Castle Colditz, a text adventure game for the 48k Spectrum.

Games for the Vic-20 will include SupaVaders and Bomber Run for the unexpanded Vic with Alien Demon and Plague for the expanded micro.

You can expect to see these new double-sided cassettes in most leading retail outlets within the next few weeks and they will also be available direct from London based K-Tel International at £6.96.

WELL, HELLO SAILOR, I'M THE SEAHAG!

POPEYE

Your mother soon won't have any need to nag you into eating your greens.

Home computers have jumped on the health food band wagon, making spinach an essential part of every gamer's TV dinner.

Popeye is the latest cartoon character to be immortalised on micro chip. Ugly Brutus is up to his usual tricks and has imprisoned Popeye's sweetheart Olive Oyl in a derelict house. The Parker cartridge is based on the recent arcade game.

You must guide the gallant Popeye around the deserted building Olive is trapped in, and collect the heart-shaped kisses she blows to you before they hit the ground. Brutus tries his best to thwart your attempts and you won't get the chance to give Brutus the bashing he deserves — unless you pick up a can of magic spinach that sometimes sprouts around the edge of the building.

Unfortunately for Popeye, Brutus is not alone. His evil accomplice the Seahag lurks in the shadows ready to leap out and throw a stream of bottles at the brave sailor. Popeye's only line of defence is a well timed punch aimed to break the glass.

Each level is set against the clock and it becomes a real struggle to collect enough hearts to move onto the next sheet.

Popeye proved to be a winner in the U.S. arcades earlier this year — but perhaps you missed his visit to these shores. If you did, this new Parker Brothers game for the Atari will make up for it!

Perhaps we'll soon see a sequel to the game too! We certainly hope so. Maybe even a prequel?

Meanwhile if all this action is making you hungry and you fancy a taste of spinach then I'm sure Parker Brothers can offer Atari 400 owners a take away Popeye for a tasty £29.95.

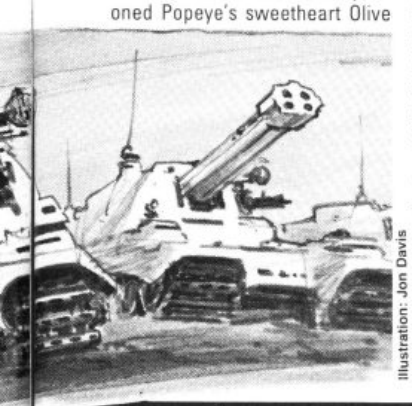

Illustration: Jon Davis

LAST OF THE SLOW LOADERS

FAST TAPES

Cassette based loading has many advantages, low cost and ease of use but it has one major

How many times have you waited what seems an eternity before your favourite game loads?

Commodore 64 owners now have a remedy. Llamasoft is testing a system which allows high speed loading of programs from cassette.

The new system is entirely software driven, so you won't have to lash out on expensive hardware add ons.

The program was developed in Germany and is only a mere 1K long. To give you some idea how revolutionary this program is, it will load a typical 16K program in only ten seconds compared with over six minutes using the conventional tape set up.

Llamasoft hope to use the program with all their software. They will still include an ordinary version on one side just in case your tape deck can't stand the pace.

The company have no intentions of buying the sole rights to the program so it may well become a standard feature on all CBM 64 games.

Could this mean the end of the disc drive as we know it?

WATCH OUT FOR THE SERPENTS

SERPENTINE

Sightings of the Loch Ness monster should increase rapidly in the New Year thanks to Audiogenic.

Serpentine is set in the distant future on an alien world ruled by serpents. All is not peaceful however.

The land is being torn apart by an age old grudge between warring, serpent races. And they are all very slippery customers indeed!

The environment is hostile and the chances of survival slim. You must help the blue serpents to avoid death, protect their eggs and raise their young.

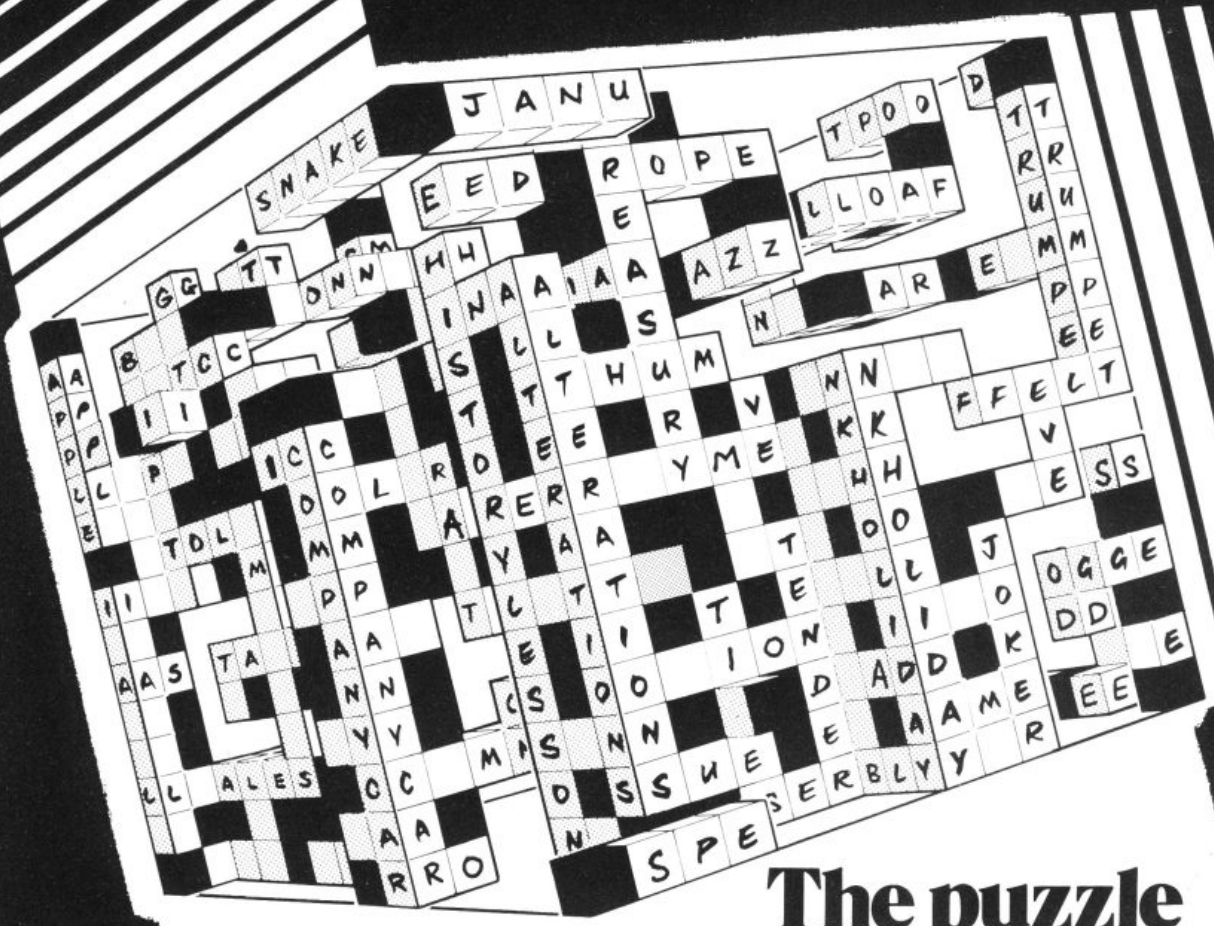
Your arch enemies, the orange snakes, can only be defeated if your serpents grow bigger and more powerful. This is accomplished by eating eggs, frog, and eventually, other serpents.

The more the monsters eat the hungrier they become and each new level presents a greater "gastronomic" challenge.

In addition to this, Audiogenic have two other Christmas releases for the CBM 64. They are Choplifter, a conversion of that now very popular helicopter war game and Seafox, a submarine simulation program.

The games are for the Commodore 64 but come in cartridge form only, costing £29.95 each.

The ultimate Crossword



The puzzle that needs a computer

Alien present the ultimate in word puzzles – 30 integrated crosswords which form a cube.

All locations of this 3 dimensional puzzle are contained in the computer programme and you can complete any part you wish using the display on your T.V. and computer keyboard. Understanding all the relationships between the crosswords is not possible without the computer but as you proceed you will discover new routes to help achieve the solution.

Features: Solution Store, Instant Display, Anagram Function, Character Location in memory.

This is a tough puzzle with a degree of difficulty – it's the ultimate but it's not impossible. Full instructions are included with the programme.

£1,000 PRIZE
to sender of first correct taped solution run on our computer on 1st June 1984

Please mail me ☐ copies of the Alien Ultimate Crossword puzzle programme at £14.95 per copy inc. P. & P. for the

G·A·M·E·S N·E·W·S

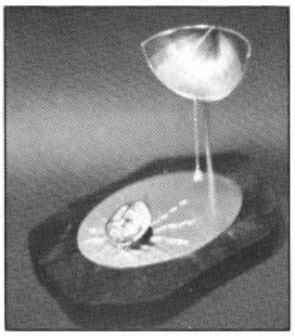
C&VG's DESIGNER OF THE MONTH

NAME: Christian Penfold with acknowledgement to Mel Croucher Software House: Automata Cartography
Games: Pimania, Groucho
Born: Littlehampton, Sussex in 1955
COMPUTER HISTORY: "It's interesting this. It began three years ago, coming back on a Sealink ferry from the Channel Islands.

"It was an extremely rough crossing and I was green from the moment we left. Mel Croucher (the other half of Automata) who was completely unaffected, said: 'I've bought a ZX81 computer'.

"He then proceeded to write a 20 page program for the 1K ZX81, finishing as we finished the awful crossing and I disowned it: 'It's yours you write the programs'.

"But I did eventually set it up with a How to use your ZX81 book and cassette and I was totally hooked — 8am to 10pm seven days a week. I now get even more fun out of it. Then we got hold of a Spectrum and Pimania was launched in November 1982.



Here it is — the Golden Sundial of Pi. Worth £6,000 the much coveted prize is still up for grabs in Christian Penfold's Pimania. Designer of the Month profiles the man behind the game.

"Pimania and Uncle Groucho are now TV stars in the Magic Micro Mission and Pimania has just topped the charts in Germany.

"Our ideas are all a team effort, myself, Mel and a young programmer we've just taken on called Andrew Stagg. We throw an idea up in the air, it bounces around for ages, getting funnier and funnier and when it comes down we just have to get the computer to understand what we've been talking about.

"Ideas are not a problem, it's finding the time to produce them all. We've drawers full of ideas."
FAVOURITE FOOD: Garlic, snails in garlic butter. I adore any food cooked well in garlic.
FAVOURITE DRINK: Brandy & Lovage (a herbal cordial from the South Downs).
FAVOURITE TV PROGRAMMES: Monty Python, Not the Nine O'Clock News, Three of a Kind.
FAVOURITE COMPUTER PROGRAMS: ZX81 version of Pimania and Ultimate's Atik Atak.
COUNTRIES VISITED: Too numerous to mention but I enjoyed Germany, US and Canary Islands.
PETS: None but I would love a beautiful St Bernard puppy.
AMBITIONS: To succeed. Money is not important.
FAVOURITE POP GROUPS: Dr. Hook.

LET'S SEND A COMPUTER SANTA GRAM

XMAS CARDS

Forget Christmas cards this year send your friends computer cards instead.

Elm Computers have developed three seasonal programs that make an original change to the traditional Xmas card.

There are three versions of the "electronic cards" available. All include festive themes and yuletide tunes. All have animated graphics, featuring falling snow, Father Christmas and flying reindeer.

Apart from the addition of sound and moving graphics the computer cars follow the theme of their paper predecessors closely. The usual scene of Santa flying over roof tops is included as is the obligatory Snowman card.

All the programs are available now from Leicestershire based Elm Computers for £2.50 each or £7.00 for a pack of three.

HERO WITH A YELLOW STREAK. . .

TARMAC TIM

Tarmac Tim is the unlikely hero of a new arcade style game for the Spectrum.

He has been employed by the Spectrumville Council to paint the double yellow lines along the roads.

Today he is working on the notorious Sinclair Road. The road is used by maniac drivers. Any pedestrian who has the courage to cross it, risks life and limb in the attempt.

Overall-clad Tim must protect the jay walking residents from the murderous motorists. He must daub his paint around the people, which miraculously stops the cars from running them over.

You'll have to keep Tarmac Tim out of the way of the traffic too, because the drivers have no respect for Spectrumville's leading painter. And you wouldn't want to spill the paint all over the street would you?

As the day progresses the rush hour gets nearer, the road becomes ever more treacherous as tired workers drive home. Tim will be stretched to his limits protecting Spectrumville's citizens.

Double Trouble is the first games release from a new company based in Southampton called Starlite. The game costs £5.60 and will be available in early December.

ELECTRO POP COMES TO YOUR MICRO

ULTISYNTH 64

The explosion of electronic music has revolutionised the face of the British record industry over recent years.

But even with the huge leap in microchip technology, synthesisers and electronic drum kits have been well out of the price range of most people — until now!

Many of the popular micros, the BBC, Commodore 64 and Vic 20 contain the same sound chip as expensive dedicated synthesisers, which can easily cost over a £1,000.

Having noticed the sorely underdeveloped sound capabilities of the Commodore 64, Quicksilva have released a sophisticated synthesiser package. The program, Ultisynth 64, has greatly simplified the programming of the sound chip.

The first channel is for your music composition. The second and third are used for a drum beat and set melodies. The program will also imitate many instruments ranging from a trumpet to a harpsicord.

You're not tied down to just making music. Ultisynth 64 also has the facility to produce arcade sound effects which together with the music can be saved to tape.

Quicksilva claim that Ultisynth 64 is straightforward to use but it takes a 50 page manual to explain the program's more advanced features.

The cassette will be on sale around the beginning of December from Quicksilva for £14.95 (including manual).

BBC owners haven't been forgotten. They have their own music generator program written by Quicksilva. Which means you don't even have to attempt to learn any of the Beeb's advanced, but complicated sound commands.

G·A·M·E·S N·E·W·S

COME PLAY WITH THE MR. MEN

GAMES

Newspaper giants the Mirror Group have taken a step into the world of computer software.

Mirrorsoft the company's new software publishing division has just launched a range of three programs. One of them is an arcade game the other two are educational programs one of which is based on the cartoon characters the Mr. Men.

The Mr Men are already extremely popular cartoon characters and appear in books and newspaper cartoon strips — so why not a computer game!

Caesar the Cat is a mice chasing game in the best traditions of Tom and Jerry. You play Caesar a hungry young cat who prowls the well stocked larder in search of greedy mice.

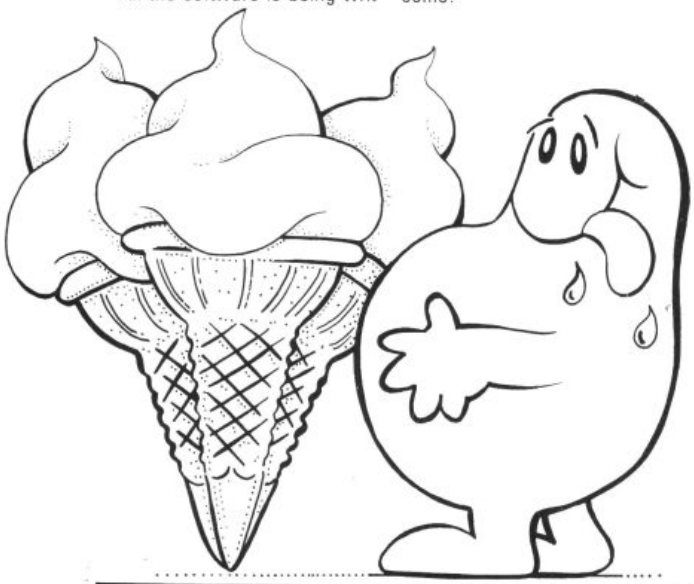
Guide the cat along the shelves of the pantry in hope of finding a mouse, but watch out for the crockery!

The game has full colour Hires graphics, sound effects and includes a high score table.

All the software is being written by independent software houses for Mirrorsoft. The company hope to back up their present range with more releases in the new year.

Caesar the Cat runs on a Commodore 64, the Mr. Men on a BBC model B. Both games will be available in late November costing £8.95.

These are the first of the Mirrorsoft group's releases. Watch this space for news of more to come!



JUST WHAT IS GOING ON HERE?

MANIC MINER

Manic Miner has made a run for it and that's official. Miner Willy Bug Bytes' most famous computer game character has left to join a new company called Software Projects.

Has Miner Willy been given a free transfer? Or has Bug lost faith in Willy's ability to get past the Mutant telephones? No, in fact it's the climax of a long running argument between Bug Byte and one of its former employee's Matthew Smith.

In his contract with Bug Byte Smith had a clause written in which gave him the right to force Bug Byte to withdraw Manic Miner if he wished.

Smith's departure from the company was surrounded by rumours of falsified sales figures for the game and missing royalties owed to the programmer. Although a Software Project's spokesman gave a terse no comment to any questions about the royalties dispute or reasons for the apparent battle.

Bug Byte have been allowed to sell their remaining stock of the game but they have now lost all rights to the game or any sequels.

Software Projects also plan to release Miner Willy on the Commodore 64 and a follow up to Manic Miner on the Spectrum.

AMERICAN INVADERS ON THE WAY

ELECTRONIC ARTS

Electronic Arts is the name of a new American software house set up by a group of independent games designers.

The best known of Electronic Arts designers is Bill Budge who wrote the hit pinball simulation — Rasterblaster.

Budge is slightly apologetic for the arts angle being used to promote the company's games "I'm not so sure there are any software artists yet. Maybe we've got to earn that title".

Despite this coyness the games are causing quite a stir across the Atlantic and they are now also available in the UK.

Budge gets back to his pinball roots in the hottest of the releases — The Pinball Construction Set. The program enables you to design the pintable of your drreams — you can choose all the special features, the strength of the spring, colours, and number of players.

Other higlights of the range are Archon — a game that combines the strategy element of chess with the shoot 'em up gameplay of an arcade style game.

Murder on the Zinderneuf is the adventure game from the range which is a who dunnit aboard a World War One flying ship.

All games come on disc for the Atari with 48k and the Commodore 64. On disc only at £29.95 from Birmingham based Centresoft.

SINCLAIR ZX 81 16K SPECTRUM 48K BARON

by Simon Mansfield

Baron is a complex simulation game for up to four players.
Step back in time when the country was divided into huge estates.
Could you accept the responsibilities of a Barony? Farm your lands, maintain workers, hire mercenaries, wage feudal wars?
Yearly analysis of success or failure of your decisions.
There are unexpected events in store for you – to find out, why not play the game?
Graphics

SINCLAIR ZX 81 16K SPECTRUM 48K ADMIRAL GRAF SPEE

by Simon Mansfield

An original game of strategy based on historically accurate records of the Graf Spee's formidable presence in the North and South Atlantic.
As her Captain use full graphic instrumentation to calculate speed, compass bearings, fuel, distance, ammunition states; locate and manoeuvre into visual range and destroy enemy ships which can also evade, seek and destroy you! Attacked targets can only be destroyed by the same number of salvos or torpedoes as were necessary for the tonnage during the original action.
7 levels of difficulty –

SINCLAIR ZX 81 16K SPECTRUM 48K DUNGEONS OF DOOM

by Simon Mansfield

Two challenging adventure games to travel through the labyrinths, descending to the lowest dungeons where the treasures are hidden or play "ESCAPE FROM THE UNDERWORLD" and save yourself from incarceration in the dungeons by fighting you way up the endless levels.
Graphics show your position – status reports – different layout with each new game – 4 players can search different levels – 400 rooms – 600 corridors – 1000 locations to explore.
Objective – to score highest points and STAY ALIVE

SPECTRUM 16K LAS VEGAS

by Neil Streeter

A Temptation games double

1. FRUIT MACHINE – must be the best full feature "Pub" Fruit Machine. Spin the symbols, use the "nudge" "hold" "gamble" facility – win or lose with true percentage payouts.

2. BLACK JACK – break the bank with a five card trick. This game follows the rules of Pontoon. The Spectrum croupier deals the cards with skill and is after your stake money!

Superb graphics

SPECTRUM 16K CHALLENGE

by Neil Streeter

A Temptation games double

1. MASTER CODE DELUXE – all the features of the well known game 9 skill levels – any code or no repeated colours. Good clear graphics show the success or failure of your logic as the computer assesses each line.

2. HIGHER AND LOWER – skill, hunches and sixth sense are needed to beat this fast dealing machine. Graphically as realistic as a certain television series. Will you be able to get to the end of the row of five cards, guessing whether the next card will be HIGHER or LOWER?

SPECTRUM 16K GODZILLA AND THE MARTIANS

by Neil Streeter

The Martians have invaded, destroying the molecular structure of earth's atmosphere to make it compatible with their own planet. "The girl of your dreams" is trapped at the top of a building site but for the moment protected from the evil invaders by a friendly Dinosaur! Leap over deadly Martian invaders – scale ladders – jump the man traps – rescue her before the oxygen is totally absorbed.
Kong type game for SUPERHUMANS

ARCADE

VIC 20 unexp SWARM

by Andrew Hasley

As a pilot testing the latest star ship breakdown in your guidance systems causes you to materialise in the breeding grounds of the Psygophorus, an unbelievably nasty insect life form which kills anything entering its space. Survival depends on destruction of the eggs before they hatch to form a SWARM. They can use your laser energy to mutate at an alarming rate and the only escape from the devastating attack of a Swarm is by destroying the Psygophorus in only one brief stage of its life cycle.
CAN YOU SURVIVE this high scoring game?

ARCADE

VIC 20 unexp ALIEN VORTEX

by Andrew Hasley

It is the 23rd Century – unemployment 99.9% – due to 300% inflation, money replaced by credit discs – to relieve boredom the I.R.S.P. sets up huge gambling arcades – debts run high – inhabitants who cannot pay take part in "THE GAME". Transported to Launch Base 3 they are sealed into a Zelton Earth Defender and attacked by waves of mutant birds, specially bred on the Space Station Alien. Moneylenders bet on the length of the ill-fated player's survival, so recovering their losses. SET your body modulator to HYPERDRIVE, PRIME your firing fingers and HANG LOOSE.
High scoring game

ARCADE

VIC 20 unexp THUNDERFLASH

by Andrew Hasley

The year 2500 A.D. has produced a problem: space Rats are using humanoids for experimentation! Their technical skills include impenetrable defence systems. A Royal Space Fleet Pilot sent to destroy them has been killed. YOU ARE INVITED TO TAKE HIS PLACE.
You will be bombarded by zig-zagging steel arrows – if not destroyed they turn into Thunderflashes which explode when hit. Being unstable they release sparks which you must destroy before they hit you. Your survival angers the Rats who increase the speed and fury of the attack.
High scoring game

VIC 20 16K DRAGON 32K MICROPOLY

by Richard Fry & Simon Lacey

Play this version of the family board game with a competent and challenging microbanker and property tycoon. State of game and board on instant recall – or the game saved.
Game for up to four players AND the computer

VIC 20 Unexp COBUS MAZ

by Dave Gibson

A series of ridiculously impossible layouts which our self-destructing Programmer has devised for VICtims! Just get from "A" to "B" without being blown up or eaten by a COBUS – simple? You are given five lives and five ZOGS to hyperspace a COBUS when you are cornered. Successful exit brings the reward of greater challenge with progressively difficult layouts and hidden complications.
Keys require collecting in a correct order to open the door; devilish invisible mines and

TI 99/4A Ext. Basic HOUSE OF BUGS

by Tony Frampton

The Bugs in this game will raise your blood pressure to the limits and drive spectators into a frenzy!
In this high scoring game killer bugs roam the top floors. Stay alive by clinging to the ceiling whilst they pass beneath, but you cannot seek refuge on that square again. BUNGE a Bug and gain 50 points, but he may return for his revenge – a vicious rival followed by your paralysis and death!
WATCH the Bugs go hopping mad when target scores give you the services of a Squisher.
Fantastic graphics and sound

TI 99/4A Ext. Basic TANK BATTLE

by Tony Frampton

Can you hold back a relentless army of tanks, sometimes in convoy but often slipping in under the cover of their barrage of gunfire as they try to penetrate your anti-tank barriers?
Manoeuvre your tank controlling its gun barrel for accurate range. WATCH your salvos disintegrate the enemy BUT BEWARE the deadly return fire.
Realistic graphics and sound. Five skill levels – strategy to desperation

TI 99/4A Ext. Basic SPECIAL MISSION

by Tony Frampton

TOP SECRET – save the world from destruction – HOW? WHY? WHEN?
Your mission starts in a large briefing room: there is a door to the East. You can see a blood-stained envelope and a cold strong box: you are carrying nothing at all! TIME is running out, the robots have been activated – WHAT ARE YOU GOING TO DO?
Only a T.I. trained special adventure agent has a chance of saving millions from annihilation.

NEW

DRAGON 32K SEARCHWORD

by Ian A. Macey

A WORD PUZZLER'S PARADISE? CREATE your own word puzzles by the thousand.
An irresistible game for word puzzle enthusiasts, this program offers endless permutations. The computer will accept any list of words containing from 3 to 12 letters and conceal them within a letter grid until the player identifies them by giving the correct start position co-ordinates and direction. Program also includes two demonstration files and word save facility. Hours of enjoyment for one or more players.

How to progra
with a VIC 2

m your family
20 computer.

The VIC 20 can please all of the people all of the time because it has, quite literally, hundreds of software programs.

Programs that are exciting, fun, educational, musical and always entertaining.

There's ROM software (they're the cartridges you simply plug into the back of the computer) for only £9.99, and cassette programs (for use with the cassette unit) starting at under £5.00.

No other home computer offers such a choice.

Or, to put it another way: who in your family would have nothing to do with the VIC 20?

We suspect that the answer is no one.

Please send me Vicsoft, the free colour catalogue of VIC software.

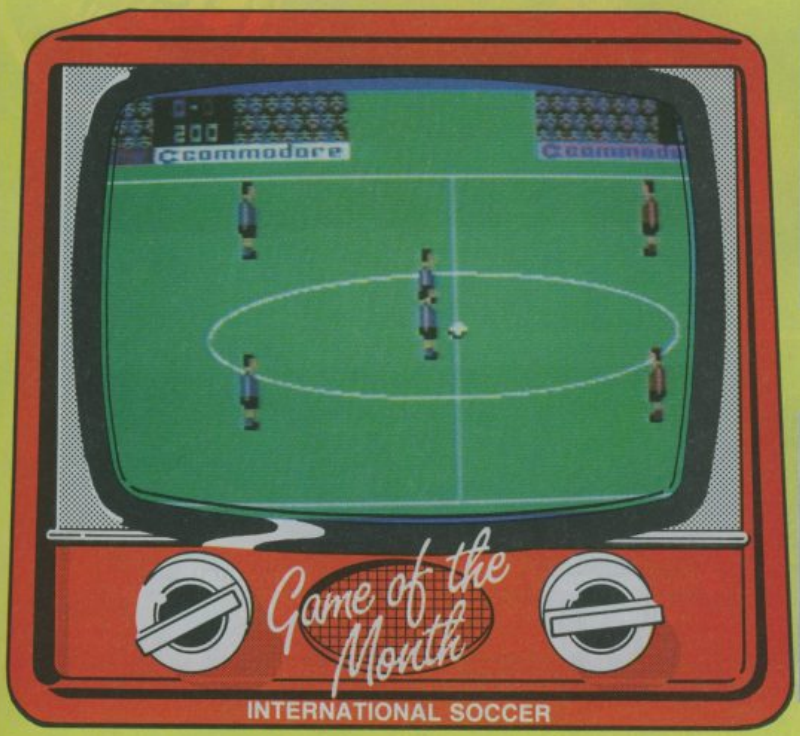
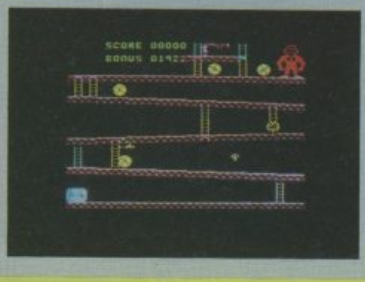
SALOON SALLY



INTERNATIONAL SOCCER

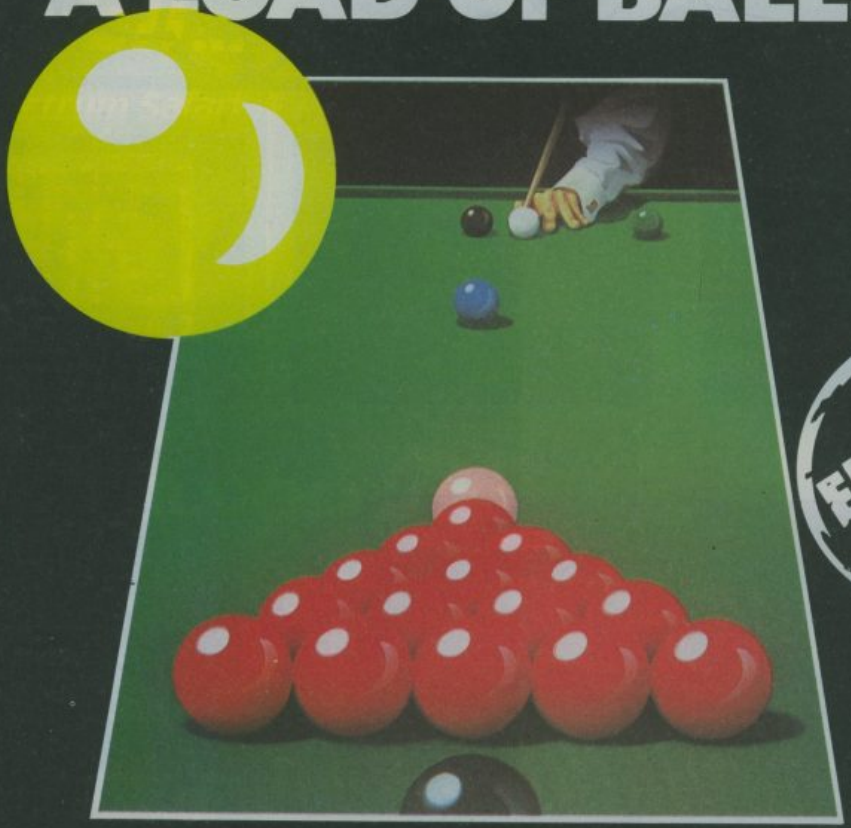


KONG

CYLON ATTACK

Have we got some great games for you this issue! Well, have we? Of course! Kicking-off with our game of the month — International Soccer for the Commodore 64, which we reckon will soon overtake Match of the Day in the popularity stakes. You'll find the review on page 28. We've also taken a look at Donkey Kong games for the Spectrum and come up with our favourite. Turn to page 28 if you're a Kong fan. Take a trip back in time to the good old Wild West and meet Saloon Sally. We take her to task on page 31. Arcade Zaxxon comes to the Spectrum with a slight change of spelling. Read our views on this 3D shoot-out on page 28. More space action when the Cylons attack. Are these aliens a real challenge? Find out on page 37. Jaws reappears from the depths attempting to take a bite out of unsuspecting water-skiers! Our water-sports reviewer reports on page 31.

MORE THAN A LOAD OF BALLS



Electron SOFTWARE AVAILABLE NOW

The pink's teetering on the edge of the pocket, the red's partially blocked, and now it's make or break.
Do you add a touch of spin or do you play safe?
Do you try for the trick shot or go for the snooker?
Visions Snooker brings all the excitement and all the tension of big time tournaments to your TV set.
With an advanced programme written by a 19 year old undergraduate at Queens College Cambridge, it makes Pot Black look like a load of old balls.
Visions **Snooker**. It's an exciting test of your skills on the cue. And it's yet another great game from Visions.
The ultimate name in video games.

Comments about the game from press and our customers

"FOOTBALL MANAGER is the best game I have yet seen on the Spectrum and my personal favourite of all the games on any micro ... To the ordinary person it is an excellent view of what can be done in the field of computer games ... The crowning glory of this game is the short set pieces of match highlights which show little stick men running around a pitch, shooting, defending and scoring ... It is a compulsive game but people who cannot take game sessions of 9 hours or so, which happened on one happy Sunday, will be grateful to know that there is a 'save to tape' option. FOOTBALL MANAGER has everything it could ... The originator, Addictive Games, certainly deserve the name." Rating: 19/20 (Practical Computing – August 1983).

"When I first received this game I spent the best part of the weekend playing it. Since then I have returned to it more often than any other. The truly addictive quality of this game is the remarkable way it mirrors the real football manager's problems ..." (Personal Computer Games – Summer 1983)

"It's my own fault you *did* warn me – I am totally and completely hooked on FOOTBALL MANAGER." (Mr. A. Wright – Lancashire.)

"It is by far the best software game that I have seen for the Spectrum." (Mr. N. Lincoln – Surrey.)

"I congratulate you for a marvellous game which keeps the player enthralled." (Mr. N. Creasey – Gerrard's Cross.)

"I am writing to say what a great game it is. I have spent over 45 hours on it." (Mr. D. Fearn – Gloucestershire.)

"Your FOOTBALL MANAGER game is terrific." (Mr. N. Cumming – West Bromwich.)

COMMODORE CUP FEVER IS CATCHING!

SOCCER

H.R.H. makes her début in computer games when she presents the winning captain with the trophy in Commodore's latest International Soccer Cartridge.

The football game is by far the best sports simulation ever produced for any microcomputer and is the standard by which all future sports games will be judged.

Several game play options enable you to choose the colour strip of your team so that you can choose your favourite team's colours, you can also choose the length of each game and whether to play against a friend or take on team Commodore.

It's the graphics that make the game — the running movement of the players is about as authentic as computer graphics will allow.

When the ball goes out of play the computer acts as referee and knows whose throw it is — the nearest appropriate player trots over to the ball, lifts it above his head, and throws it in. The ref also awards corner kicks and goal kicks and is very fair and sporting generally which deserves praise as in the one player game the computer is both referee and opponent.

The goalkeeper is capable of athletic dives and leaps that would make even Pat Jennings sit up and take notice.

There are so many nice 'extras' in this cartridge like the cheering crowd who sway to and fro when a goal is scored, and the advertising slogans around the perimeter of the pitch but perhaps the best is at the end of the game when the winning team line up in front of the stand and are presented with the cup by the Queen. The winning captain then raises the trophy above his shoulders to take the adulation of the fans.

The game plays well as having outstanding graphics — passing and shooting require considerable skill and it is possible to construct some quite complex moves.

The best game yet for the Commodore 64 and at only £9.99 an absolute must.

NO SURRENDER IN THIS BATTLE ROYAL

TANK BATTLE

Whole divisions of enemy panzers are about to breach the anti-tank barriers to be let loose on your HQ. With only three tanks left, can you stop the invasion and prevent an unconditional surrender?

Moving east and west you can elevate and lower your tank's gun turret to alter the trajectory and range of fire.

The battlefield erupts in explosions as the enemy fire back — unfortunately their fire is horribly accurate — but it is possible to knock out quite a few before you go up in flames.

The enemy tanks move from right to left across the screen descending towards the anti-tank barriers. Once they've reached this point they are below your gun barrel depression and it's impossible to hit them.

It states in the cassette inlay that once 10 tanks have penetrated your defences the game ends; in reality only five have to get through to your HQ to end the game.

Some tanks appear as 'ghost' tanks — mere shadows compared to the rest. I'm not sure whether this is meant to portray distance but 10 points are still awarded if you manage to blow them up. Far more difficult to hit are the red tanks which seem to appear at random and move at a faster speed.

There are five difficulty levels, although I wasn't able to determine much difference between them. In fact, I scored higher on level 5 than on level 1.

Tank Battle is enjoyable to play with the added incentive of trying to beat my previous best in the Hi-Score charts. However, control is with the TI joystick which is exceptionally uncomfortable to use and very unresponsive — the game would have been much improved with a better joystick.

Using an Extended Basic cartridge, Tank Battle is available from Temptation Software for the TI99/4a at £5.95.

PIRANHAS BUG YOU UNDER THE WAVES!

BUG DIVER

Frogger dons a wetsuit in this latest version of the hit scrolling arcade format.

You play the part of a little sea bug who decides to help out some fishermen by collecting fish eggs from the depths of the ocean floor.

There's only one problem — these eggs are guarded by a shoal of ferocious piranhas. Grimly they swim back and forth over the valuable cache of eggs and will go to any lengths to stop them being stolen.

Your job is to stay alive by dodging the piranhas in a very Frogger-like manner using the cursor keys. Once at the bottom, pick up an egg and try to make it back to the surface where the thankful fishermen will come along in their speed boat and relieve you of your load.

A nice feature in the graphics is the piranhas' faces, when they eat you — it happens all too frequently — they all turn as one to face outwards and leer at you in a toothy grin!

There are eight eggs to be picked up before moving onto the next screen where life becomes more difficult. However the controls are unresponsive and you will do well to pick up three eggs.

Bug Diver is an interesting variation on a theme but would have been more successful with better controls and stimulating sound effects. Every time a piranha bites, a burp-like sound is heard, no doubt from the full tummy of the fish!

Bug Diver is available from Somerset based Galactic Software for the Dragon 32 at £5.50.

LOOKING FOR TOP OF THE KONGS

KONG

If you are after a Kong game for your Christmas stocking you've got a pretty bewildering choice on your hands.

We managed to acquire four Spectrum versions though there must be at least that many again lurking in the small adds columns of the computer mags.

The most disappointing thing about Spectrum Kong, which all the versions we tested have in common, is that Mario has been reduced to a stick man. This detracts from the cuteness of the game — which was a major reason for its success in the arcades.

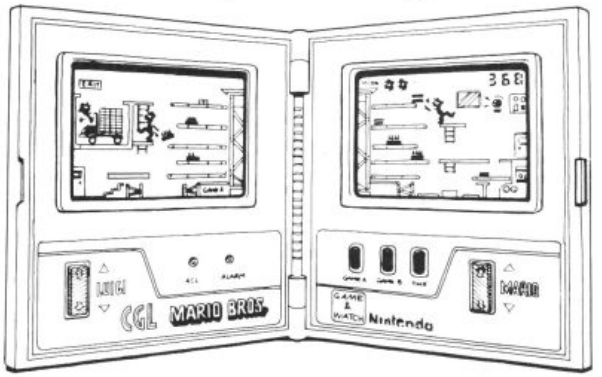
First up on screen was Blaby's Killer Kong with a deluge of barrels which were very difficult to

continued on page 31

Bottle battle beats Italian brothers.

Crash! Another crate of bottles hits the ground...it's Mario, hero of 'Donkey Kong,' and his looney brother Luigi, trying to keep their end up in a highspeed bottling plant. The butter-fingered boys leap from floor to floor as the crates come faster and faster; if they load the truck they get a breather, but one dropped bottle and the foreman runs out yelling... It's up to you to keep them jumping – on both screens at once! As you get better the game gets faster: Can you win the bottle bonus?

'Mario Bros' is the latest multi-screen adventure from Game and Watch, with two skill levels and (for super ace show-offs), a memory that keeps your highest score. And there's a quartz clock with alarm. That's why they call it Game & Watch. Catch it at your local shop now. Save the Italian boys from bottling out!



THE MOST FUN YOU CAN GET IN YOUR POCKET.

Brrr! Deep in the confines of the frosty blue maze Pengy is pushing his way out of trouble. Pengy's frozen wasteland is a random maze constructed of blue ice blocks raided by the dreaded Sno-bees. The sno-bee's sting is deadly, but Pengy can retaliate by squashing them with the ice blocks that he pushes around. Pengy is based on one of this year's arcade successes, and this version captures all the action and addiction of the original. Packed full of features, super smooth graphics, flashing and bonus blocks, double score bonuses, dizzy bees, and hours of entertainment!

ANY SPECTRUM.

PENGY

TUTANKHAMUN

48K SPECTRUM ONLY—The treasures of TUTANKHAMUN are awesome—but so are the creatures that guard them. Explore the pharaoh's tomb which is a very large series of scrolling mazes separated by locked doors. You have a limited time to unlock the doors with the keys, and escape with the treasure. Luckily you are armed with lazers and smart bombs as you will have to face a horde of guardian cobras, spiders, skulls, monsters and mummies. TUTANKHAMUN is what you'd expect from Micromania—fast, furious arcade action-packed full of arcade features: 100% machine code, fast, smooth, hires arcade action; tomb is over 40 "screens" long, opening doors, keys, treasures, maps, level selection, sound effects and tunes.

CYBOTRON

The fastest, meanest robot shoot-out game ever. Based on the arcade game that made Defender look tame, CYBOTRON is impossible to beat—only speed and skill can save you from the chaotic robots. Packed full of features: Four types of robots, bombs, multi-directional plasma lazers, up to 50 robots on screen. 100% machine code, a game that will test your reactions to the limit. ANY SPECTRUM.

keyboard only operation

SPECTRUM GAMES

100% machine code, fast, smooth, hires arcade action. Kempston, cursor key, joystick or keyboard operation. Games available direct £5.95 inc. p. + p. 24 HOUR DESPATCH, or from good software outlets. Trade enquiries invited. Good programs always wanted.

MICROMANIA

14 LOWER HILL ROAD, EPSOM, SURREY KT19 8LT

GHOST'S REVENGE

ANY SPECTRUM. Full arcade features; realistic gobbling, four coloured ghosts, dot and power pods, very intelligent chasing/running ghosts, eat blue ghosts for bonuses, tunnel, normal or INVISIBLE maze, 10 different selectable levels. 100% machine code action, excellent fast graphics, sound effects and tunes.

continued from page 28

hop over. This game also has the unfortunate distinction of having the oddest Mario. The little Italian must have had too much vino as he wobbles along in the most ungainly fashion with his feet pointing inwards.

If Blaby's Killer Kong was a bit too difficult then PSS's Krazy Kong is guilty of being too easy. I hopped my way onto the third screen on my first go — which was satisfying but not very challenging.

Neither Blaby's or PSS's game managed to capture the feel of playing the arcade game and some silly frills like an RIP tombstone which appears in PSS's game every time Mario gets splatted didn't add anything.

If software houses insist on ripping off ideas from the arcades then they may as well at least try to do accurate copies.

But if these two versions were average at least they were not as bad as C Tech's Krazy Kong which took about half an hour to load, was nothing like Donkey Kong, and had more bugs than a mangy old moggy. Happily there is one reasonably good version available in the shape of Kong from Ocean.

The game is fairly close to the arcade game, strikes just about the right balance in difficulty, and has some useful extras. Most useful of these is a training mode which enables you to choose which screen you want to start on and avoid having to go through screens one or two to get to the level which you have not yet mastered.

So if you are getting a Kong for your Spectrum — and lets face it the game is as obligatory to your collection as a maze game and a shoot 'em up — then Ocean's Kong is C&V G's choice.

Kong can be purchased in most high street software outlets at £5.95.

NOW JAWS BYTES BACK

AQUAPLANE

With jaws snapping, the giant shark leapt out of the water. Only the quick thinking of the speedboat driver prevented yet another waterskier's death.

You are in control of a speedboat which is taking a waterskier out for a joyride. For a while all is plain sailing until you enter an area of uncharted water. Giant pieces of driftwood surround you and to make matters worse — you have to guide both the boat and luckless skier round huge outcrops of rock looming out of the water in your direct path.

Breathing a sigh of relief you burst out of this hazardous area only to find worse ahead.

Firstly a flotilla of yachts and then a series of motor cruisers piloted by thoughtless individuals bear down on you at collision speeds.

With a flick of the wrist you send the wheel spinning and thinking of your hapless passenger weave and dodge through the yachts, cruisers and yet more rocks.

But you're not out of danger yet; fear wells in your throat when you recognise what can only be shark fins milling through the water towards the waterskier.

Can you tow him safely through those snapping jaws?

You have three lives and will lose one if either you or the waterskier crashes.

I can understand the speedboat exploding when it hits a rock but it seems a little incongruous when the waterskier explodes as well!

The cruisers apparently have some special powers as it is possible for them to steam straight through the rocks and come to no harm at all.

There is a high score table at the end of each game and bonus points are scored if you manage to get through each phase without losing a life.

Keyboard controls are easy to master on the Spectrum with 6 and 7 controlling up and down movement and 0 featuring thrust. This is graphically very realistic as the boat will start to plane as it gathers speed. However, I did find the game very slow to play and found it was fairly easy to reach the fourth phase.

Aquaplane is available from Southampton based Quicksilva for the Spectrum 48k at £6.95.

VERDICT OF THE CHAMP

SUPER COBRA

When C&VGames went to Munich to watch Andrew Brzezinski cruise home in the Senior Video Games World Championships we quickly realised that this guy knows a thing or two about a joystick.

We were so impressed that we signed him up on the spot to join the Computer and Video Games elite corps of games reviewers.

This month Andrew casts an expert eye over Super Cobra — Parker Brothers latest arcade clone.

You command a helicopter on flight through hostile enemy terrain — over hills, castles, tall buildings and through caverns towards your goal — a box of money waiting to be picked up.

There are twenty two levels to be flown through each with its own hazards and enemies to be defeated.

The distance you have travelled is shown at the top of the screen by a row of rectangles filled in one by one as you progress.

Armoury is in the shape of an unlimited supply of bombs and missiles — though it is impossible to fire these simultaneously as in the arcade version.

Fuel is limited so you will have to bomb fuel dumps as you go to replenish your supply.

The U.F.Os were a bit disappointing sitting completely stationary and making dumb noises — though they did become a bit more intelligent further into the game.

One good feature of the game is that it allows you to restart where you left off — rather than flying through all the previous levels — though you will have to suffer the insult of playing at the beginners level to take advantage of this option.

If you succeed in your mission — you are congratulated and then sent back to the beginning with a new life as a bonus.

An interesting game to start with — although it became a bit boring after a while as it does not get progressively more difficult with each new mission.

The game is in the shops now at £29.95 from Parker stockists.

By Andrew Brzezinski — Atari over 18 Video Games World Champion.

PENGO TURNS COW GIRL

SALOON SALLY

"Watch them cowboys, Ma'am!" — as you'll have to keep your wits about you if you don't want four hefty desperado's jumping on you.

In the depths of cowboy country, Sally's saloon is being torn about by some mad, bad cowhands. So involved are they in bashing each other up that they forget about the stolen gold

continued on page 32

continued from page 31

they've left lying around on the table tops.

In just retribution for the damage being caused, Sally slinks around the room collecting up the stolen gold. However, occasionally a cowboy catches up with Sally in the act of filching his loot and jumps on her in a mad frenzy. Poor Sal — she's only got four lives and she'll lose them if she's not careful.

Sally's one method of defending herself is by hurling tables and chairs at the baddies, which effectively puts them out of action for a while.

Once she has successfully picked up all the bags of gold you move onto a new screen where the layout of the tables changes.

An ever present jingle plays throughout the game which at first is quite catchy but after about five minutes of play begins to pall. I found it very irritating that there was no on/off option for the sound. However, the sound is effective in that it resembles a honky-tonk piano such as those found in old westerns.

Saloon Sally is based on the original theme of Pengo, the arcade game; the idea has been successfully transferred from the Arctic to the wild west and is very addictive in its own right.

With keyboard control, the game is easy to master and is very playable as there is room for a certain amount of strategy. Crushing all four cowboys at once will earn bonus points and I found that it was possible to trap the odd cowboy by manoeuvring tables round him thus leaving one less nasty to contend with.

Saloon Sally is available from London based Psion from the BBC Model A&B at £7.95.

ARCADIA GETS A ROCKET

ARCADIA

You'd think that converting a smash hit game onto a bigger more powerful machine would prove a cinch.

In practice it's apparently quite the opposite. Spectrum Arcadia is one of Imagine's best games whereas Arcadia for the Commodore 64 is little more than a second rate imitation.

The game follows the theme of the Spectrum version but lacks any of the "elusive playability" of the original.

The game is set in a galactic war. You're the sole surviving rebel facing the Federation's huge war machine. You control Arcadia, the galaxy's most powerful space craft. Wave after wave of the Empire's forces attack Arcadia, each new onslaught bringing fiercer and more intelligent opponents.

The first attack wave consists of rockets flying over head, which are fairly innocuous apart from dropping the odd bullet.

Progressive levels become more difficult if only because of the shear numbers of aliens present. Each sheet sees the appearance of a new and exotic alien race, intent on destroying Arcadia for the greater glory of the Empire.

Arcadia 64 is a very average game typical of games produced a year ago but not up to the standard demanded by todays computer owner.

If the program has one redeeming feature it's the keyboard control. The player can choose between a wide range of key layouts one of which is bound to suit them.

Arcadia is for the Commodore 64, one or two players and has a joystick option.

The game is in the shops now or mail order from Imagine software costing £5.50.

NOW RACE THE NASTY RODENTS

RADAR RAT

Eeeeek!! Watch out . . . a Radar Rat is coming to eat you alive!! This is what you must avoid in a new crazy maze chase called Radar Rat Race.

The scene takes place in a gloomy stone block maze where you have been imprisoned by an evil rat invasion force. You play the adventurous mouse whose only chance of survival is to gain enough strength and vitality and escape the maze. This can only be accomplished by eating your way through the numerous lumps of cheese kindly planted by an admirer!

Roughly a third (or less) of the hi-res screen is given over to the four way scrolling graphical maze. To the right of this is a rectangular radar map — similar to arcade Defender — which shows you where the cheese is as well as opposing rats and cats!

The cats don't move, but are sitting in various places around the maze. On the other hand, the rats seem to have a degree of "artificial intelligence" as they immediately detect your presence and chase you. You have one deterrent. By pressing the fire button you will activate it. Now I don't want to go into that in too much detail. All I will say is that its foul stench completely obliterates the rats sense of smell — if they are silly enough to step in it — and they lose your trail for a while.

These droppings are limited and controlled by a time-factor, displayed at the top of the screen. If however a rat catches you, or you run into a cat, you will lose one of your three lives.

Direction is inevitably controlled by joystick. A speed control is not incorporated. Because of this, when you come to a stone block in the maze, and you're not controlling the mouse, its direction (either left or right) will be decided by the computer.

This effect often interferes with your decision, producing a direction totally unrequested! Frustrating to say the least.

One annoying characteristic of the radar map, is that advancing mice are represented by tiny red dots which are hard to detect.

The constant background sound is pathetic! It plays *Three Blind Mice*, using only one of the three available voices — what an insult to a machines' good sound system!

Once a screen had been completed by eating all the cheese, subsequent screens followed in the same style, with faster action. Apart from the sound and few other irritating aspects, the game is quite exciting and amusing to play.

Radar Rat Race is available from Commodore Electronics for the Commodore 64, at a price of £9.99 (inc. VAT).

WHEN BENGO MEETS THE SNO YETIS

BENGO

Driven wild by the smell of human blood, Bengo is set upon by some murderous Yeti monsters. Can you save a harrassed eskimo from a very sticky end?

Set in the frozen wastelands of an arctic icefield, Bengo is trying to get the best of the Sno-Yetis. He has found that the best way of dealing with these hairy nasties is to hurl blocks of ice in their direction and squash them.

continued from page 32

The screen is covered in blocks of ice and is very similar to the arcade game Pengo, on which Bengo is based.

Our quaking eskimo starts off in the middle of the screen surrounded by Yetis and, in a set time limit, must finish them all off before they get him.

It's possible to manoeuvre blocks of ice around a Yeti and trap him. This makes it much easier to squash him, however you've got to be quick as the Yetis can melt the ice and escape!

There are nine difficulty levels and on the ninth life is fraught with danger as the pace becomes very hectic with Yetis and ice blocks whizzing round the screen.

I did find Bengo somewhat repetitive as the game didn't change in the various levels other than the addition of extra Yetis moving around at a greater speed. However, graphically and with its fast action, it is one of the better games for the unexpanded Vic-20 and is available from Manchester based Mr Micro at £6.90.

REVENGE OF THE MUTANT MICRO-CHIPS

TRANSISTOR

Revolution is brewing inside the BBC micro. The printed circuit has become a battle field as the CPU comes under attack.

The computer's components have become jealous of the CPU's power and authority and are moving down the tracks in an attempt to destroy it.

Your aim is to protect the 6502 from the rogue resistors and capacitors by firing pulses of electricity along the circuit wires.

The display shows the silicon chip in the centre of the screen with eight wires leading from it, criss-crossing over the screen.

Each wire has fifty components attacking the chip. If you become helplessly overwhelmed you can press the panic button which destroys all the components on the wires. This can't be used regularly because once used, it takes 20 seconds before the "smart bomb" is re-armed.

Bonus points can be picked up by shooting one of four tools that appear around the edge of the printed circuit board, Transistors Revenge, requires quick reflexes and a lot tactical thinking. Not since Planetoids have I been so impressed with a BBC game. I am sure this game will soon rank along side Planetoid as a classic BBC program.

The game is very well written. After each game is finished the program gives you the option to start a new game from where you left off. It also allows you to freeze a game while you nip into the kitchen and grab something to eat.

Transistor's Revenge has to get my vote as the best BBC game of the year! Transistor's Revenge is available from Southend based Softspot.

WHO DARES MIGHT WIN

S.A.S.

Maybe it's because I'm a spineless, cowardly eight stone weakling that I can't get to grips with Peaksoft's game, S.A.S.

A more likely explanation is that it is a totally unplayable game.

S.A.S. is an army training simulation. You're the sole surviving member of an elite S.A.S. squad dropped behind enemy lines on an undercover mission to destroy the enemy's nerve centre.

First you must negotiate a mine field with the help of a stolen detector and a limited supply of hand grenades, while avoiding the scouting helicopter gun ships.

The game starts by asking you if you wish to have a briefing. I wish I hadn't.

Every single letter is printed individually and each screen takes several minutes to be filled. Even so S.A.S. had me pulling on my jack boots and plastering my face with camouflage makeup in anticipation. The game promised startling hi-res graphics, armed patrols and night forays into enemy controlled areas.

But promises are made to be broken. The only startling thing about the graphics is their low quality. It's difficult to distinguish between a helicopter and an armed foot patrol.

I find it hard to believe the courage of some software companies (Peaksoft is a particularly good example) who try to palm off sub-standard games written in Basic on an unsuspecting public.

Who Dares Wins is an apt motto for Peaksoft but I hope the public votes this one a loser.

SPACE BATTLES WITH THE CYLONS . . .

CYLON ATTACK

A space-ship control panel featuring shields and lasers may sound reminiscent of Star Trek but in Cylon Attack you command a freighter not the powerful USS Enterprise.

The place of the Klingons is taken by Cylons and you take the part of a 21st century cargo ship captain. Your ship has been commandeered by Earth's defence ministry to transport supplies and munitions to remote planets at the fringe of the Terran Empire.

You have refused to leave your ship and have volunteered to pilot the freighter on its hazardous journey through the war torn galaxy.

The cockpit display shows the condition of your shields, laser banks, the direction of your ship and a radar scanner showing the position of the oncoming Cylonians. The first wave of aliens takes the form of *Star Wars-type* craft and inflated space invaders.

From here on, the going gets tough, as the freighter's only means of defence is a single laser cannon to be fired, when a Cylon ship has entered the gunsights in the centre of the scanner.

Cylon reinforcements are drafted in for the second attack wave, and are faster and more accurate than their earlier comrades.

The graphics are good if a little flickery at times. The ship's instruments are clearly shown and highly colourful. The game offers two different key layouts and a joystick option.

My only real criticism is that the game is far too noisy and the sound effects and explosions will soon have you cringing.

Cylon attack is for the BBC Model B and is manufactured by the Manchester company A&F Software for £8.00.

AGF

PROGRAMMABLE JOYSTICK INTERFACE for Spectrum or ZX81

ONLY 32.95 +£1.00pp

MICRODRIVE COMPATIBLE

ABOUT OUR INTERFACE

The AGF Programmable Joystick Interface is a unique design offering the use of any Atari-compatible joystick with absolutely all software, whether it is cassette or ROM cartridge, with the Sinclair Spectrum or ZX81.

The hardware programmable interface requires no additional software and accurately replicates the keys of the computer in a manner which is responsive to absolutely *ALL* key reading methods, both BASIC and Machine Code.

The interface does not interfere with key operation and can therefore be used simultaneously with the keyboard.

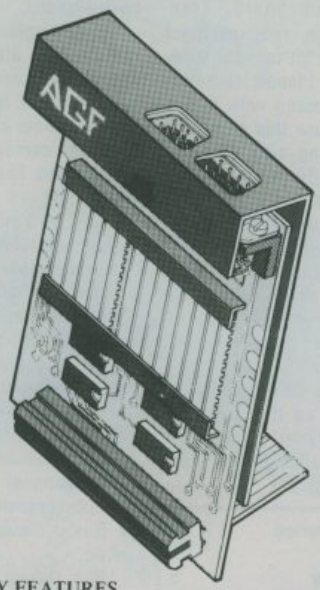
There is no need to remove the interface once fitted as the rear extension connector will accommodate further expansion, i.e printers or RAM packs etc. This important feature avoids excessive wear to the expansion port.

The key replication principle pioneered by AGF means that your own programs can use eight directional joystick movement by utilising simple key reading BASIC.

Two joystick sockets are provided which share the same keys, for use with the majority of two player games. Several interfaces may be used on the same computer for multiple joystick applications.

The interface is programmed by a two digit code, which is looked up on a programming chart supplied, for each direction and firing button. The two numbers are then selected on a pair of leads which are clipped onto appropriately numbered strips on the interface.

Once configured this can be marked on a Quick Reference Programming Card for storing with the game. As the programming is *not* power dependent the interface retains the last configuration made and can be immediately used when next switched on.



KEY FEATURES

- ★ Programmable design gives TOTAL software support.
- ★ Accepts Atari, Competition Pro, Wico, Starfighter, Quick Shot, Le Stick etc.
- ★ Rear extension connector for all other add-ons.
- ★ Free demo program and instructions.

PACKAGE CONTENTS SUPPLIED

- Programmable Interface Module as illustrated, complete with clip-on programming leads.
- Self adhesive programming chart detailing how to define which key is simulated by UP, DOWN, LEFT, RIGHT, and FIRE. This can be fixed on to the case of your computer or if preferred the protective backing can be left on. The chart is made of a very durable reverse printed plastic and is extremely easy to read.
- One pack of ten Quick Reference Programming Cards for at-a-glance setting to your games requirements. The card allows you to mark the configuration in an easy to read fashion with space to record the software title and company name.
- Video Graffiti demonstration program which is written totally in BASIC to illustrate how all eight directions and fire can be read. This is also a useful high resolution drawing program.
- 12 months guarantee and full written instructions.

JOYSTICKS

CONTROLLERS FOR USE WITH OUR INTERFACE Module or VIC 20, Commodore 64, Atari VCS, Atari 400, Atari 800

MORE PROFESSIONAL BUGS!

Yet again, I've heard of more bugs appearing in so-called professional software. It may be that a single batch of these cassettes are faulty, or perhaps there really is a bug in the sequel to Ultimate's Jetpac for the Spectrum.

Lunar Jetman, as the program is called, has been causing problems for Karl Barratt of Cardiff. He has managed to get to the missile station with the gun fixed on the Moon Rover. When he fired at the missile going to earth, the screen blanked and the computer NEWed itself. He says that this happened four times in a row. If anyone else has had this problem, I'd like to know about it. Meanwhile, Karl, I suggest that you take Ultimate up on their offer to replace any faulty tapes.

Going back to the bug in Jetpac, Darren Scott from Corby, Northants thinks that he's found another!

If you play a 2-player game and player 2 beats the existing high-score, his score will not become the new high score. Has anyone else had this problem? If you have, then let me know.

KILLER BUG

I've also heard about a possible bug in Program Power's Killer Gorilla for the BBC. Matthew Fidell writes from Taunton in Somerset that the program has a nasty habit of placing a new screen on top of the old one! You can play on for a moment, before the game crashes completely. Has this happened to you?

VIC TIP

VIC owners should find this routine quite handy. It will stop anyone from breaking into a Basic program once it is running.

When you press RUN/STOP the computer starts a machine code program whose starting address is in locations 770 and 771. If you change the contents of these locations to the machine code which is executed when the machine is first turned on, then when someone presses RUN/STOP the machine will think that it has just been switched on and will clear all its memory.

To change the addresses, just type POKE 770,34: POKE 771,253 and now try breaking in to your program. Remember to save anything on tape first, as it will be lost forever once you type RUN.

You can return the machine to normal by POKE 770,131:POKE 771,196 Thanks go to Nicholas Cole of Selby for this.

DRAGON INTO TANDY WILL GO

For everyone who's always asked why we don't publish many TRS 80 listings, here's a way of adapting some Dragon programs from previous issues for the Tandy Colour Computer.

When the Dragon PEEKs locations 341-344 it looks for a value of 223 to register an arrow key. The TRS 80, though, uses 247.

You can alter Fox and Hounds from August's issue to run on a Tandy Colour computer by changing lines 620 to 650. Change the 223 in the brackets to a 247. Thanks go to D. Healey for this. (No not that D. Healey.)

SPEC-SCROLL

Paul Jennison of Hull sent me a useful tip for Spectrum owners. Although there is no command in Basic to scroll the screen up by one line, such a routine does exist in the ROM. Simply type LET L=USR(3280) and the contents of the screen will be scrolled upwards by one character.

Write to me at Bug Hunter, Computer and Video Games, Durrant House, 8 Herbal Hill, London, EC1R 5EJ. Or phone me on 01-278-3881.

UNBREAKABLE SPECTRUM

Robert Burgess writes to me from Rotherham on some wonderful notepaper with that Bear named after a railway station smiling in the corner. (Haven't you heard of Liverpool-Street Bear?)

If you want to protect your Spectrum Basic programs from being copied, try this, which will put a REM at line O which cannot be erased. You could put your name here, perhaps.

Decide on your REM line and type it in as line 1. Then enter: POKE (PEEK(23635+256*PEEK(23636)+1,O and the line will change from 1 to O. Try deleting it! And remember; keep eating the marmalade sandwiches.

MOON GUARD UPSIDE DOWN

Going back to our 3D issue from October, Peter and Ana Ells sent me this suggestion for Moonguard for the BBC model B.

With their monitor, they found that the 3D effect was easier to see if the screen was inverted. To do this, alter the program as follows. Firstly, swap lines 430 and 450.

Then, alter 2460 to 2610 to read:

```
2460 VDU 19,0,5,0,0,0
2470 VDU 19,1,4,0,0,0
2480 VDU 19,2,1,0,0,0
2490 VDU 19,3,0,0,0,0
2500 VDU 19,4,4,0,0,0
2510 VDU 19,5,4,0,0,0
2520 VDU 19,6,0,0,0,0
2530 VDU 19,7,0,0,0,0
2540 VDU 19,8,1,0,0,0
2550 VDU 19,9,0,0,0,0
2560 VDU 19,10,1,0,0,0
2570 VDU 19,11,0,0,0,0
2580 VDU 19,12,0,0,0,0
2590 VDU 19,13,0,0,0,0
2600 VDU 19,14,0,0,0,0
2610 VDU 19,15,0,0,0,0
```

SPECTRUM MEMORY COUNTER

Kai Weber from Reading sent the following hints for Spectrum users. If you're writing a program and want to know how much memory you have left, then you can use the FRE command on most Basic machines. However, the Spectrum lacks such a facility from Basic.

But the machine must need such a function in its ROM to see whether or not a program line will fit.

The code does exist, and you can find out how much memory is left by typing PRINT 65535-USR 7962.

Also, says Mr. Weber, it can be tiresome having to pull out the plug to reset the machine. This normally has to be done if there is graphics or machine code stored above RAMTOP, the parts of memory where CLEAR cannot reach. Typing PRINT USR O will do the same job, clearing the whole of RAM.

WHOOPS THE TI JINX STRIKES AGAIN!

A couple of lines were left out of the instructions for the 3D maze game for the Texas TI99/4a in the yearbook.

Firstly, the game needs an Extended Basic cartridge to run. Also, we didn't explain how to get the black graphic character which is used to make the maze. It is created in line 14 to 27, and is a CTRL-COMMA.

BY ROBERT SCHIFREEN

HOT SHOT'S PRICE BEATERS

A new range of no less than 24 VCS titles have just been imported from Germany at the knock-down price of £6.95.

The Hot Shot range is manufactured by Goliath Electronics of West Germany.

Some of the highlights of the range are Pac Kong a hybrid of the famous maze game and climbing game. You have to get a harassed construction worker up to the top of a building without being thrown off by an angry mob of bricklayers.

Dream Flight is said to be the toughest of the range in which a nightmare becomes reality. As you fly your helicopter back to base, you come up against a swarm of flying demons heading straight towards your cockpit.

Organized crime comes to video games with Mafia. In this game, you play the part of a warder who is trying to prevent a break out of some of the most dangerous gangsters.

There are several space shoot-'em-ups in the range, with titles like Astro Attack, Space Eagle, Space Raider, Time Race, Space Robot, Galactic and Black Hole.

If cute games are more to your liking then you might try Tom Boy, Felix's Return, Squirrel & Snail and Forest.

The Hot Shot range should cause quite a stir in the video games' business selling at less than a quarter of the price of Atari's and Activision's top of the range games.

The only unknown factor is the quality of the games — and you'll just have to wait until the Joystick Jury passes its verdict to find that out.

TOP TEN	
1	Pole Position Atari
2	Dig-Dug Atari
3	Enduro Activision
4	Battle Zone Atari
5	Phoenix Atari
6	River Raid Activision
7	Donkey Kong CBS
8	Zaxxon CBS
9	Tutenkham Parker Bros.
10	Robot Tank Activision

ATARI GAMES

The Colecovision Atari cartridge converter is now on sale.

The add-on enables Colecovision owners to play Atari VCS games on their new system.

The box should particularly appeal to people who already own a VCS but want to upgrade to a Colecovision.

They can now do this without making redundant their existing collection of games.

The converter is available from Silica Shop and most Coleco stockists at £59.00.

YEAR OF THE TIGER

The entire Tigervision range is now available in the UK.

After a wrangle as to who the main importer would be, the new London-based distributor — Prism, are bringing the games into the country.

The best known game in the range is Miner 2049'er which is up before the court in Joystick Jury this month.

Also in the range is Jawbreaker — a gobbling maze game where a pair of false teeth go to work on the candies and chocolate bars in a sweet factory.

If you are sweet enough, you may decide to try your joystick, at Marauder where you have to get through six mazes to recover the cosmic treasure. Watch out for the robots — they've got different plans for the glittery stuff.

Also in the range is Tigervision's answer to Donkey Kong in the shape of King Kong, which features the sky scraper and giant ape of the famous film.

Threshold is a classic space shoot-'em-up with up to 10 different space enemies waiting to attack your ship.

The games are in the shops now or available by mail order from Prism at £21.95 for Jawbreaker, Marauder, Threshold, and King Kong. Miner 2049'er is slightly dearer at £27.95.

MOON BUGGY

Moon Buggy is the latest arcade clone being offered by Atari for the VCS.

The arcade conversions are coming thick and fast as Atari seem to be concentrating on this type of game rather than releasing original projects.

Moon Buggy was a minor hit in the arcades and is still claiming 10p pieces in several of the country's arcades.

The game combines elements of Scramble and Donky Kong — you scroll from left to right along a lunar landscape. Push the joystick forward to make the buggy jump over craters and crevices.

You are armed with a laser gun which can fire simultaneously in two directions. Useful when you are attacked from the skies and have to blast an obstacle out of your path as you travel.

Points are awarded for hopping over craters and mines and blasting the UFOs as well as the tanks that march towards you in the later stages of the game.

Moon Patrol will be in the shops at the end of December and early January at £29.99.

Also making a guest appearance on an Atari cartridge early in the new year will be the delectable Miss Piggy who has taken time out from the Muppets to star in her own game.

Atari are not saying what other Muppets will be her co stars but let's just say the lovely lady is attempting to get a certain other character up the aisle.

Cartoon games are a new departure for Atari. Two other characters due to make an early appearance on cartridge in 1984 are Snoopy and that incorrigible Roman soldier Asterix.

GAMES TIPS ON VIDEO

Here's yet another use for your crowded TV screen! Tips on video games on a video-tape. Polygram Video is releasing three tapes collectively called *How to Beat Home Video Games*.

Tape one is called The Best Games and features hints, tips and strategies for games on the Atari VCS system, including Demon Attack, Yars Revenge, Chopper Command, Frogger, Pac-Man, Donkey Kong. Twenty games are featured on this first tape.

Volume two brings you The Hot New Games including ET and Raiders of the Lost Ark, while volume three looks at the "super systems", including the ColecoVision and the Vectrex.

The tapes give detailed strategies for each game they deal with, and include slow motion blow by blow breakdowns of how to deal with nasty aliens or tricky ghosts. A narrator explains each move — giving hints on how to get maximum bonus points and even exploit bugs in programs to get those high scores!

Each tape lasts for 60 minutes and will be available to the video dealers at £19, £39 for all three. We hope to bring you more detailed reviews of each tape in future issue. But in the meantime why not check out your local video library to see if they have the tips tapes in yet! And watch out for a special video contest next issue!

THE FORCE IN STORE!

"May the Force be with you" — and you'll need it if you bump into Darth Vader whilst doing your Christmas shopping.

Lord Vader will be appearing in Hamleys and Harrods to promote Parker Brothers Star Wars games during Xmas week.

With only a handful of authentic Darth Vader costumes in the country, Parker have managed to obtain two of them courtesy of Lucas Films, the makers of the epic Star Wars Movies.

GAMING

TRY TO NAME THAT GAME

If you don't think Santa will bring you a video game system for Christmas then here's your chance to win one and get a Turbo Driving Module into the bargain.

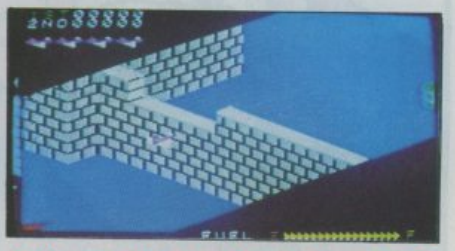
Colecovision have really taken the season of goodwill to heart and given us three of their games systems regarded as featuring some of the best graphics around, with Donkey Kong cartridge and Turbo Drive Module thrown in.

All you have to do is answer the questions under each of the pictures of Colecovision games.

Then rush your answers — on a postcard please — to *Computer and Video Games*, Colecovision Contest, Durrant House, 8 Herbal Hill, London EC1R 5EJ.

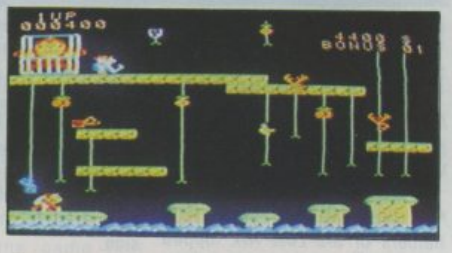
Entries cannot be handed in or delivered personally and the usual *Computer and Video Games* competition rules apply. Closing date is January 16th.

1) Name the Game?



2) Who makes the arcade version of this game?

3) Which screen is the player on: One, Two, Three?



4) Is this game called (a) Son of Kong, (b) Donkey Kong Jnr, (c) Donkey Kong Part II?

Professor Video's good high score guide.

We are pleased to be able to bring you a monthly column by the distinguished professor — holder of the Nobel prize for Alien Blasting, Maze Dwellers Award for Fruit Gobbling and author of many books including the best selling, How to Knock the Living Daylights Out of Nasty Little Aliens.

In his opening column he turns his attentions to the smash hit game Pac Man. His advice and strategy tips are based on the Atari VCS version — and are not always relevant to the arcades, Atari 400/800, and other home versions of the game.

Patterns are the key to consistent high scores in Pac Man. Unfortunately though — there is not one super-pattern that will suit everybody, or every screen in the game. The best advice is to practise the pattern that best suits you and memorise it.

Better still — draw several maps of the maze and draw in the route which you find the best with a red pen indicating the direction of travel with arrows.

One basic thing to watch for is to make sure that Pac Man is completely over the dots, in order to eat them. This is particularly important when reversing or changing direction — as you don't want to look back at a dot, which you think you have eaten, to find it still there.

Try to avoid eating the energising pills unless you are really in a tight spot or are sure you can extract maximum points from doing so.

When you become really proficient you should aim at leaving the board with all the power pills with one wafer adjacent to each so that you can tempt the ghost into a trap.

Make use of the tunnels — very often the ghosts will not pursue you through them.

Use them to plan your movement around the board — don't look upon them as merely emergency exits for when the going gets rough.

Good Pac play requires precision timing and strategy. It is not sufficient to know the correct patterns, you must also make your turns at just the right second and anticipate the movements of the ghosts caused by your moves.

One of the toughest rules of Pac Man that it is important to grasp is to learn to relax. VCS joysticks are not the most responsive sticks ever invented so don't wrench and pull, it only puts you off balance, makes the stick even worse, and upsets your concentration.

Professor Video wants your tips. In his search for perfection at all games the prof. is grateful to any readers who can send in tips, or interesting discoveries they have made whilst playing video games. We have bags of bug badges and *C&VG* yearbooks to give away for published tips. Mark all letters for the attention of the Professor at our Herbal Hill address.

ROBOT IN BATTLEZONE

Activision has a happy knack of producing the right games for the VCS at the right times.

It wasn't coincidence that Pitfall Harry was on sale while *Raiders of the Lost Ark* topped the cinema charts. And it isn't surprising to find that the company's version of arcade hit Battle Zone has almost beaten Atari's own to the high street stores.

Of course it has to go out under an assumed name, Robot Tank and it does include a few new features — but for once it's the Atari version which gets the jury's vote.

The original game (from Atari's arcade division) played on the duel of wits which took place between the computer-controlled tanks and the player's. Only by carefully outmanoeuvering an opposing tank could you be sure of getting in that all important first shot.

Activision is guilty of adding too much to a simple formula which worked well enough. Robot Tank utilises the Enduro skyline to give the game a day and night sequence. There is an addition of weather problems, snow, rain, fog or some of the opponent's fire can knock out vital parts of the tank's weaponry.

It all sounds as though it ought to improve the game, sadly it makes the whole thing a lottery compared to the the Atari version.

The scenario behind the game explains that renegade robotic tanks are threatening to destroy San Francisco. You must command still loyal robotic tanks to defeat the enemy.

Control is helped by a radar screen which shows up a telltale blip — an enemy tank. There is a video screen with sights in the centre for looking forwards onto a colourful landscape. The damage sensors show V.R.T.C. which stand for: video, intermittent loss of picture; radar, becomes inoperative; tracks, mobility is brought to a crawl; cannons, cannot rely on them firing.

Cannon fire can be guided onto the target. During nightfall only video and the flash of an opponent's firing gun give clues to his position. And each different weather condition presents its own problems. Robot Tank costs £29.95

THE VERDICT
Good graphics but the game doesn't measure up to the addiction generated by the Atari version.

- **Action**
- **Graphics**
- **Addiction**
- **Theme**

SAVE ME POPEYE!

Ok you landlubbers clap your eyes on this review all about my lady love — Olive, that no good slob Brutus and yours truly Ordinary Seaman Popeye.

First thing I notice is me darlin Olive shouting for help at the top of the stairs — where this big bully Brutus is trying to keep her prisoner. So I reaches for me spinach but that snivelling Sea Hag pal of Brutus keeps movin it.

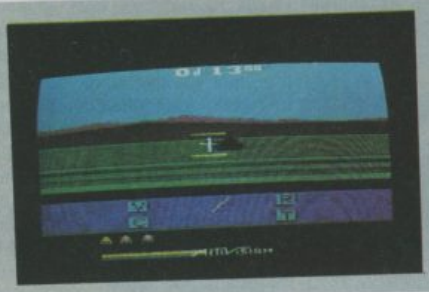
You can help Popeye save Olive in this latest home version of Nintendo's hit arcade game.

To complete the first screen Popeye has to catch all the hearts that Olive is throwing down — without letting Brutus catch him.

If you manage to grab your spinach you can punch Brutus into the middle of next week but — take care as the green stuff is in short supply.

When all the hearts have been caught screen two appears with Olive trapped at the top of a building. This time she is showering her true love with musical notes. Run up and down the ladders and along the platforms to catch them in the shortest time.

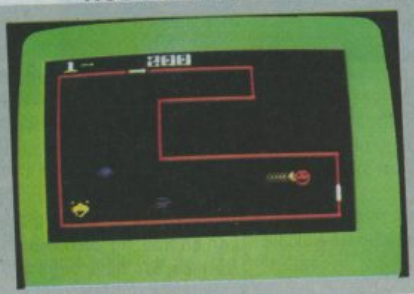
To make things even more difficult there is an ugly green monster — affectionately known as the Sea Hag — who keeps



ROBOT TANK

POPEYE

BEDLAM



VENTURE

BOUNTY BOB

GAMING

lobbing empty beer bottles at you. If one of these makes contact it's curtains for you and Brutus for Olive so you have to dodge 'em or punch 'em to stay in the game.

Screen three's going to take all the spinach our hero can get and, as the advertisements for the game say, "I doesn't suggest ya tries it if ya eats yer spinach in a quiche". This is the toughest challenge in the game — with moving platforms, several flying beer bottles and a big black bird which can knock you off the platforms.

To rescue Olive on this final screen you have to catch the letters making up her desperate message — Help.

This is a most accurate copy of the amusing arcade which I would place in the top ten games available for Colecovision.

With Q'bert and now Popeye it looks as if Parker Brothers are really going to excel themselves on the Colecovision in a way they have not so far achieved on the other machines. £29.95 from Parker stockists.

THE VERDICT
Cutest game for Colecovision so far.
- **Action**
- **Graphics**
- **Addiction**
- **Theme**

VECTREX BEDLAM

Bedlam is the latest shoot 'em up for the new Vectrex all in one games system.

Does it need another shoot 'em up was my first thought. With Web Wars and Fortress of Narzod just released and at least a half a dozen others in the existing range a different type of game would have added greater variety to the range.

The game itself doesn't quite come off. Your ship is trapped in a diamond shaped space. Nasties are coming at you from the corners and you have to rotate and shoot to stop them colliding with you.

When the aliens stop coming a new pattern appears with more spikes and faster aliens.

There are three game play options. As well as the basic game you can also add complicating factors like making the shape rotate left and right and also making it shrink towards your ship.

When the game gets really hectic you also have one smart bomb which you use to wipe out all the nasties on screen at that particular moment.

The game would be immeasurably improved if you could move your ship instead of merely being able to rotate.

This is not one of the better games for the Vectrex.

It would be nice to see a bit more variety in the range of games for the Vectrex — an adventure game or strategy challenge would be better.

THE VERDICT
If you want a new shoot 'em up for your Vectrex I would recommend Web Wars or Fortress of Narzod in preference to Bedlam any day of the week.

SURPRISE U.S. HIT!

One of the big surprises when the Colecovision went on sale in the US last year was the immediate success of Venture.

C.B.S. had forked out literally millions of dollars to buy the rights to hit arcade games like Zaxxon and Donkey Kong and yet, out-selling them all was Exidy's minor arcade success.

The good news for Intellivision owners is that the game is now available for the master component.

This game must rate as one of the cleanest conversions I have come across from one system to another, which bodes well for Intel owners if Coleco decide to convert more from their exciting range of titles.

Almost every detail is exact — from graphics to sound effects.

The game is quite similar to Atari's Berzerk — though much more fun with lots of extra features to keep you guessing.

You play the part of Winky who searches several monster-inhabited chambers for treasure.

Armed with his trusty bow Winky can pick up bonus points by killing the monsters who are trying to stop him from getting the treasure.

Once the treasure has been bagged our hero must make a hasty exit — back to the hallway.

Then he can move on to a new room and continue his search for more treasure.

When the treasure has been taken from all the rooms Winky goes onto a new level where the nasties are even nastier though the treasure is much more valuable.

The bounty from each successfully completed mission is displayed on an interim screen with question marks representing that which remains in possession of the chamber monsters.

This gives the game that addictive touch. You want to see all those treasures displayed on Winky's screen!

One slight disappointment with Venture is that when you complete the fourth chamber you go back again to the first. Although the challenge of finding the extra treasure and solving the riddle is not impaired, it would have been better to get a new chamber every time.

The graphics in Venture are not stunning, but they are adequate, and the game does not suffer as a result.

It's nice to see some good quality games for Intellivision in the CBS range and this is certainly one of the best.

Venture is a thoroughly absorbing game. You will need to move swiftly, plan your direction carefully, and keep a speedy finger on the fire button to succeed.

Its multi-level challenge provides a constant incentive to get further into the game.

Venture is manufactured by C.B.S. and is in the shops now at £29.95.

THE VERDICT
Superior to many of the games in Mattel's own range.

CLAIM THIS GAME . . .

Bounty Bob is the hero of Tigervision's smash-hit climbing game — Miner 2049'er.

The scenario has our hero mining a radio active mine in the year 2049. H's version of the game popular among Atari micro owners and was a big hit in the States. It currently stands at number six in our computer charts.

You must help him stake his claim in each of the three mines which are represented as different screens in the game.

In order to claim a mine, Bob has to walk along all the platforms colouring them in as he walks.

To make things more difficult the mines are inhabited by mutant organisms who exist on a diet of prospectors. Also scattered throughout the mines are certain articles left behind by earlier prospectors. These can be picked up to score bonus points and also enable you to kill the organisms (Pacman-like) by making contact with them for a few brief seconds.

Each mine has two disused shafts which can be used to slide down by our hero but check first to make sure their are no mutants lurking at the bottom.

I found the game fun and playable but annoyingly slow. Bob's response to the joystick was extremely sluggish. I tested the game with three different joysticks and found the same lack of response.

Miner shares one criticism with all climbing games and that is that once you have mastered a screen there is not much challenge left in the game for you. In an attempt to give the game a more lasting challenge Tigervision have added a clock so that players can race each other to claim the mine.

An above average climbing game and certainly better than the top-selling Donkey Kong. £27.95 from London-based Prism.

THE VERDICT
One of the better climbing games for the VCS.

Through the cold morning mist one weekend in November figures could be seen carrying a strange array of pinball machines from all eras into the Old Whitgiftians Rugby Club.

The reason for this odd gathering was the 1983 Pinball Owners' Association convention held in the club room, near Croydon. Association members came from far and wide to the convention — one Dutch member made the Channel crossing.

During the morning the many and varied machines were set up, finely tuned and last minute adjustments made. The afternoon was spent in fierce competition on three machines as everyone attempted to get high scores to get into the Pinball Wizard final — which was battled out on a brand new Bally Goldball loaned for the event by Ruffler and Death.

Eventual winner was Stafford Meadowcroft from Manchester. Stafford took home the Pinball Wizard silver trophy — donated by *Coin Slot*, the arcade trade magazine. He also received a tankard donated by Bally/Midway of Chicago. Jimmy Waters of London won the prize for the best restored machine that with his Recel Torpedo dating back to the 1960s.

Pinballs on display at the convention covered the entire history of pins, from the purely mechanical machines of the 1930s to the latest pins packed with microchip wizardry.

Gary Baker of Bromley brought along two classic machines, Bally's Wizard and Fireball. The latter must have the best artwork ever seen on a pinball machine. Gary's Wizard also won the vote for the most popular machine at the convention.

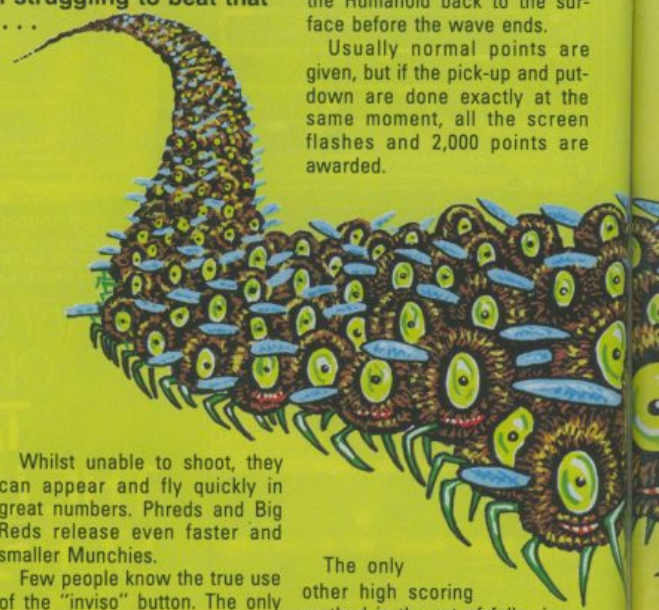
Thanks to POA member Keith Temple for this report on the convention.

Illustration: Dorian Cross

OUR BOFFIN IN SPACE!

TIPS ON STARGATE

Last issue we asked for readers' tips on their favourite arcade machines. First out of our Mailbag pile was Ian Boffin from Woking, who wrote to us about Stargate by Williams, the Defender people. Don't forget we'd like to hear from you if you've got hints for the rest of us still struggling to beat that hi-score! Now, over to Ian . . .



"Before tackling Stargate, it is very helpful to be good at Defender. All the normal six enemies are there, with eight new ones, all requiring a different strategy.

The first screen is very similar to the original screen of Defender but also with two Dynamoes which release Hums, and the dodging Firebombers.

The second screen is very much like the first, but with the Firebombers shooting fast and small Fireballs on a difficult curving trajectory. Also, there are the small and speedy Yllabian Space Guppies which are a joy to watch and shoot.

In the third screen the Pods arrive with a new style. They do not all start off floating near your ship, but fly around until they intersect somewhere over the planet. Then they can be smartbombed, usually leaving no Swarmers at all!

The fourth screen is the same but with four Pods and the usual speed increase. Every 5th and 10th wave, the difference is really noticeable. The 5th wave is an Yllabian Dogfight, where you are in space purely with Space Guppies, a few Dynamoes and Swarmers.

Wave 10 is rarely achieved by most people, but it is a Fireball Challenge, which requires a lot of luck and about three Smartbombs. Then it returns to the new planets.

All the new enemies need new methods for shooting. Firebombers are by far the worst because they dodge your bullets. When near one, fly above it so it can't get you with a Fireball and fire constantly, and it should walk into your bullets eventually.

Hums and Dynamoes are easily destroyed but just be careful of stray Hums.

The last three new enemies are the Phred, Big Red and the Munchies. These come at the same time as Baiters.

Whilst unable to shoot, they can appear and fly quickly in great numbers. Phreds and Big Reds release even faster and smaller Munchies.

Few people know the true use of the "inviso" button. The only time a good player uses it is when a group of Mutants are on screen. When this happens, as in space after losing a planet, it is advisable to stop thrusting and sit still with the "inviso" pressed. All the Mutants will walk into the "inviso" and blow up.

The main points now come from Humanoid pick-ups. As in Defender, a pick-up is worth 500 points, but now collecting two gets 1,000 for the second pick-up and so on until a fourth Humanoid underneath you scores 2,000 points.

One trick very few people know is that, if you have a Lander which picks up a Humanoid as the last enemy in a wave, once the Lander is shot you must get the Humanoid back to the surface before the wave ends.

Usually normal points are given, but if the pick-up and put-down are done exactly at the same moment, all the screen flashes and 2,000 points are awarded.

The only other high scoring method is the art of following a Pod to an intersection and Smart-bombing all four.

For a beginner, I would hunt around for a game with five lives, a lot of "inviso" and with any luck set on a skill level of around 2 or 3 which is hard in itself!"

FIGHTING THE THIRD WAR

M.A.C.H. 3

You are miles above the earth in your F15 fighter jet when World War III is announced. Streaking through the sky you speed to defend your country.

M.A.C.H. 3 is part of the Military Air Command Hunter Force which is in a constant state of alert ready to strike as soon as there is an indication of international war.

Descending to attack you hear a voice, "Take out the bridge" and with screaming engines you dive into a barrage of anti-aircraft fire before dropping your bombs on target. Other instructions will be heard throughout

ARCTIC ACTION

TIPS FOR RACE ACES

Racing games are guaranteed to set the adrenalin coursing through your veins, until that frustrating crash, that is.

And so here are a few tips on Pole Position to keep you on the right track from Julian Rignall, *C&VG*'s Arcade Champ.

Pole Position gives the player a chance to get used to the circuit in a qualifying lap. The faster you go, the higher your grid placing in the race, so always aim for 73 seconds or faster, otherwise you won't qualify.

To get a good grid placing, don't bother to change gear once you're in top, only change down in emergencies. Once at the starting post make sure your foot's on the accelerator and the gear is in low to get off to a really good start.

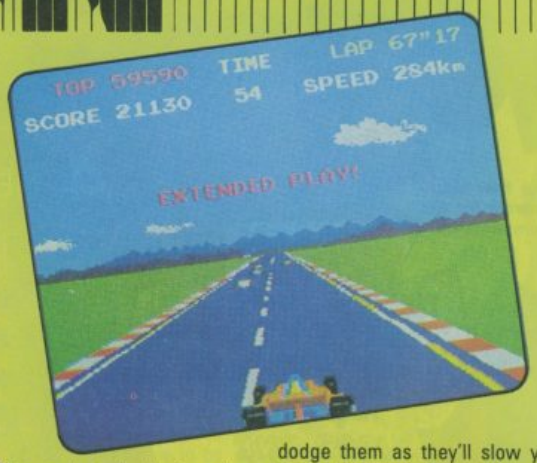
POLE POSITION

Change to high gear at about 90mph if the top speed is 195mph or about 120/130mph if the top speed is 225/250mph. Be prepared to drive like a maniac!

The first right-hand bend is a few seconds after the arrow sign and presents no problems. Move to the outside at top speed and out across very sharply. You might skid, so counter-steer and you'll remain on the track. On the second lap and thereafter, you'll find other cars on the bend, so to dodge them move to the inside of the track near the bend and cut across the grass overtaking cars on the inside and move back onto the track quickly.

Announced by the arrowed sign is the hair-pin with the infamous 'centipede' sign. This sharp left bend needs quick reactions to survive and still come out with a good speed. If there are one or two cars on the bend, don't change gear but move to the outside of the track and jerk the steering wheel left and then quickly counter-steer to dodge the cars on the inside lane.

If there are more than two cars on the track keep in high gear, move to the inside and take a short cut across the grass. Get back onto the track quickly otherwise you'll lose speed and be rammed from behind.



The next obstacle is a long bend — try to keep to the inside of the track but if necessary move to the outside to dodge other cars. The end of this bend is deceptively sharp and you might skid off the track or go into the back of a slow car if you're not careful.

The last leg of the lap is straight. Be prepared to dodge the cars which enjoy lane shuffling especially towards the finishing post — it's most infuriating to see your car written off within sight of the finishing post and a record time.

A few other tips might help — watch the puddles and try to dodge them as they'll slow you down by 10mph. Try not to skid too much as this will also slow you down as does going onto the grass and driving on the red and white border of the track.

Handling is most important so steer smoothly and fluently and try not to jerk the wheel unless it is absolutely necessary. Always think ahead and gauge what other cars are doing — red and white cars have a tendency towards erratic driving, especially slowing down. And the orange ones tend to speed up when you're about to overtake them.

Finally, try your own tricks and tactics which will ease your race. Happy Racing.

FLIGHT INTO FANTASY

Interstellar is one of the first laser disc games to feature computerised graphics.

This helps the background pictures to tie in more closely with the computer graphic crafts which the player controls.

But the visual effects are none-the-less stunning compared to the usual pixel-based graphics of the pre-laser disc games.

It's a far cry from those original green meanies in early shoot-em-ups. Gone are the days when you had to stand for hours crouched over an upright machine, getting cramp and zapping away for all you were worth. You can now recline in a sit-down booth and blast away in style.

The controls for Interstellar are a close replica of an aeroplane's joystick with the fire buttons placed directly under the thumbs for easy firing, a lever allowing you to bank your craft completes the controls.

INTERSTELLAR

The sounds of exploding aliens, meteors, enemy space craft and, unfortunately, your own craft, filters into the booth enveloping you.

You dodge a space craft over the amazing landscapes of Interstellar. The scenario is startling and colourful — real-life film overlaid with computer graphics presents a very futuristic effect.

Taking off, you set course and fly over a city that resembles the Manhattan skyline, changing into a desert with sand dunes stretching into the distance as far as the eye can see you are set upon by the enemy.

To get through the game, you'll need a steady hand and a cool head. All your skill is required as you throw your craft through the sky in an effort to dodge meteors and enemy rockets.

Watch out for the tanks — they're equipped with heat seeking missiles and very accurate!

the game warning of an impending attack and which military installations to hit.

All your skills will be called to the fore in some daring low-level flying as you follow the contours of the land towards your next target.

Oil refineries, airports and other strategic bases have to be destroyed, which is no easy task — you'll find yourself under attack from surface to air missiles guaranteed to bring anyone less than a professional down in flames. To survive you can either blast them out of the sky or try to outrun them.

M.A.C.H. 3 is one of the new breed of laser disc games complete with genuine footage superimposed with computer graphics — the film's background was shot by a stuntman in the U.S.

With its great sound, graphics and hard and fast action, M.A.C.H. 3 should appeal to anyone who is a shoot-'em-down addict.

BLASTERMIND!

SPECTRUM 48k £5.50

At first glance this might seem to be just another version of a very popular game. How wrong can you be!!! True, the start is simple enough. The Spectrum picks a code of numbers or colours with a selection of levels of difficulty — and invites you to do the same. You then take it in turns to guess each others code from the clue supplied after each guess. An extremely well written, fast and very clearly displayed game, with almost inevitable defeat.

This was exactly as intended but unfortunately *something went wrong*. During the programming strange uncomplimentary messages began to appear on the screen. At first they were so few they were not taken too seriously, but soon they could no longer be ignored. Somehow the Spectrum had been given a personality — a rather devious, supercilious, dislikeable, hateful, horrible mind.

Side B contains a version of the game compatible with the excellent Currah µSpeech unit — even worse!!

The Quest of Merravid

VIC 20 (16k) £7.95 or Commodore 64 £7.95

A really challenging and enjoyable adventure, written by a confirmed adventure addict who grew tired of the ease with which he solved other adventures himself. Will accept and act on sentences containing up to nine words.

The adventurer becomes Merravid, charged with the task of finding, taking and then returning the magic Firestone of the Dwarves. However, overcoming the many novel and original hazards is no easy matter. Careful and imaginative thought is required if progress is to be made and the Firestone tracked down to the lair of the Dragon of Thargon. Even then the Dragon has to be defeated and the stone retrieved. A compulsive, extremely enjoyable and very user friendly adventure.

COMPUTER MODERATED BOARD GAMES

The original and completely unique two player games of cunning and strategy, strictly for more demanding games enthusiasts.

✱ **CONFLICT** — a full scale military and economic battle demanding clear thought and decisive action.

✱ **GALAXY CONFLICT** — a complex battle for control of the Universe.

WELL, JUST WHAT IS IN THAT LETTER . .

It was one of those nights that make you want to get as close to the fire as you can and enjoy a nice glass of claret and read a good novel. The mist outside was thick and damp as Sherlock Holmes settled into his favourite chair in the comfortable sitting room of his Baker Street apartments.

Dr Watson was out at the opera and Holmes was looking forward to a nice quiet evening alone. But first, thought Holmes, I must just go through that pile of letters on my desk. They might contain some interesting items of news.

Holmes got up and walked over to his elegant antique roll top desk and opened it, withdrawing the pile of letters resting on the top shelf.

He placed the pile of letters on the small table by his armchair and poured himself a liberal glass of claret before settling back into the chair. He opened the top letter on the pile — another bill!

The next one was more interesting. As he read the letter his eyes widened

in amazement at the words it contained. "This is incredible!" he exclaimed, beginning to re-read the letter.

Out in the street the mist began to thicken. The few moving figures in the street, huddled-up against the cold, were reduced to mysterious shadows.

Silently one of these shadows moved toward the brightly lit window of 221B Baker Street and peered inside. Holmes was still deeply engrossed in the letter. The mysterious figure reached inside his coat and moved closer to the window . . .

Well, do you know what was in the mysterious letter that interested Holmes so much? You do! Then why not let us in on the secret. We've got six *C&VG* The Champ shirts waiting for the best six answers to our Holmes riddle. Answers on a postcard only please to Sherlock Holmes Competition, Computer and Video Games, Durrant House, 8 Herbal Hill, London EC1R 5EJ. Closing date is January 16th and the editor's — and Holmes' of course — decision is final.

MORE FREE TAPES . . .

Where were you, Commodore 64 owners in Greater Manchester? We've still got 34 Arcadia 64 game tapes from Imagine software to give away — absolutely free!

All you have to do is rush us the coupon below on a postcard and we'll send YOU a free game.

We've decided to open the contest list to anyone living anywhere in the British Isles this month — so the first 34 requests we get for Arcadia tapes will soon be the happy owners of a brand new game for their machine.

IS YOUR GAME WORTH A MODEM?

Have you got a game program you know will knock the socks off everyone who gets to play it? Or perhaps you've got a half finished listing which is going to be the game of the century once you've got around to completing it? Maybe you've just got a great idea for a game and need a final incentive to sit down at your keyboard and work it out?

Well, here at *Computer and Video Games* we're quite good at providing good incentives, as our previous competition winners will tell you! And this latest idea from the competition department at *C&VG* will no doubt encourage you to get those brains in gear.

We've got together with **Micronet 800**, the new system which brings software to your home via the telephone lines, and put together a package of prizes that will encourage even the most jaded programmer to rush back to his micro and start working!

Here's what we want you to do. Simply look out your best games listing — or get cracking and write a new one. The more original your game is the better — but we're always happy to see a well turned out version of a classic game.

Then, fill in the coupon and mail it with a tape of your game, instructions on how to play it, a listing of your program if you have a printer and, most importantly, your name, address and telephone number.

Then send everything off to *Computer and Video Games* Programming Competition, Micronet 800, 155 Farringdon Road, London EC1R 3AD.

Name .....

Address ..... Telephone .....

Name of game ..... Micro it runs on .....

No of K needed ..... Other equipment (add-ons, joysticks etc)

.....

.....

Any other information .....

.....

.....

The competition is open to Spectrum, BBC, Tandy, Apple and Commodore Pet owners. All these micros are compatible with the Micronet 800 system.

Now for the best part — the prizes! First prize winner will get a Prism Modem 1000, which will link his, or her, micro to the Micronet 800 system, plus a years subscription to Prestel/Micronet 800. The winning program will appear on the Micronet system so the author's name will go up in lights!

Second and third place winners will get a Moden plus games software for their micros from the *Computer and Video Games* vaults. Fifth to eleventh place programmers will get elegant Micronet 800 t-shirts. And all the best programs will go onto the Micronet 800 system, complete with credits for their authors. So everyone's a winner!

Each entrant will receive details of the Micronet 800 system and what it offers the micro owner.

Closing date for the competition is February 16th 1984, and we'll need about a month to sort through your programs. So get cracking over Christmas — and who knows Santa might just find a modem in the bottom of his sack for you!

"Two pints of blue blood and a packet of Krypton crackers, please, Fred".

"Saturday night and they've just got paid".

"The place just isn't the same since E.T. came home".

"If those Earthlings would stop shooting us, and come and join us they'd have so much more fun".

YOU'VE GOT A WAY WITH WORDS

Judging from the flood of suggestions for a caption for our calendar, free inside November's *C&VG*, you all enjoyed Ross Collin's impression of a noisy alien bar room.

We were tickled pink reading some of your witty suggestions and — after much deliberation — have managed to whittle them down to six lucky winners — who will receive *Computer & Video Games'* "The Champ" T-shirts.

Quite a few of you couldn't resist using "two pints of lager and a packet of crisps, please" from the pop record of a couple of years ago — but we decided to award a T-shirt to Matthew Davy of Essex who developed this idea further to read "Two pints of blue blood and a packet of Krypton crackers, please, Fred".

My personal favourite is from John Bennett who has a joke at the expense of *C&VG*'s illustrious editor with "Which one is Terry Pratt" (that's enough of that — ed.).

Alan Hurt made us wonder what a really rough alien pub must be like with "Quiet in here tonight, eh, Burt?".

Brian Dear's entry contains a word of explanation as to the goings-on in the picture with "Saturday night and they've just got paid".

Bryon Stanway was the only person who chose a famous alien from the movies with "The place just isn't the same since E.T. came home".

Andrew Barlow concludes with a thought for the day for video games nuts with "If those Earthlings would stop shooting us, and come and join us they'd have so much more fun".

Well done, everyone — the T-shirts are in the post.

SPOTTING THE DIFFERENCE

We were deluged last month with budding tank commanders who all spotted the differences between the two tanks in our picture.

Sharp eyed winners of a brand new Atari Battlezone cartridge are Baiju Patel of Surrey, Brian Hambley of Prescot, Merseyside, Mr J. W. Falconer of Glenrothes, Darren Jones of Newcastle in Staffs, Debbie Willows of Bath, M. Livings of Portishead, Bristol, D. Moore of Rochester in Kent, Tom Haslam of Leicester, Fraser Watson of Sheffield, and Mr J. P. O'Hanlon of London.

Battlezone is Atari's latest arcade conversion of the hit coin-op game.

The cartridges worth £29.99 each are now in the post to our lucky winners for use on an Atari VCS. Don't forget the biggest and best prizes are in *C&VG* every month.

OVER THE BORDER!

It's a happy Hogmanay to all our Scottish readers as we bring our rolling city competition north of the border.

To win one of Imagine's new games all you have to do is fill in the form below and send it off to us without delay.

As long as your entry bears a Scottish post mark from anywhere in the country you will have a chance of winning a free game.

When we told Imagine that we were going to open the rolling city competition up to the whole of Scotland they generously increased the number of free games from 100 to 200.

The games on offer are Stonkers — a 3D style tank battle for the 48K Spectrum — Alchemist a graphic style adventure in which you are cast as a wizard, also for the 48K Spectrum.

Please state first choice and second choice on your entry form.

The REAL Challenge!

For your ORIC or SPECTRUM

Jogger Guide your joggers across a 4-lane motorway and crocodile infested river to reach their safe haven through the gap in the fence. Each time a jogger is safely home the next one will have to encounter more lorries and cars on the motorway but fewer crocodiles and logs in the river. Full on-screen instructions. M/code. sound effects and full action colour graphics
Oric Author – Adrian Sheppard
Spectrum Author – Mike Howard
Oric 48K – **£6.95** Spectrum 16/48K – **£4.95**.

Dinky Kong Attempt to rescue your lovely girlfriend who is held captive by the angry gorilla. As you climb the connecting ladders and move along the gangways, the gorilla will be throwing barrels and fireballs at you! The only way to reach her is to leap over these obstacles and progress to the top M/code action with sound effects, full colour action graphics, skill levels etc.
Author – Adrian Sheppard.
Oric 48K - **£6.95**

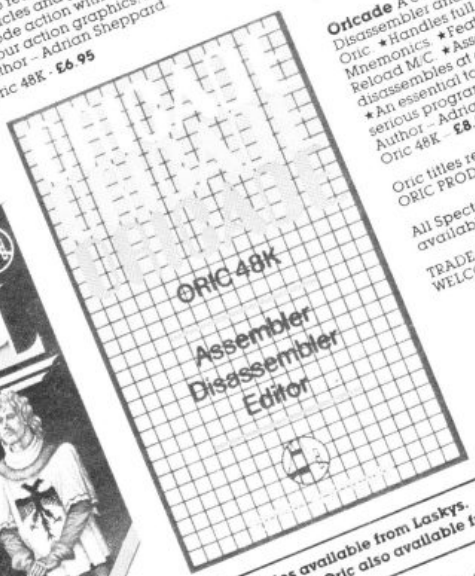
Quincy A superb dice game for 2 to 6 players. 3 throws per go to try and score points by obtaining certain combinations, i.e. 3 of a kind, a run, pairs etc. 13 go's to complete a game. The highest score is the winner! It's a game that is easy to learn but can be won by skilful and thoughtful play. Full colour graphics, on-screen instructions, bonus scores, etc.
Author – Tony Churcher.
Spectrum 48K – **£4.95**.

SEVERN SOFTWARE

SEVERN SOFTWARE
5 SCHOOL CRESCENT
LYDNEY
GLOUCESTER GL15 5TA

Grail You have been chosen to seek and recover the Holy Grail from the Castle Perilous. Throughout the course of your task you will have to use your skill, intelligence and logic (along with a little luck) as you encounter many foes. You will have the opportunity to gather weapons and armour to fight with, but if you are wounded your strength will drain away – many other features such as warp, jewels etc
Author – Adrian Sheppard
Oric 48K – **£6.95**.

Oricade A combined assembler Disassembler and editor for the Oric. ★Handles full 6502 Mnemonics. ★Features Save and Reload M/C. ★Assembles and disassembles at any address. An essential tool for any serious programmer.
Author – Adrian Sheppard.
Oric 48K - **£8.50**.



Oric titles recommended by ORIC PRODUCTS INT. LTD.

All Spectrum Software is available on Micronet 800

TRADE ENQUIRIES WELCOME

Moria A challenging adventure game set in the mines of Moria. You'll have to try and survive encounters with the monsters of middle-earth while trying to locate Durins Ring. The Wizard and the Trader may help or hinder you on your journey to find and open the hidden doors to freedom – a game that will really test your character and staying power.
Oric Author – Adrian Sheppard
Spectrum Author – Mike Howard
Oric 48K – **£6.95** Spectrum 16/48K – **£4.95**.

All Oric titles available from Laskys.
Dinky Kong for Oric also available from WH Smith.

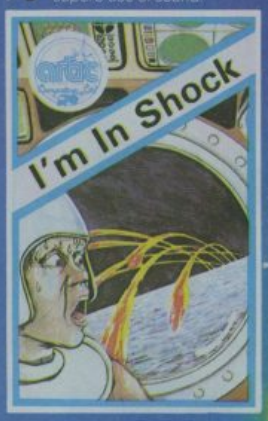
FESTIVAL OF FUN!

1 I'm In Shock

A spaced-out space game, bursting with colour, buzzing with sound and designed to stun your senses. Exciting high speed graphics and superb use of sound.



2 Tank Battle

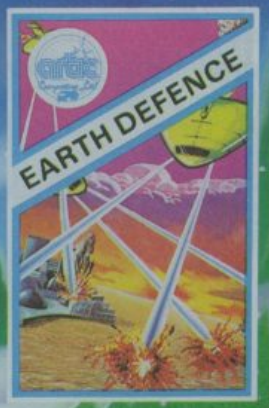
At first, all you can hear is a low, ominous rumbling. Suddenly, you glimpse your first adversary through the remains of the shattered alien city. An exceptional test of nerves and skill for two players.

3 Santa

A space-age compendium of seven original and entertaining games, all with brightly coloured graphics, designed with the young Sinclair user in mind.

4 Earth Defence

Wave after wave of incoming alien missiles, hell bent on the destruction of Earth's major cities, set the chilling scene on this unusually addictive arcade game.



Dear Santa,
please rush me these fabulous Artic games. I have put a tick in the boxes of the games I would like. Thank you.

DEMOLITION

BY MARK WHITE

RUNS ON A SPECTRUM IN 16K

Hi! I'm Derek the demolition expert and this building has got to go! You can help me by finding the ten links which hold up the decrepit frame.

Unfortunately, not everyone wants this building to be knocked down — and there are booby traps to contend with. Weightless fireballs are flying at you from the oil pot and there are mustard and goulash pies on the scene too — what a way to go!

As you toddle along the frame of the building you'll find bits suddenly drop out, leaving you with a gap to jump. You can jump the gaps and the pies and fireballs by pressing the jump key and a movement key to power you in the right direction.

Certain objects are positioned around the building which will earn you bonus points if you managed to pick them up — but there are a few that explode on contact, so beware! Extra fireballs and pies appear after each screen is cleared, and you'll get a bonus man after you've completed four screens.

Controls are:
5-left, 6-down,
7-up,
8-right,
9-jump.

PARATROOPER

Your team of paratroopers is being dropped behind enemy lines from a helicopter. Can you get enough troops down safely to mount an attack? Press any key to make a paratrooper jump from the 'chopper. Then manoeuvre your man using the "greater than" and "less than" keys to avoid the planes, airships, trees and tanks. As the game progresses the airships and other hazards move faster. To make the game more challenging once you've got the hang of it why not make the game harder by increasing the speed of your helicopter or the enemy hazards.

100-220 INSTRUCTIONS
230-330 DEFINE CHARACTERS, COLOURS ETC.
340 DRAW GROUND
350-370 PLACE TANKS
380-400 PLACE PLANES

TOMB
SWEET
TOMB

Once you've got to grips with the Rock 'n' Roll game, flip-over and get your teeth into Dracula.

New K-tel Doublesiders are great fun and great value which ever way round you look at them.

For only £6.95 you don't just get one top quality computer game, you get two.

When you've finished playing one side simply flip it over (just like a music cassette) and move off on a second totally different, equally gripping game.

Take your choice. Already there are five Doublesiders to choose

1 **It's Only Rock 'n' Roll** Can you become a superstar? A Rock 'n' Roll idol...Or are you just another has been?
You've got a lot of energy, a bit of money and a great future. But can you stay the course, stand the heartbreaking disappointments, fraud, scandal, even arrest? Can you capture the hearts and wallets of the public and become a Rock 'n' Roll idol?

2 **Tomb Of Dracula** Darkness is falling...The vampires are hungry...You can't go back...Your only chance of survival lies ahead.
The walls are cold and clammy. With each step you remember the horrors ahead; ghouls, zombies and pits of choking slime. In your hand you have but seven silver stakes with which to defend yourself...Dare you face the ultimate evil...and win.

from — three suitable for the ZX Spectrum and two for the Commodore Vic 20 — and there are more to come.

So hurry to the shops now and see for yourself how K-tel Doublesiders really do give you twice the fun with two on one.

K-TEL DOUBLESIDERS

Only £6.95. EACH

Twice the fun with two on one.

CRASH LANDING

"Captain! All engines are failing. We're losing altitude. We won't make it to the airfield! And we're over the city! What are we going to do!"

"Don't panic son. We've got a bomb bay full of missiles and I can fly this baby over a derelict area. We'll bomb our own airstrip!"

Can you help the intrepid skipper of this crippled skyship clear a space big enough to land on? If you manage to land the game will start again — but much faster. If you manage to land four times then you're a sky-riding superstar!

Although your aircraft is rapidly losing height the skipper is able to fire up the engines three times during a game which moves the 'plane up one line. These "jumps" are best used in emergencies!

Program notes
Line 100: initialise and display instructions.
110-130: change display list and set up a display list interrupt.
140: set game variables.
150-250: main program loop.
260-290: bomb dropped routines.
300-410: explode plane and restart game.
420-490: display routine if you manage to land four times!
500-630: redefine character set.
640-750: draw screen.
760: successful landing sound.
770-920: instructions.

THE FABULOUS WANDA AND THE SECRET OF LIFE THE UNIVERSE AND EVERYTHING
for COMMODORE 64

An adult fantasy game with Arcade Action

You are travelling far from home looking for good times around the Universe, when you are intercepted by the evil Brutus of the Federation. Brutus forces you to go and seek the Secret of Life, the Universe and Everything - known only to the Fabulous Wanda, a hostess in the Spaced-Out Inn in Highsville on the planet COPUS. You are teleported down to Highsville where the Customs man demands money for Teleport Tax. There is a video game in the Terminal with 3 credits left.
Now you are on your own and you must decide how to proceed to Highsville Mainstreet to find the various establishments to enter and .....

OGLES **for BBC/B**
Designed with people of all ages in mind this programme provides an aid to learn and match colours as well as being very entertaining. Not only have colours to be matched in sequence but co-ordination skills can be developed by moving the correct coloured OGLE to match a pattern displayed on the screen. Interest and amusement are provided by you as Gordon having to control your pet dog Flash by guiding him to collect the matching OGLE, carry it back and to drop it at the correct position.
There are two levels of play.
An easy level for the younger person.
A professional level for the older person with play against the clock and Hall of Fame.
OGLE COMPETITIONS ARE FUN! **£8.95**

NEW RELEASE
AAARGH! CONDOR
for Commodore 64
100% fast action m/c. Avoid the obstacles and hazards to climb the mountain to reach the spear. Then slay the condor before it carries your bird off!

£7.95

BARRELDROP! ***for 48K SPECTRUM***
Poor Gordon! His drainpipes are blocked again and the only way to clear them is to drop barrels down them. Gordon stands on the top of his roof with 5 barrels. When the game starts he'll roll one down the roof. Press ***SPACE*** to drop it through the roof accurately into the centre of a drainpipe and you'll score the number of points in the pipe, which will start to flash, and Gordon will get the barrel back for another go. The barrel will be lost if the drop is inaccurate, or into a pipe already filled, but - Flash the dog is on hand! If you know you're going to lose the barrel and you can see Flash peeping out from the bottom-right corner, press ***D*** and Flash will save it! Once you clean all 5 pipes, you will get a bonus, but there's a surprise in store before you get the next set of pipes to fill .....
£5.95

SUPERSNAILS **for 16K or 48K SPECTRUM**
Snails specially imported from West Africa are being kept in Dr. Van Winklehoff's laboratory for genetic experiments. The Doctor has turned them into a super-breed of snail who now leave behind a trail of super glue that will trap any snail touching it. Two of the snails, continually moving and controlled by the players, escape from their pens into the laboratory. Unfortunately, only one of the snails can escape from here into the outside world without raising the alarm. You must therefore trap your opponent and then try to escape through the small door which will then appear.
Features:
* Fast Action - 100% Machine Code
* Nine levels of difficulty
* Keyboard or Joystick Control

£5.95

£7.95

EGBERT
for COMMODORE 64
A fast Arcade Action Game for all the family to play.
Written in 100% Machine Code for super-fast action!
Egbert works on the production line at 'LEYSPACE'. It was a comfortable life until the invasion of the TEBBITES from the planet TOR. Egbert's union has been exterminated and the Tebbites have left their deadly Pets running wild in the workplace. As if that wasn't enough, the evil invaders have forced Egbert to take care of an Egg - damaging the Egg will have fatal consequences for poor Egbert. Egbert is now on piecework - can he earn a decent wage? Can he even survive? **WARNING!** You may get an ulcer by playing this game.

SIX LEVELS OF SKILL. ***ANYBODY WHO CAN DO LEVEL 6 SHOULD WRITE AND LET US KNOW!***

ARITHMETIC FUN-TIME **for TI99**
Elementary addition, subtraction, multiplication and division exercises providng valuable practice and drill for young children who are developing their basic mathematical skills.
Uses colour graphics and sounds to give a good presentation with the sums appearing in large letters on a blackboard.
The Computer plays back sums which the child has difficulty with showing the child the correct solutions. Uses the basic TI99 console. **£5.95**

ROAD RUNNER

BY PHILIP OLIVER

RUNS ON A DRAGON 32

Vroooom, vroooom! Rev-up for a fast and furious race track challenge in your turbo-charged Dragon Special. Streak down the road, overtaking all the opposition. How far can you get without crashing?

This game has a couple of options for the player. You choose the number of lives you have and the speed. All that and a hi-score feature too! Will you score the fastest lap — step on the gas and find out!

"YOU REALLY DO LIVE UP TO YOUR BOAST OF SAME-DAY DESPATCH"

(W. A. HACKETT, Harborne)

SOFTWARE SUPERMARKET

At Software Supermarket, we play all the programs we can get for the Spectrum and BBC micro and put just the best of each type into our ads and catalogues. We don't have the biggest list of Spectrum and BBC programs, just the best - from many different program companies, large and small, famous and just-about-to-be-famous. We produce no programs ourselves, so our choice is completely impartial.

We quote reviews from all the magazines to help you decide and, of course, we tell you if your joystick will work! We choose the best programs - which saves you money. And we send them fast - which saves you time hunting round the shops. From over 40 countries you write praising our same-day despatch. But mail order or phone credit card orders only please.

You can now phone VISA or ACCESS credit card orders to us at any time, from anywhere in the world. (ACCESS includes Eurocard and MasterCard.)

32K BBC ONLY

DOGFIGHT *"The most original and entertaining program I have seen for a long time... the graphics and sound effects are excellent." (HomeCompWkly) "An impressive choice of options and difficulty levels." (AcornUser)* World War 1 air battle. Choose your planes and fight your friends(?) to the death. 8 difficulty levels: amazing options. Get it for the graphics and music: play it for the sheer skill! Raves everywhere. Joysticks O.K. (Opus) 32K BBC: £9.95.

TRENCH Probably the least exciting name we've heard for one of the most exciting games we've played. Remember the end of 'RETURN OF THE JEDI'? Well, how about flying your Beeb/X-Wing Fighter down the 3D Trench towards the Death Star-style target, dodging the tie-fighters as they attack. 9 skill levels: sensational graphics. Joysticks O.K. (Clares, too) (Virgin) 32K BBC: £7.95.

ROADRUNNER *The graphics are excellent and sound is used effectively... I enjoyed the game very much." (HomeCompWkly)* Race around a racetrack instead of the Galaxy! Very superior graphics and amazing sound. Avoid the cars and obstacles and collect points for checkpoints. 6 skill levels: bonuses: Hall of Fame with name: very catching. (Superior) 32K BBC: £7.95.

747 FLIGHT SIMULATOR *"The best flight simulator around that runs on the Beeb... a must for all budding pilots." (PersCompNews)* By Captain Roger Selby of British Airways. You're in charge of a 747 which you may choose to land at either Heathrow or Gatwick. 11 control keys: clear instrument display: good runway view as you approach. 8-page on-screen flight briefing. The crashes are very realistic! No joysticks. (Dr Soft) 32K BBC: £8.95.

48K SPECTRUM ONLY

GROUCHO Find the Hidden Star - and win a trip to Hollywood! A mad adventure with lots of good tunes and great cartoon-type animation. Follow Groucho and the Piman around the USA. Discover the 22 clues, name the Hidden Star, and win the Trip. (Closes 1/6/84) A brilliant follow-up to PIMANIA. No joysticks. (Automata) 48K SPECTRUM: £10.00.

GAMES DESIGNER No expert programming knowledge needed to create your own SPRITE-BASED MACHINE-CODE ARCADE GAMES with this program. EIGHT DEMO GAMES included: 4 written by amateurs! Clear 20-page manual. Design your own aliens, backgrounds, sound, quickly, easily - then save the joystick-option games you've made! (Quicksilva) 48K SPECTRUM £14.95.

MANIC MINER *"Certainly the best arcade game around for the Spectrum." (PopCompWkly)* Based on the USA arcade chart-topper 'MINER 2049er'. Superb graphics and sound as you search through 20 screens - each one a different arcade game. 20 screen demo mode: good jokes. Kempston joysticks. (Bug-Byte) 48K SPECTRUM: £5.95.

HALLS OF THE THINGS *For me this is THE game of '83 hours and hours of sheer pleasure." (ZX Comp)* Explore an 8-storey maze, find treasure, avoid nasties. BUT this time you can see exactly where you are and what you're doing: the maze scrolls as fast as you can move. Brilliant graphics (try waving your sword about!) and 19 command keys. No joysticks. (Crystal) 48K SPECTRUM: £7.50.

GO TO JAIL *"Excellent graphics are used to make a very impressive display indeed...highly recommended." (ZX Comp)* The best computer version of the famous game we've ever seen. From 2 to 5 players (including the Spectrum at last!) Every original feature is faithfully reproduced and the screen display is miraculous. No joysticks. (Automata) 48K SPECTRUM: £6.00.

E.T.X. *"Must be at the limit of the Spectrum's capabilities...must rank among the Spectrum classics" (HomeCompWkly)* Enchanting graphic adventure 16 full-screen scenes: 1400 power power zones! 4 skill levels: and, in 48K, E.T.X. speaks to you as well! KEMPSTON, JAGF, QUICKSHOT Joysticks. (Abbex) 16/48K SPECTRUM: £5.95.

32K BBC/48K SPECTRUM ONLY

THE HOBBIT *"Superior to any other game available (Yr Comp) "Takes first place...for quality and value for money." (S. User)* The adventure that made 1983 famous is now alsoavailable for the 32K BBC. Free 285-page illustrated book with clues to this unique real-time adventure. 80 locations: massive vocabulary: 16-page manual: it took 4 people 18 months to write! No joysticks. (Melbourne) 32K BBC/48K SPECTRUM: £14.95.

JOHNNY REB A new full-screen graphic battle game. NOT an arcade or adventure game. You fight out a struggle for a river crossing during the American Civil War. 1 or 2 players. Choose your side, equip your army and fight the battle: great battlefield display. Fight to the death or within time limits as you wish. No joysticks. (Lothlorien) 32K BBC: £6.95 48K SPECTRUM £5.50.

3D DEEP SPACE **WITH FREE 3D GLASSES!** *"Not just a game with a new gimmick, it's also a classic game in its own right." (Comp&VidGames)* The first ever true 3D program. To destroy the enemy, you must move IN and OUT as well as normal 2D moves! No joysticks. (Postern) 33K BBC/48K SPECTRUM: £7.95.

DICTATOR *One of the most original games I have seen...an excellent game not exhausted by even dozens of plays." (PopCompWkly)* As a banana republic President, you aim to rule as long as you can, while filling your Swiss bank account. Play off the Great Powers as they threaten to Aid you! Escape assasination (it's very noisy.) No joysticks. (dk'tronics) 32K BBC/48K SPECTRUM: £6.95.

Illustration: Terry Rogers

Defend your garden from the creepy Crawler! This nasty insect has invaded your vegetable patch and has only one aim in life — to eat everything it sees! The Crawler moves down the screen at you — while you blast away at it with deadly slug pellets! If the Crawler hits a mushroom or reaches the side of the screen, it reverses direction and moves down a line. If it eats an apple its length increases by one segment.

Your aim is to stop it reaching the bottom of the screen. If it manages this twice you'll lose one of three lives. You'll also lose a life if the Crawler hits you with one of the deadly insect bombs it drops. Just another hazard to contend with! In order to finish off the Crawler completely you have to hit its head with one of your pellets. Hitting the body simply scores points. You can also score points by hitting the mushrooms and apples. But beware, the mushrooms split into three when hit, so you'll have to be careful not to give the Crawler an easy path to the bottom of the screen. You'll get bonus points if you hit the Crawler's head.

If you reach 1,000 points the Crawler starts to get a bit wiser. It can detect your position and drops bombs with alarming accuracy. If you pass 3,000 points the bombs might just start chasing you! You'll have to chase them down before they hit you. You get an extra life for every 20,000 points.

There is a top ten feature built into this game — but you'll have to get over 10,000 to get into it. Mark says his own top score is around the 50,000 mark — can you beat him?

RUNS ON A BBC B IN 32K

AND NOW FROM LOTHLORIEN

ACTIONMASTER

Get some real action out of your computer this Christmas with ACTIONMASTER, a new range of superior arcade games from Lothlorien – the people who brought you ROMAN EMPIRE, JOHNNY REB and other famous WARMASTER titles.

Look out for the ACTIONMASTER green striped cassettes at leading software specialists, or buy direct by post at no extra cost. Send the coupon TODAY to ensure delivery before Christmas

NEW **MICROMOUSE.** At last educational arcade action! Fight off the software bugs and help Micromouse de-bug his programs. Datakill available. Fight through the levels to the highest score.

BEDLAM. An asteroid explosion has catapulted you to the asylum planet BOVRYLL where you are under attack from waves of loathsome creatures – each more vicious than the last. Your only hope of survival is to kill each wave with a twin-firing photon bolt, but just when you think you're winning you encounter the sorcerous guards. Can you kill ten to win another life?

BEETLEMANIA. Trapped in a maze with four giant green beetles you are desperate to get out. You can find a way but the lock can only be opened with four giant beetle eggs. Naturally the beetles go berserk when their eggs are stolen. Higher levels offer more complex mazes and fast-moving spiders.

TWO-GUN TURTLE. In the middle of winter a turtle is defending his strawberry patch against a variety of marauding bugs... some go for strawberries, some go for you... some don't go for anything unless they're accidentally attacked. But remember this is winter and you never know when it might snow!

ALL ACTIONMASTER games are 100% machine code and are available for any Spectrum unless otherwise stated.

NEW ADVENTUREMASTER SERIES. First title—The Stolen Lamp BBC-B

WARMASTER SERIES

THE WINNING NAME IN WAR GAMES

3 NEW STRATEGY GAMES FROM THE FAMOUS WARMASTER SERIES

Johnny Reb (1861)

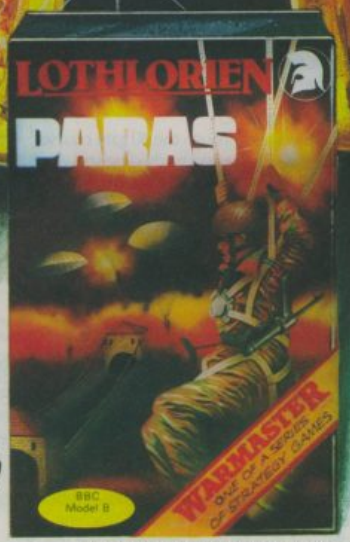
There's still plenty of fight left in the Confederate South as each side selects forces to manoeuvre on a full-graphics battle field. Use the 'save game' facility to perfect your tactics and re-write American History. 1 or 2 players.

PARAS (1944)

Dramatic all-graphics reconstruction of a famous World War II Campaign. Your hand-picked force has dropped behind enemy lines to capture a strategic river crossing. 2 versions of the game with ten levels of play.

REDWEED (1995)

The Martians are coming in this superb all-graphics battle. You're in command of land forces defending London when an outbreak of semi-sentient Redweed threatens to immobilize your forces. Fifteen levels of play.



Spectrum 48K £5.50. BBC-B £6.95 and Oric 48K £6.95

Two new two-player titles.

DREADNOUGHTS Suspense-filled high seas drama as the pride of the German Grand Fleet is locked in battle with the Royal Navy. Secret orders, battle graphics, torpedoes, guns etc.

CONFRONTATION Build-on battle game gives a basic format for any modern, non-nuclear conflict. Master tape contains modern European scenario and you can create others of your choice using both air and land forces.

ORDER NOW FOR CHRISTMAS

BBC-B £6.95. New-Spectrum 48K £5.95.

Spectrum 48K £5.50.

More superb strategy games.

MORE GOODIES FOR THE BBC MICROCOMPUTER FROM RH ELECTRONICS

The RH lightpen is compact, little bigger than a felt-tip. It is versatile, with a sophisticated microswitch at its point which responds to the slightest pressure, and an LED lamp at the user's end to indicate data transmission. Both microswitch and LED are fully programmable.

The RH lightpen is reliable, with a rugged metal case to provide physical and electronic protection. Its sensitivity can be adjusted to the thickness and type of your TV screen, giving the highest levels of accuracy.

With the lightpen connected to your BBC Micro you can draw lines on the screen, or give commands simply by pointing to a menu.

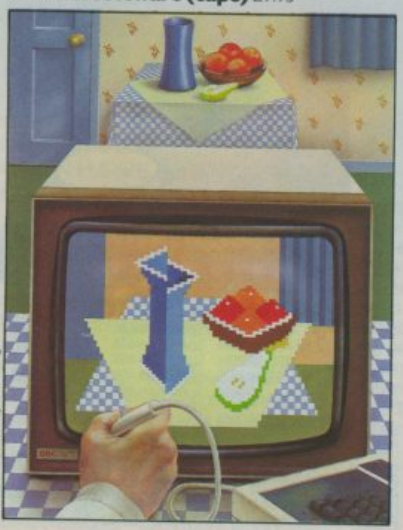
Colour-graphic software

This additional software is available so that all the colours of the BBC Micro's palette are available at the tip of your pen. Complex graphics can be created in minutes.

Art-fun software

This program is guaranteed to bring out the artist in you. It provides inspiration for users of the lightpen and provides full interaction between pen and screen.

Lightpen £45.95 *Approved by Acorn*
40 track disc version of lightpen software £5.95
Colour-graphic software (tape) £9.95
Art-fun software (tape) £9.95



Optimus Graphic Design, Cambridge

RH Electronics has a whole series of excellent software for the BBC Microcomputer Model B. For games, business and education, they will be highly valued by any BBC Micro owner.

Plegaron People Eaters £8.95
Stop the Plegarons' path of destruction by walling them in. A game of skill (nine levels) and cunning.

Galactic Wipeout £8.95
Fight off alien attackers and meteor showers as you transport the survivors of the human race to a new planet.

Ski Slalom £8.95
Guide the skier through the 40 gate course avoiding deadly ice and landsliding snowballs.

Viper £8.95
Guide the snake around its electric cage devouring as much food as you can. Avoid touching the electrified walls, swallowing unsavoury food or causing the snake to eat its own tail.

3 in 1 (A) £7.50
This set of three games for the younger enthusiast includes: Task Force – a strategic battle of sea and air; Demolish – blast your way to freedom avoiding radioactive fall-out and falling masonry as you go; Cosmos – where you have to defend the earth from an invading battle fleet.

Ed-master £12.95
This program uses the quiz format combining the element of fun with educational teaching. 160 questions may be programmed by the teacher, divided into eight subject areas of 20 questions each. Questions and answers can be changed as often as you wish. The computer will tell the pupil whether he or she has the correct answer or not, but cheating is prevented as pupils cannot access the program to find out the correct answers. The scores of up to 40 pupils are stored in the quiz memory and are easily recalled for comparison.

Snail Trail £4.95
Help the snail escape from the maze he's fallen into before he starves to death. There are two skill levels to this cassette.

Database £12.95
A disk for the business or home. It enables you to file, sort and access a great number of items such as diary entries, addresses, telephone numbers, accounts or other information.

SOFTEK

MASTERS OF THE GAME

MICROBOT
As a microscopic robot transported by energisers inside of a mentally unstable robot's head, you must de-bug its brain! The most amazing, super smooth, flicker-free high-resolution graphics for the ZX Spectrum. This 'arcade simulation' original game is a must for your collection! £5.95, 48K Spectrum. Joystick compatible to Kempston, Sinclair, Protek, A&F etc.

UGH!
The ice age has come and Ugh must collect food. But stealing Pterry the Pterrodactyl's eggs may not have been the best idea! This has to be the best graphics/animation ever on the Dragon 32....and now Ugh is available on the CBM64 too! A Smash Hit! £6.95, Dragon 32 & Tandy Colour 32K. £7.95, CBM64. Joystick compatible.

DRACULA'S REVENGE
Sanctify Dracula's castles by doing battle with Werewolves, Ghosts and Vampires! Amazing Hi-Res graphic animation and movement. £6.95, 48K Oric 1.

SUPER METEORS
The best ever version of this game for a home micro! £6.95, 48K Oric 1.

ZOIDS
The most amazing new game for the CBM64. Well, what else would you call a space shoot-em-up game created in the 18th Century by a distant cousin of J.S.Bach?! £7.95 Cassette. Write for Disc version.

ICE GIANT
The wizard has set an eternal winter on the land, and sent forth his Ice Giants to crush your fortress. But you, flying your eagle-mount, armed with your maser will melt them into non-existence. But did you foresee the magical Elementals? Superb graphic animation make this the best ever Oric game. £6.95, 48K Oric 1.

GALAXIANS
Full feature version of the classic game that'll never be beat! £6.95, 48K Oric 1.

ACHERON'S RAGE
The most original shoot-em-up game for the Oric 1. 9 waves of aliens! £6.95, 48K Oric 1.

QUITE INTERESTING FACT

YOUR FREE PULL OUT SOFTEK CALENDAR

It is a little known & quite interesting fact that a page or two back in this magazine is the fantastic SOFTEK 2384 A.D. PULL OUT CALENDAR

There is a Softek accolade for the first person to remove their Softek Calendar without removing the insert.

OOPS!

The Time Lords were up to their tricks in last month's issue of this magazine. We sent our printers forward in time to check out the dates & discovered the calendar printed in December's issue of Computer & Video Games was wrong!!

If you're a Wally you've got last months issue of this Calendar on your wall...
BUT YOU ARE NOT A WALLY.....ARE YOU?

SOFTEK

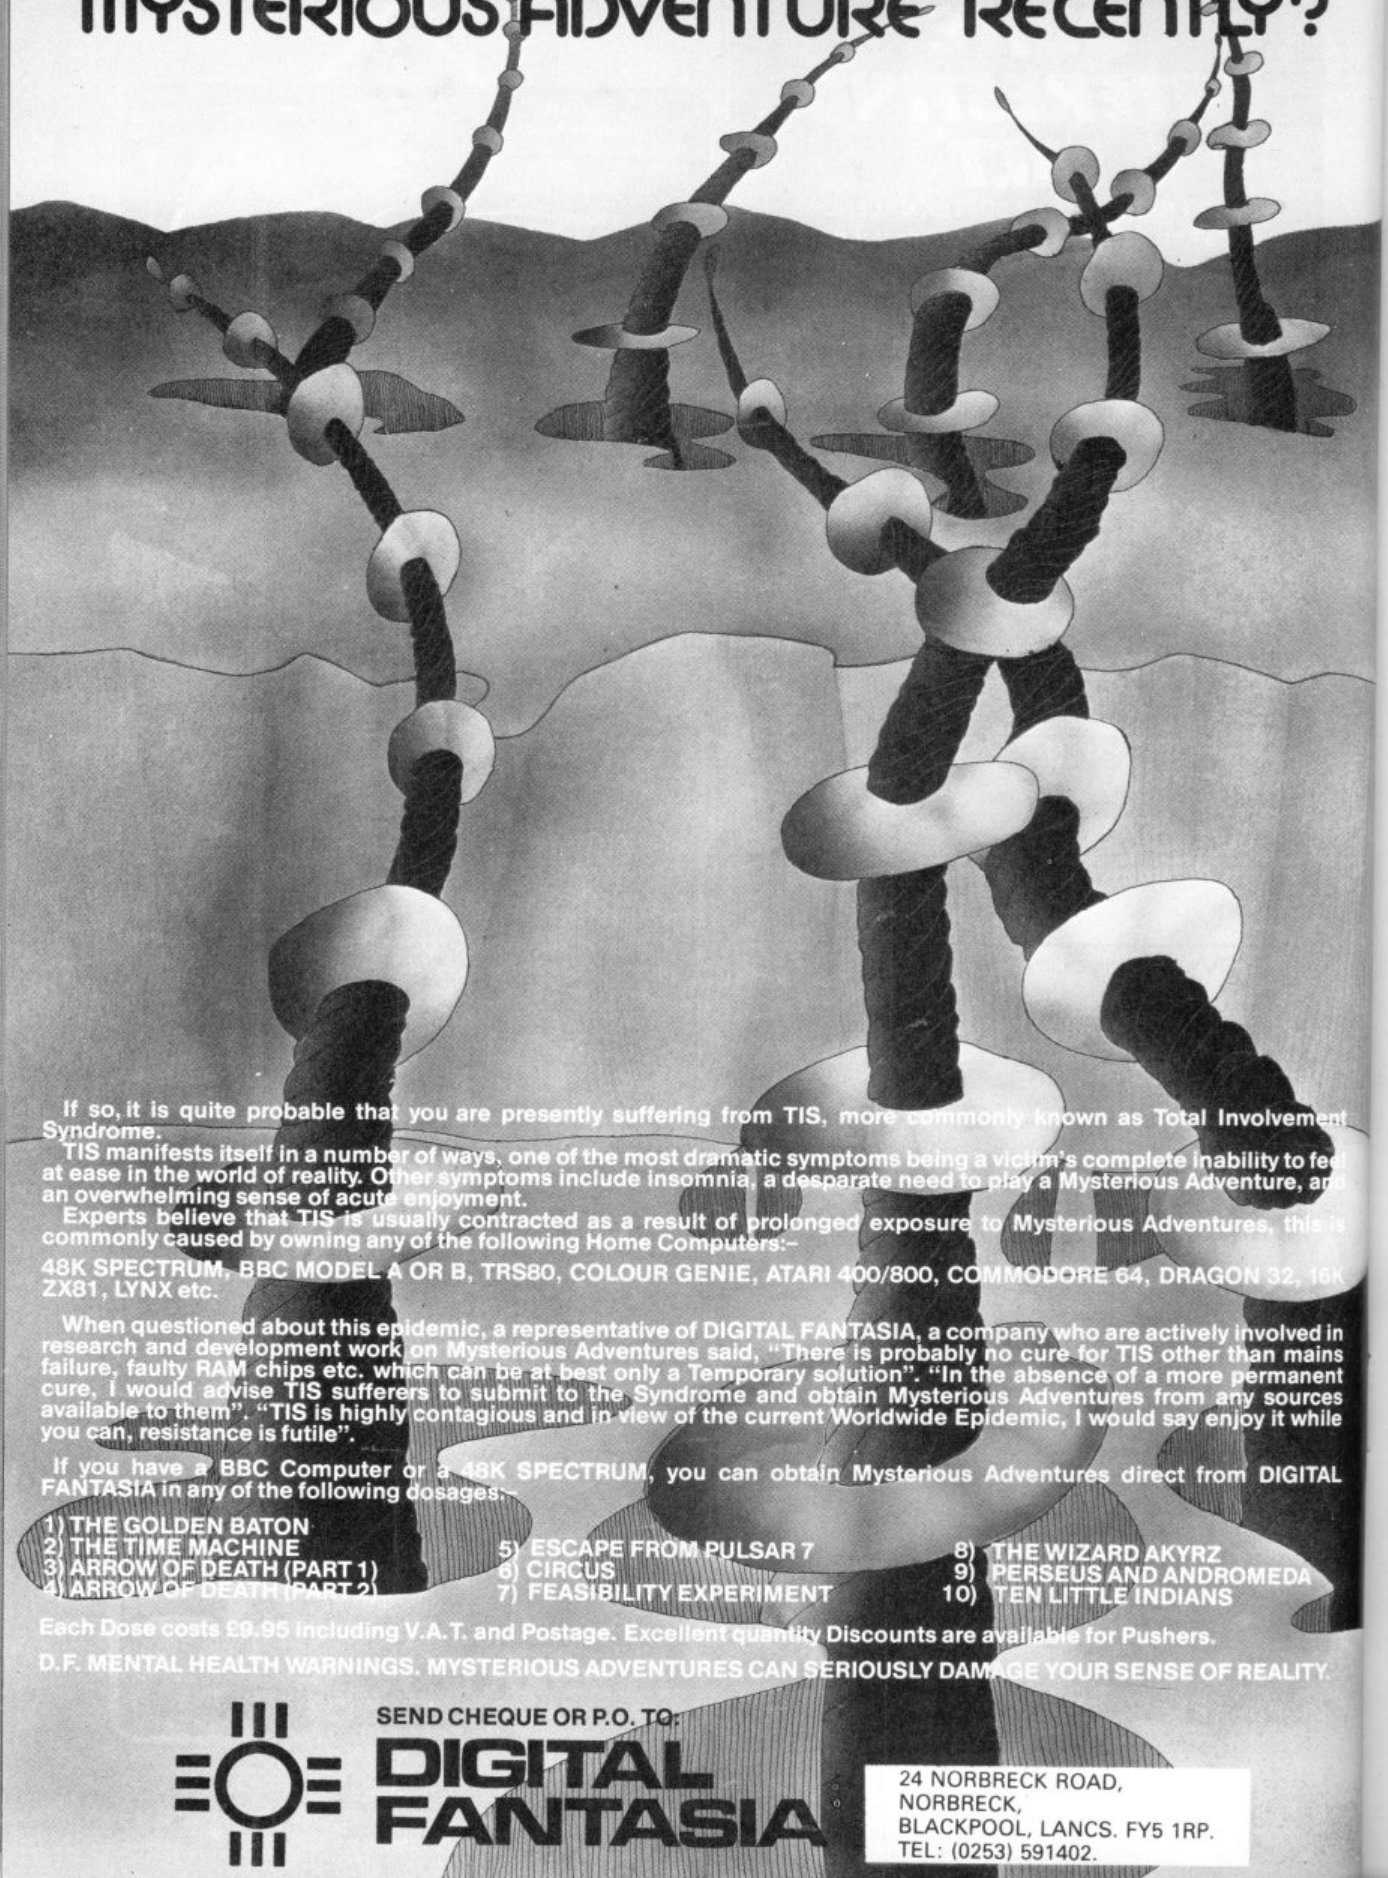
HAVE YOU BEEN INVOLVED IN A MYSTERIOUS ADVENTURE RECENTLY?



If so, it is quite probable that you are presently suffering from TIS, more commonly known as Total Involvement Syndrome.

TIS manifests itself in a number of ways, one of the most dramatic symptoms being a victim's complete inability to feel at ease in the world of reality. Other symptoms include insomnia, a desparate need to play a Mysterious Adventure, and an overwhelming sense of acute enjoyment.

Experts believe that TIS is usually contracted as a result of prolonged exposure to Mysterious Adventures, this is commonly caused by owning any of the following Home Computers:-

48K SPECTRUM, BBC MODEL A OR B, TRS80, COLOUR GENIE, ATARI 400/800, COMMODORE 64, DRAGON 32, 16K ZX81, LYNX etc.

When questioned about this epidemic, a representative of DIGITAL FANTASIA, a company who are actively involved in research and development work on Mysterious Adventures said, "There is probably no cure for TIS other than mains failure, faulty RAM chips etc. which can be at best only a Temporary solution". "In the absence of a more permanent cure, I would advise TIS sufferers to submit to the Syndrome and obtain Mysterious Adventures from any sources available to them". "TIS is highly contagious and in view of the current Worldwide Epidemic, I would say enjoy it while you can, resistance is futile".

If you have a BBC Computer or a 48K SPECTRUM, you can obtain Mysterious Adventures direct from DIGITAL FANTASIA in any of the following dosages:-

1) THE GOLDEN BATON
2) THE TIME MACHINE
3) ARROW OF DEATH (PART 1)
4) ARROW OF DEATH (PART 2)
5) ESCAPE FROM PULSAR 7
6) CIRCUS
7) FEASIBILITY EXPERIMENT
8) THE WIZARD AKYRZ
9) PERSEUS AND ANDROMEDA
10) TEN LITTLE INDIANS

Each Dose costs £9.95 including V.A.T. and Postage. Excellent quantity Discounts are available for Pushers.

D.F. MENTAL HEALTH WARNINGS. MYSTERIOUS ADVENTURES CAN SERIOUSLY DAMAGE YOUR SENSE OF REALITY.

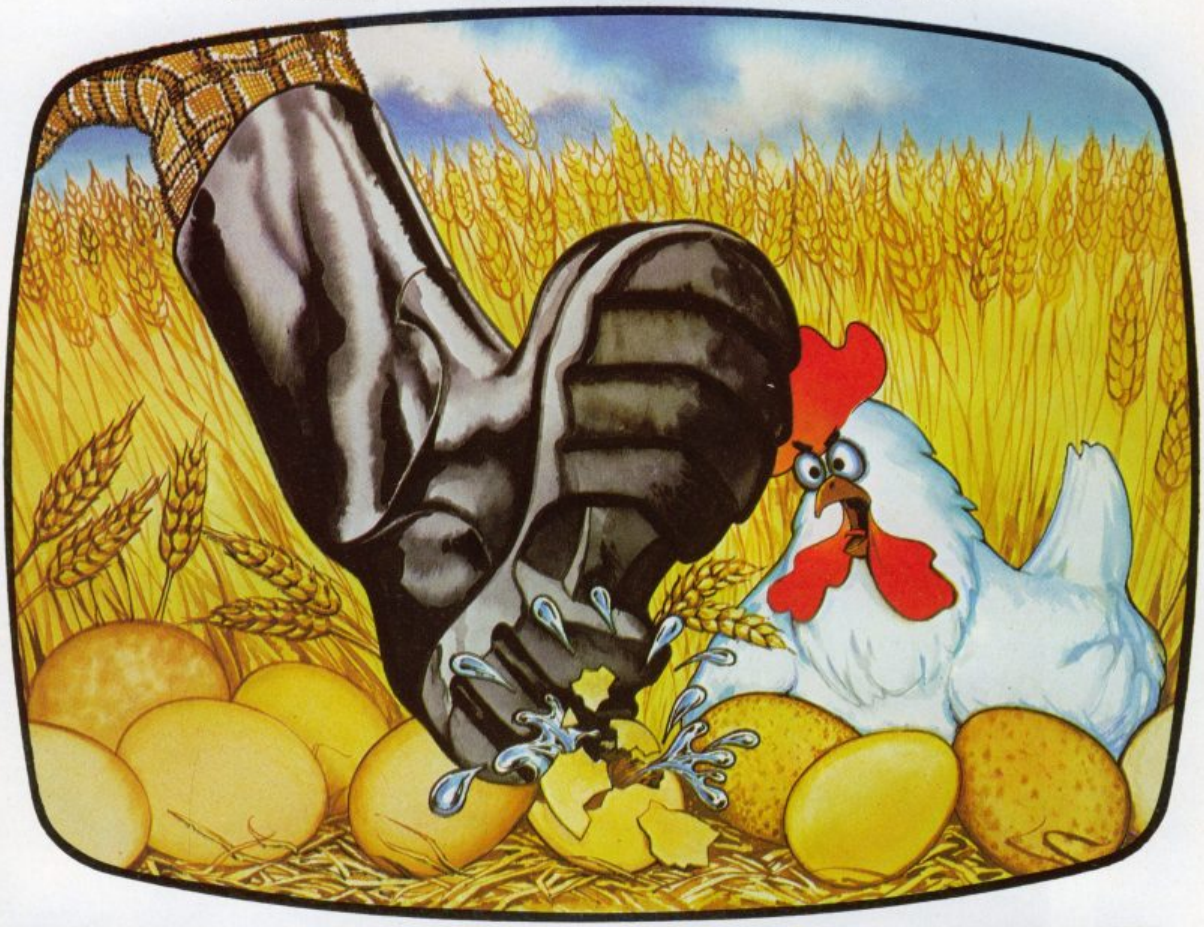
THERE'S TROUBLE AT T'FARM!



DASHING DOUGGIE™ £6.90 ARCADE STYLE GAME
Supersonic Dashing Douggie orbits the world delivering liquid nourishment. He must be quick to stop it getting cold.

CRAZY BALLOONS £5.75 ARCADE STYLE GAME It's a great balloon but ice crystal clouds are the menace. Narrow passages and high winds too before home base safety!

JUNGLE FEVER £6.90 (Ramwise TM) ARCADE STYLE GAME It's got everyting, with an exotic horror array of nasty natives, man-eating spiders and crocodiles.

KAMAKAZI £5.75 ARCADE STYLE GAME Based on the very successful BBC 'Planes' game, dive bombing Kamakazies fly down to destroy your base. Fast and slow options. Dexterity is the key to survival.

DEADLY Chuckie egg! ™

A FARMYARD ARCADE STYLE GAME!

You have to collect 12 eggs and corn to finish the screen—but there are up to 4 nasty ducklings chasing you as you try to escape up the ladders. You can jump onto the moving lifts but make sure you get off before you smash your head against the roof.

The ducklings are on a fixed path but if you're good enought to reach frame 9, mother duck escapes from her golden cage and can move anywhere on the screen.

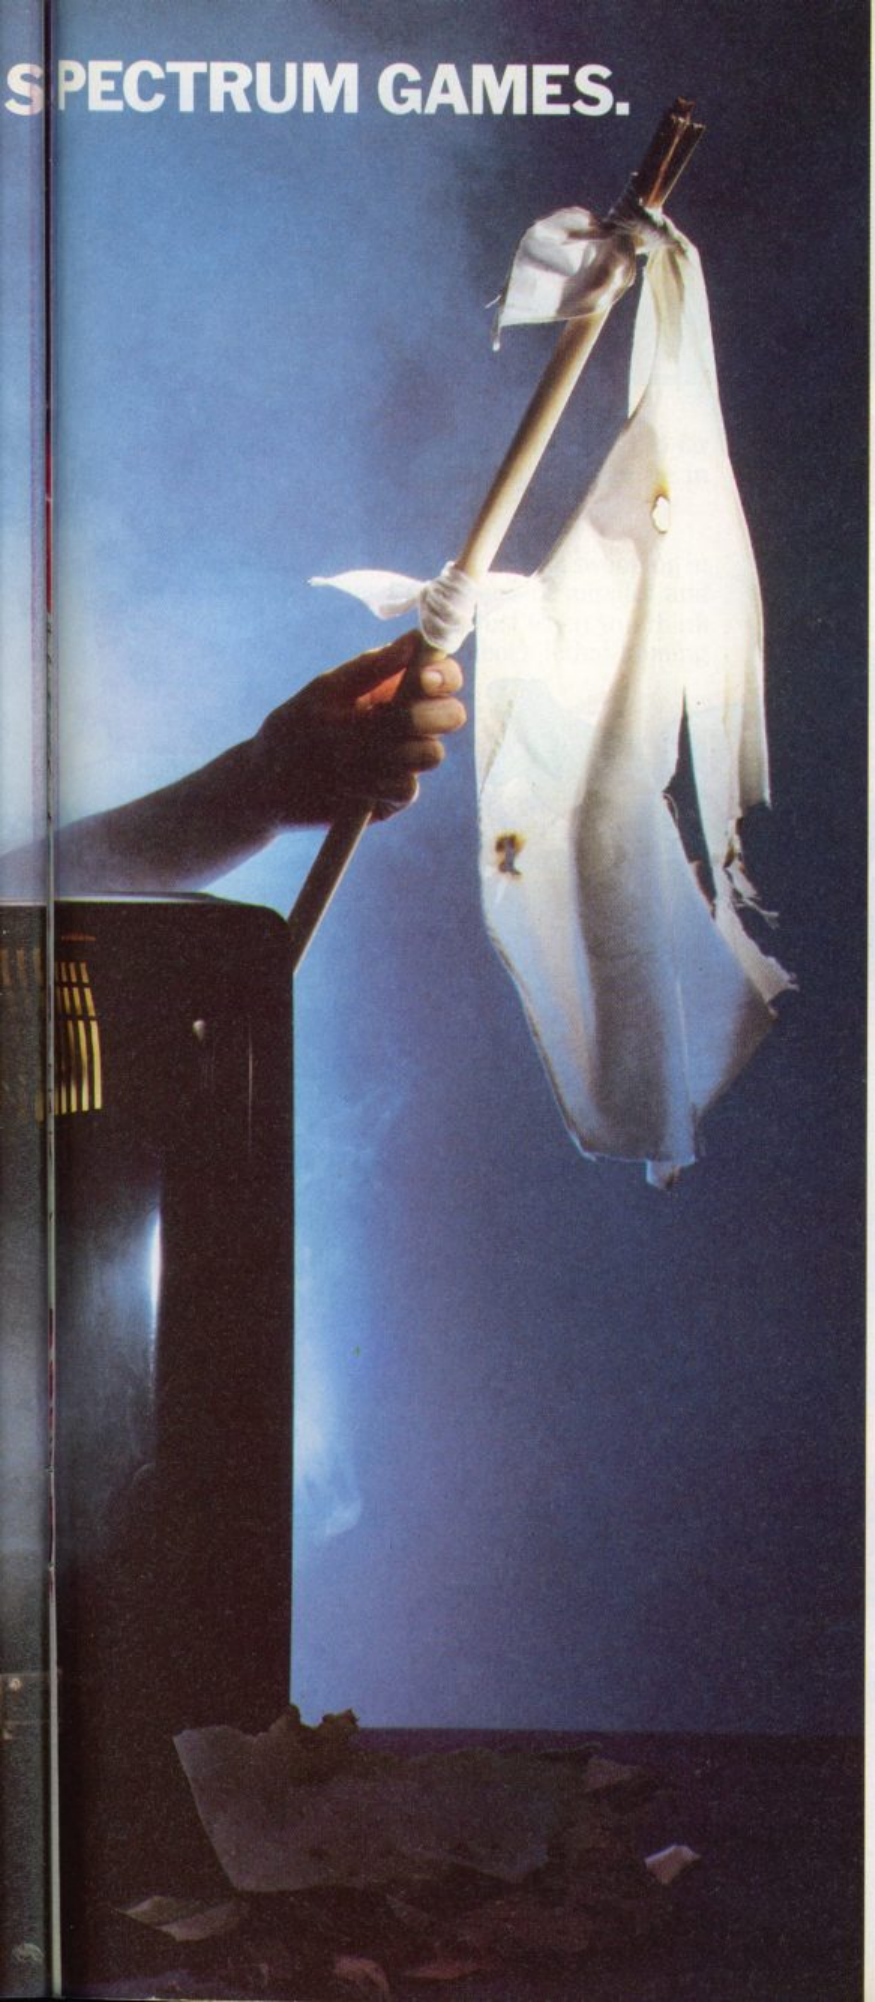
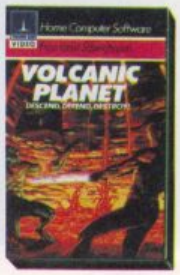
YOU CAN'T BEAT THORN EMI'S NEW

SPECTRUM GAMES.



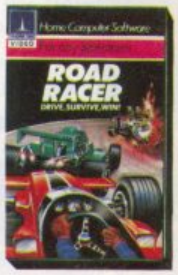
Our new Spectrum games have two skill levels. Difficult and impossible.



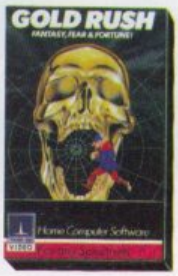
Unless you happen to be a genius, it could take forever to master them all.

So for around £6.95, you will really be getting your money's worth.

"Volcanic Planet" (on 16k) is a real scorcher. Plant a bomb on the volcanic plug in the evil Zeron underground Metropolis, and escape before red hot lava floods the city. Watch out for the Zeron's bone crushing slaves, they want to tear you apart. If your oxygen or power supplies run out, you're dead.



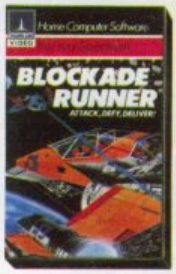
In "Road Racer" (on 16k) you'll find out if you're skilful enough to drive round a terrifying track at death defying speeds, and reach the black and white flag in one piece.



"Gold Rush" (on 16k) is no walk-over either. Underneath the eerie planet of Oron is a vast cavern full of gold and demons.

You have to get the gold and the deadly demons have to get you.

In "Blockade Runner" (on 16k) the earth is under siege and you must get life-saving supplies through.



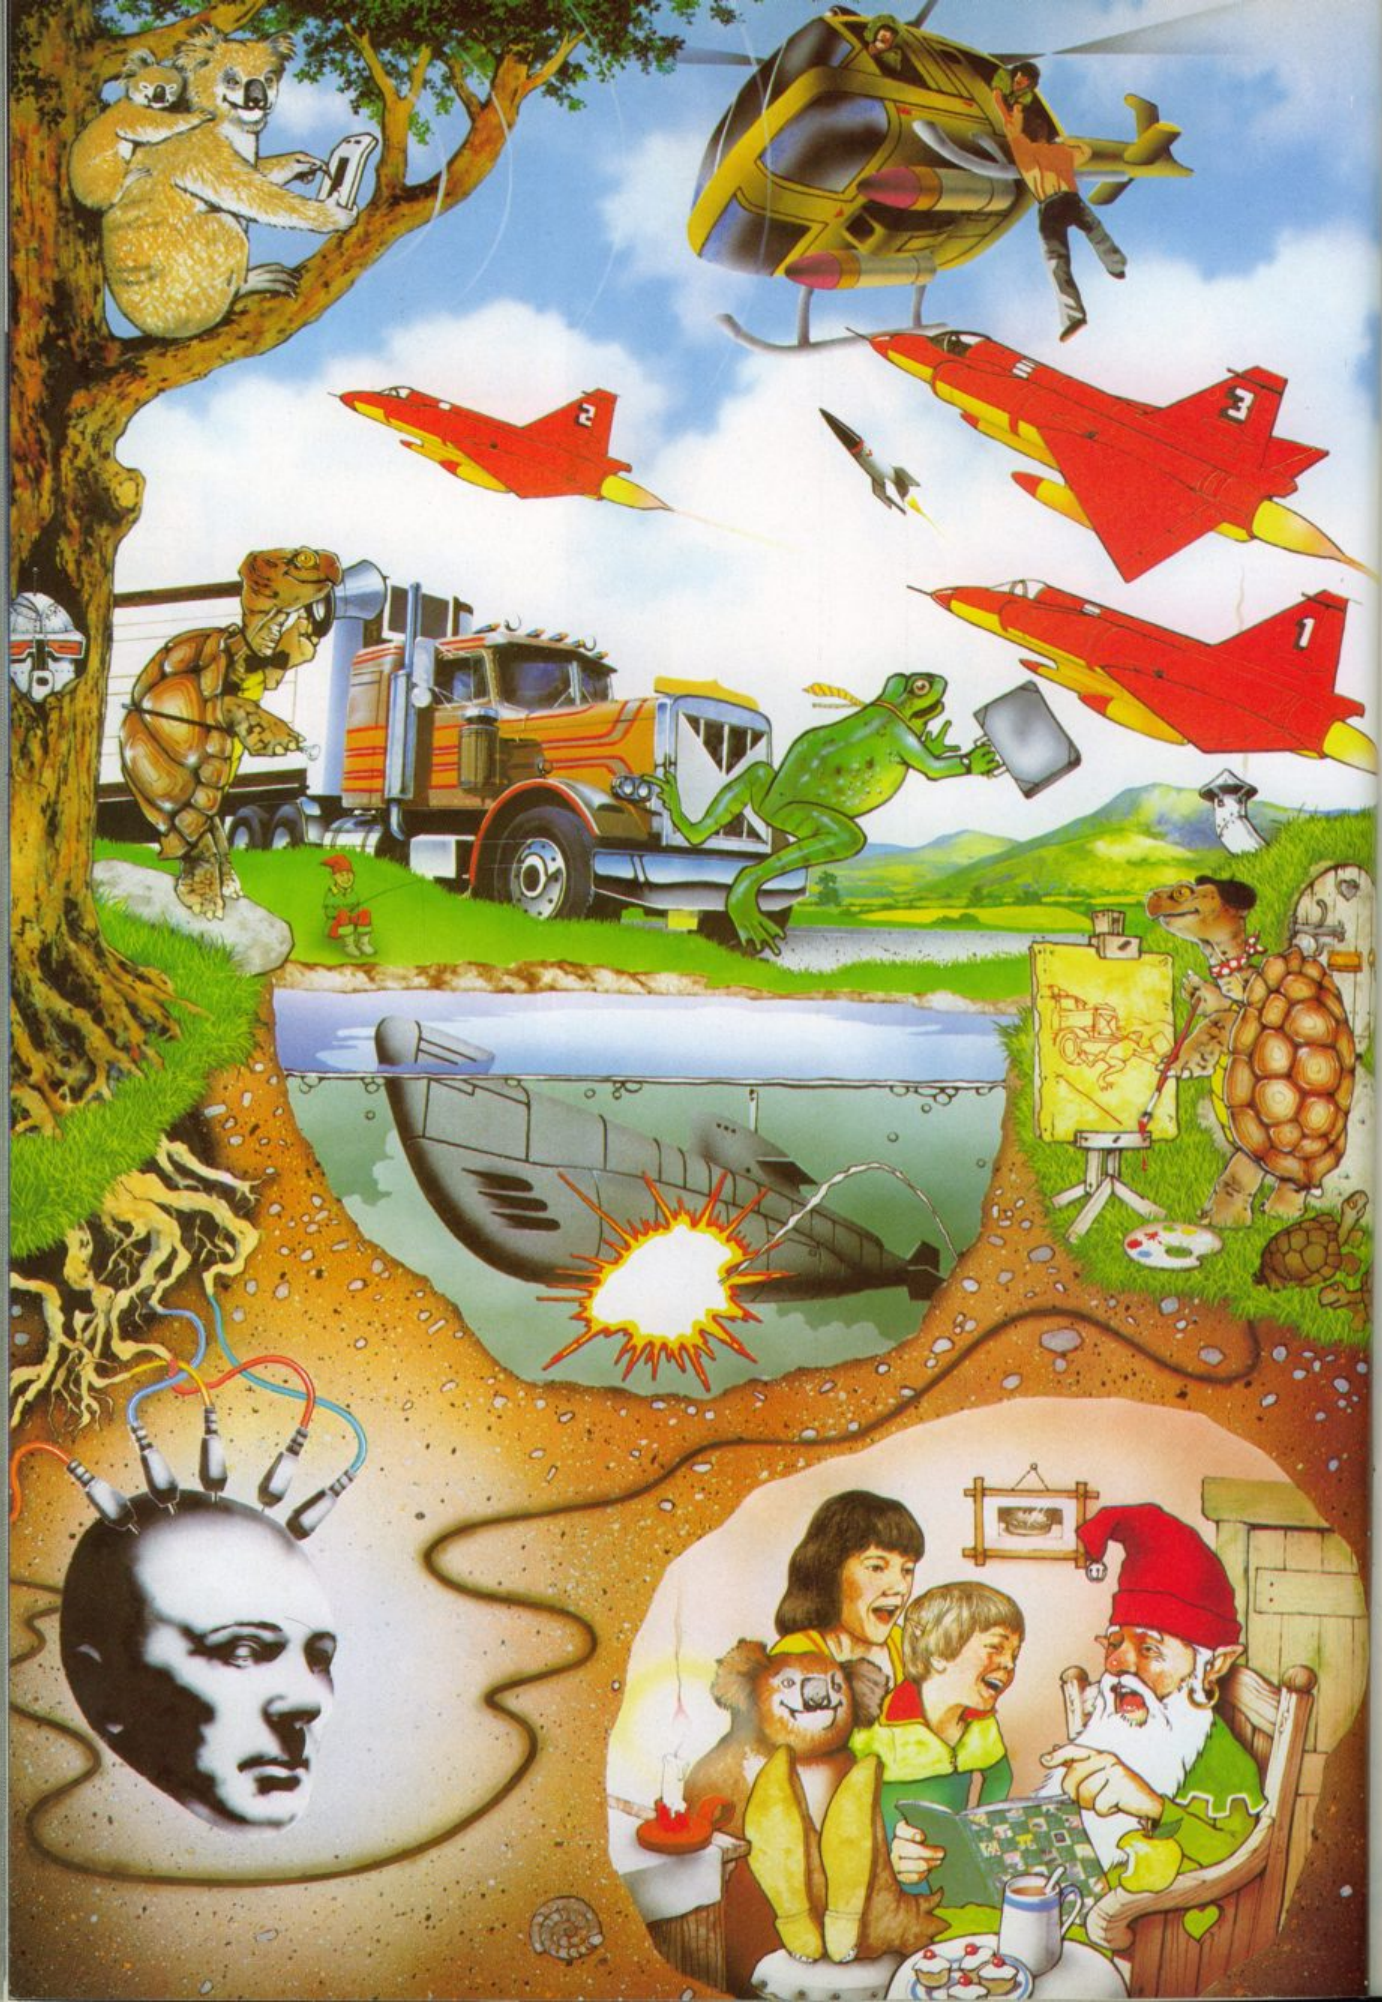
When you've avoided the dense meteor shower, the moving laser barriers, the space mines, the tractor beam units and the alien warships, you'll be good enough to try the other 5 skill levels.

"River Rescue" (on 48k) is a runaway success on other formats. It's now available on Spectrum. You'll have to navigate the wildest and most dangerous river on earth in a powerful patrol-boat. But keep a sharp look-out for the killer crocodiles. They haven't eaten all day.

Win, lose or draw, you can't beat THORN EMI's Spectrum games. Now available from WH Smith and other leading software stockists.

THORN EMI VIDEO

Leaders in home entertainment.



Your wish is your command.

In another time, another world, not too far away from your own front room, you can be in command of . . .

1. Zaxxon *by Datasoft.*

You're the pilot. Climbing, diving, swooping in on an enemy fortress. A barrage of missiles and gunfire will try and stop you. Just when you think you're through, a powerful robot's lethal homing missile zaps you...or does it?

2. Frogger *by Sierra On-Line.*

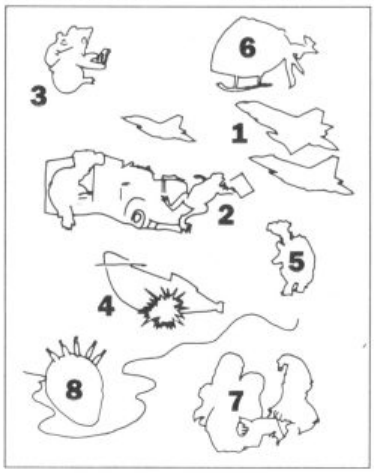
Now you're a frog stranded a long way from home. A perilous journey awaits you. Once across the busy motorway, a surging river full of logs, turtles and alligators awaits. Better flex those Froggy leg-muscles though, the bank is steep, so look before you leap!

3. KoalaPad Touch Tablet *by Koala.*

You can't overfeed this Koala — he'll make his own menu selections. He'll also move game players, make musical notes, draw computer graphics and much more. The KoalaPad Touch Tablet is an accessory that'll enhance the capabilities of your home computer system.

4. Sea Dragon
by Adventure International.

Take a deep breath — you'll need it to navigate your sub through a labyrinthian underwater passage to free the menace of the imprisoned Sea Dragon. Mines, electrifying eels and lethal laser beams await you in this murky underwater world. You've limitless torpedoes, but limited air, so hurry!



5. Turtle Graphics II *by HesWare.*

This Turtle's about to paint the town red. Or green. Or blue with pink spots. By teaching him to paint, draw and colour he'll teach you, painlessly and enjoyably, the basics of computer programming — maths, logic, communications and more with over sixty commands. Ideal for children from six to sixty.

6. Choplifter *by Broderbund.*

Sixteen hostages are holed up in an inaccessible barracks. Only an ace chopper pilot can free them — you!

Watch out for the tanks, they'll crush anything. They're just for starters — fighter jets and the awesome homing air-mines are yet to come. Good luck . . . you'll need it!

7. Kids and the Apple/Atari *by Datamost.*

These books will teach you, simply, how to write your own programmes. Step-by-step instructions teach you how to create your own action, board and word games. Programme your finances or even learn another language — whatever you do, you'll get the most out of your home computer.

8. Suspended *by Infocom.*

20 miles beneath the earth's surface your brain is wired to a computer network. You'll strategically manipulate 6 robots to overcome a myriad of realistic and original problems as you try to maintain surface-side equilibrium. But don't worry, the end is in sight — you're only there for 500 years!

Phew, back to earth! Now beam yourself over to your local dealer and check out his software.
He's got just about everything, we should know, we supply it.

SOFTSEL®

The number one source for software.
In the world.

Munch, munch, gulp. Oh, hello there! I'm Cyril the gourmet caterpillar and I just love the odd bit of fruit and veg to round off a good meal — of more fruit and veg! I'm on the look out for a tasty garden to raid. Fancy coming along for a quick bite?

You guide Cyril the caterpillar around the vegetable patch — eating the fruit and avoiding the vegetables which appear randomly on the screen. If Cyril mistakenly eats a vegetable some of his tail falls off! Two segments for a carrot and five for a turnip. If Cyril shrinks to less than a head and one segment the game ends. Cyril can grow again by snapping up fruit — he grows by one segment each time he eats two bananas or five cherries. When Cyril has eaten 20 fruits the screen changes colour and the player gets 30 seconds at a bonus level.

Cyril must now eat vegetables and avoid the fruit! Talk about a confused caterpillar! When 30 seconds are up the game returns to normal and the game continues.

At random intervals during play the caterpillar's tail will start to burn like a fuse. The only way Cyril can save himself is to reach the medicine bottle as fast as possible and eat it to gain a 500 point bonus and put out the flame. Each segment consumed by the flame is left behind as a spark showing the player just how much Cyril has shrunk. Fortunately Cyril can eat anything while his tail is on fire — so he can gobble his way through the garden without being affected by the vegetables. Oh yes, one final hazard. If Cyril touches the sides of the screen he will die instantly.

METAGALACTIC LLAMAS BATTLE AT THE EDGE OF TIME

A fast and original game for the unexpanded VIC. Challenging and colourful, with good sonics and a unique game action and design, this promises to be the most exciting new 3.5K VIC game since the introduction of GRIDRUNNER nearly a year ago.

£5.50

LASER ZONE

Experience Laser Zone – an utterly NEW, totally ORIGINAL masterpiece of Video games design. Learn to control two spaceships at once. Feel the EXHILARATION as, after long hours of practice, you control the two ships so that they function as a smooth, co-operative team! Feel the raw POWER as you lunge for the electro button and BLAST your enemies into expanding clouds of SPACE JUNK!! Feel the humiliation as a carelessly aimed BLAST slams into the side of ygur last remaining ship!! 8K expansion required.

Available for Commodore 64 **£7.50** and VIC-20 **£6.**

MATRIX

Jeff Minter has taken Gridrunner – the game that topped best-seller charts in USA and UK – and created an awesome sequel.

Graphically superb, it features multiple screens, new aliens and attack waves, mystery bonuses, renegade humanoids, deflexor fields, diagonal tracking, countdown/panic phase and much, much more...

Packed into 20 mind-zapping zones and accompanied by incredible sonics.

8K expansion required.

Available for Commoddre 64 **£7.50** and VIC-20 **£6.**

HOVER BOVVER

A totally original arcade game for C64 featuring outstanding graphics and a sound track created by a professional Piano Wizard. Gordon Bennet has borrowed his neighbour's Air-Mo lawnmower. Mow your way through as many of the 16 lawns as you can before the pursuing neighbour retrieves his mower. Set your dog onto the neighbour to help you out of tight spots and don't annoy the gardener. Try not to plough through the neat flower beds or overheat your mower!

£7.50

ATTACK of the MUTANT CAMELS

Planet earth needs you! Hostile aliens have used genetic engineering to mutate camels from normally harmless beasts into 90 foot high, neutronium shielded, laser-spitting death camels!! Can you fly your tiny, manoeuvrable fighter over the mountainous landscape to weaken and destroy the camels before they invade the humans stronghold! You must withstand withering laser fire and alien UFOs. Game action stretches over 10 screen lengths and features superb scrolling, scanner 1/2 player actions and unbelievable animation! Play this game and you'll never be able to visit a zoo again without getting an itchy trigger finger! Awesome m/c action!

Available for Commodore 64 **£7.50.**

ABDUCTOR

A classic new space game! ZAP the swirling alien hordes before they ram you – and abduct your humanoids! Survive the assault for long enough and you'll get an extra stage on your spaceship with double firepower! Awesome unexpanded VIC Action. **£5.00**

GRIDRUNNER

Finally true arcade quality on the unexpanded VIC! Shoot down the segmented DROIDS invading the grid. Beware of the pods and zappers! The awesome speed, sound, and graphics gives you the best blast available for unexpanded VIC.

Available for VIC-20 **£5.00**
Commodore 64 **£5.00**
Atari 400/800 **£7.50**

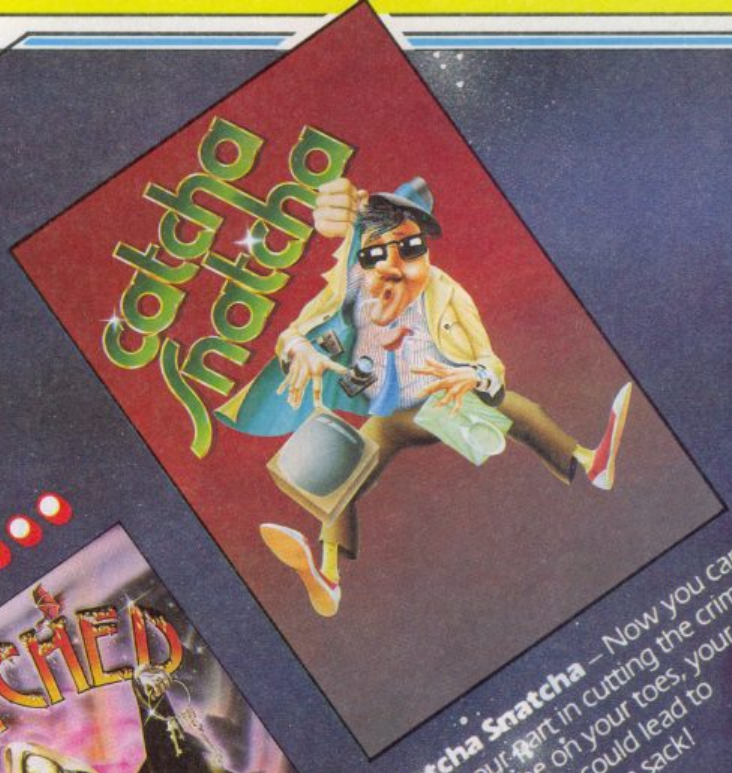
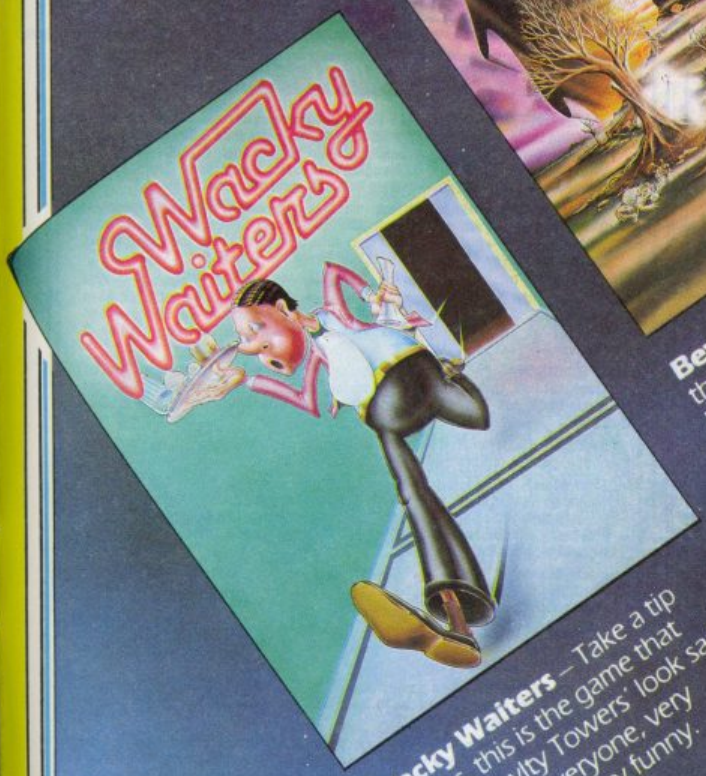
TREAT YOUR VIC-20...



Catcha Snatcha – Now you can play your part in cutting the crime rate. But be on your toes, your performance could lead to promotion or the sack!

Bewitched – This is the game that makes Hampton Court maze look an absolute doddle. If you think you know your way around, you're in for a surprise.



Wacky Waiters – Take a tip from us, this is the game that makes Fawlty Towers' look sane. A game for everyone, very addictive and very funny.

AND TREAT YOURSELF.

Isn't it about time you treated your computer and yourself to one of Imagine's famous games? There is one to suit everyone, and there is one to suit you. Available now from W. H. Smith, John Menzies, Boots and our nationwide dealer network.

bubble bus software

original, top quality games for the Commodore 64 at only £6.99 each

EXTERMINATOR

Definitely one of the best arcade action games around for the 64. Shoot the worm and everything else in the garden whilst avoiding the deadly spider and swooping eagle. Machine code using high resolution and Sprite graphics with excellent sound. Beware, it's very addictive.

KICK-OFF

A unique game based on the famous Table Football game with the moving rods through the players. Amazing graphics and music. For one or two players. Two players use two joysticks simultaneously. Machine code.

WIDOWS REVENGE

Similar to our 'Best Seller' Exterminator, but this game fires back! Obliterate all of the Widows Warriors but watch out for Photon Webbs and devious Egg Layers. Machine code.

HUSTLER

Written in machine code and using Sprite graphics HUSTLER takes the 64 to its limits. There are six 'pool' type games for one or two players, high scores kept and super music. Machine code. See the great press reviews.

SPECTRUM SOFTWARE

SUPER SOFTWARE PACK:— 25 Super programmes for the 48k Spectrum — Machine code arcade type games, adventures, Dungeons & Dragons, Puzzles and ball games including Breakout (taking you through 9 skill levels), Star Wars, Amazing 3D Mazes, 3D Noughts & Crosses, Corridors of Doom, Trap It, Housebreak and Yahtzee. All 25 on one compendium pack. £9.95

Games Pack 1:— Four 'super fast', machine code action games — Specman: gather money bags avoiding the monster and mines. Snake-Byte: Collect eggs on a small island, but be quick or they turn bad, all the time the snake grows longer and moves faster. Also Blitz and Breakout. 16K. £5.95

Games Pack 2:— Two arcade type games and two games of strategy:— War of the Worlds: A task force of 20 aliens is approaching your planet. Each Alien will try to land and build a city. If they are not stopped they will take over and liquidise all resident life forms. Also 3D Noughts & Crosses, Smilies & Battleships. 16K. £5.95

SPECMUNCH:— Pacman at its best, Superior Maze, Intelligent ghosts, Bonus graphical fruit, On screen scoring, smooth animation, great graphics, different levels of difficulty, fruity music and high score. (Machine code of course) 16K. £5.95

BANDIT:— Superior fruit machine with graphical fruit, random hold, each way nudge, gamble feature and realistic spinning reels. (Machine code). 48K. £5.95

Alien Mine:— Your mission: To replenish gold supplies. Dig your paths to the enemy base, watch out for a deadly patrolling robot. There are lazer beams to avoid. A tank attacking your space craft and rock falls to hinder your progress, also many an intrinsic secret to discover. A great arcade adventure game with wonderful graphics. 16K. £5.95

Backgammon:— The computer uses machine code to decide its moves in about five seconds. Plays according to official rules, prevents cheating. Eight colour high resolution board. 48K. £5.95

REVERSI:— An exciting board game of strategy, which is easy to learn but hard to master. Pit your wits against the computer. Standard game or if you dare — lightning reversi. 48K. £5.95

Play as you learn:— Five games pack — 48K Maths, co-ordinates, compass points and the Alphabet are fun to learn with these educational games for the 5-11 year age range. £4.95

ARTY 'The Spectrum Artist':— A very useful aid in the creation of screen displays. This programme will save many hours of planning time. 45 minutes practice to master the commands. All input commands are saved in memory and can be printed out or saved to tape for inclusion in other programmes; or just watch the re-run of all the stages of your creation for fun. 48K. £5.95.

SPACE BLOCKADE

BY SIMON GREGORY

RUNS ON A ZX81 IN 16K

An alien armada of heavily armed starships hangs in Earth's atmosphere, awaiting the order to unleash their awesome power to destroy the planet! All Earth's defences have been destroyed in a cataclysmic war.

Now all the survivors of the war are attempting to flee the doomed Earth in shuttle craft, their destination the last remaining well defended Earth space station. The shuttles are protected by a device which jams all the aliens scanners — so they will be invisible to alien eyes. But the pilots still have to be skilful enough to guide the shuttles between the alien attackers ringing the planet. Can you steer the shuttles to safety?

Control keys: 5—move left, 8—move right, 6—hover. You get 100 points for each successful escape and lose 50 points each time you crash.

Variables:

MAX: maximum score.

ES: number of ships escaped.

LOS: number of ships lost.

UNL: number of unlaunched ships.

W, X, Y, Z, R, S, T: position of invaders.

Q: position of earth shuttle in display file.

P: direction of invaders (P = −1 to move left, P= +1 to move right)

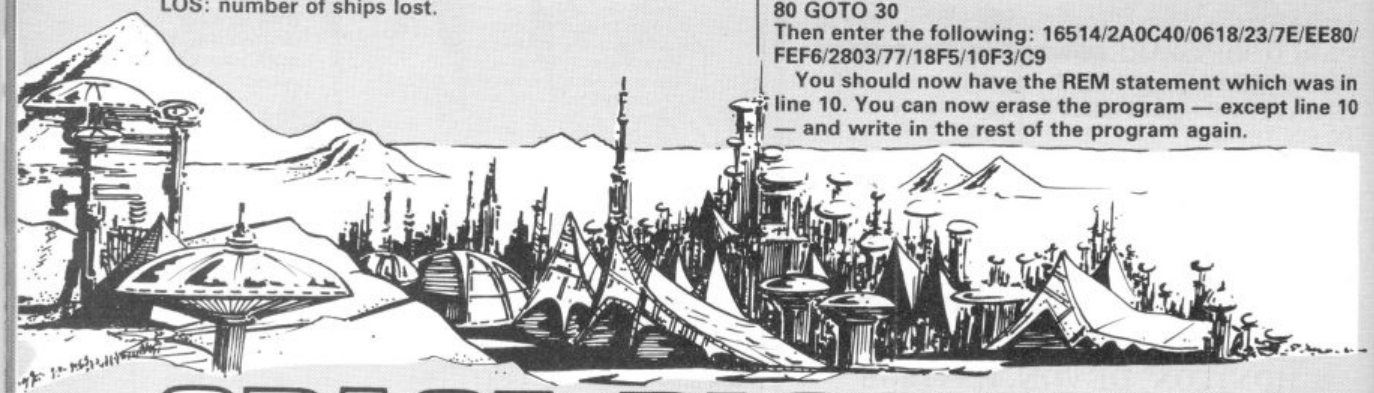
LO: peek to see if earth shuttle has crashed. SC: score.

To test the machine code — write lines 10 and 15 first and then RUN. If the screen has not inverted then the program could have crashed. If this is so, start again with the following hex loader.

```
10 REM (30 M's)
16 INPUT X
20 LET A$= " "
30 IF A$ = " " THEN INPUT A$
40 IF A$ = "S" THEN STOP
50 POKE X, 16*CODE A$+CODE A$(2) — 476
60 LET X =X+1
70 LET A$=A$(3 TO)
80 GOTO 30
```

Then enter the following: 16514/2A0C40/0618/23/7E/EE80/FEF6/2803/77/18F5/10F3/C9

You should now have the REM statement which was in line 10. You can now erase the program — except line 10 — and write in the rest of the program again.



```

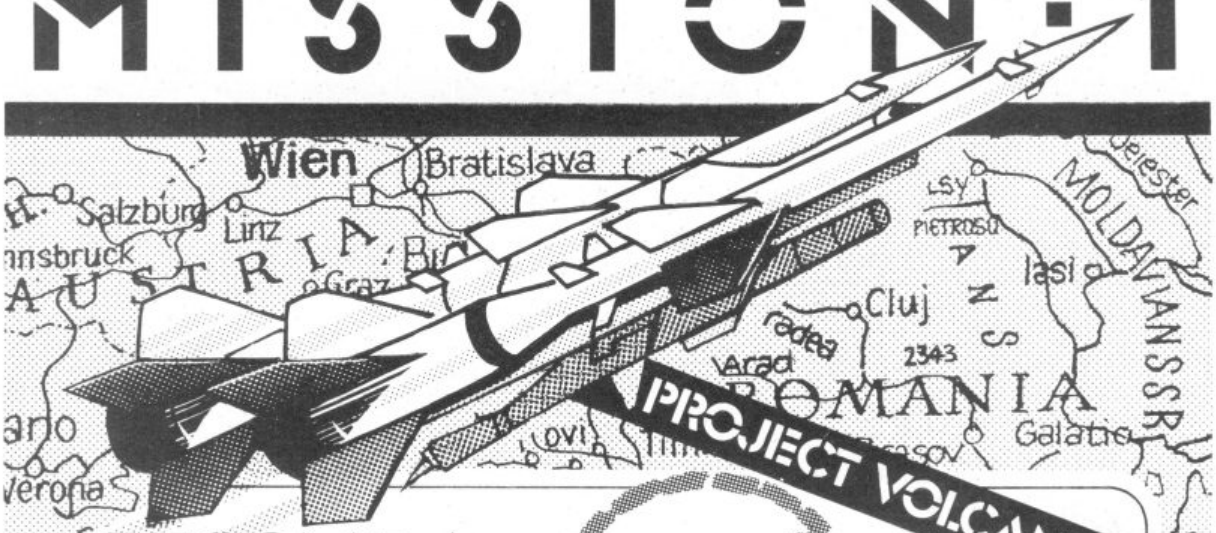
MISSION·1



BECOME A SECRET AGENT

SECRET AGENT

Mission Software's complete package on Project Volcano, is probably the most advanced Adventure Computer Game Package you have considered this year. It is not just for the dedicated game player but for those that want to get involved in Secret Codes — Messages, and the seamy-side of DI6 (British Intelligence) and the K.G.B.

IT IS A MUST FOR THE SINCLAIR SPECTRUM 48K AND DRAGON 32 HOME COMPUTER OWNERS.

When you receive your Adventure Game from Mission Software Limited, included in the package is your Passport to the international workings of the Secret Agents.

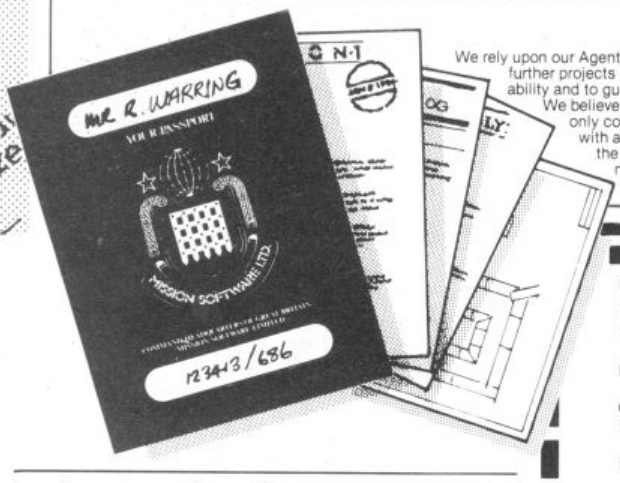
Your personalised Passport will assist you in negotiating the K.G.B. network in the Soviet Block Countries and vital to the success of your mission.

Command Headquarters will give you information that other Agents have recorded, together with their Communication Log, Mission Instructions, Secret Memos, Classified Diagram, Full Briefing Instructions and other Secret Data.

IT'S UP TO YOU TO BREAK THE CODE AND BECOME A SUCCESSFUL SECRET AGENT.

- We know your friends will want to become Secret Agents and use your game, we will be quite happy to supply them with their Passport and Documents for £2.95 per kit. This way you always retain your personal Passport and Secret Information.
- The moment you tell us you have completed your current assignment we will advise by Secret Data, details of how to penetrate one of the World's most secret establishments.
- To obtain your Game and personal Passport with all its Secret Documents send a Cheque or Postal Order for £6.95 (inc. P.P. & V.A.T.) with the Coupon at the foot of this advertisement.

ORDER MISSION 1 TODAY AND JOIN THE GROWING NUMBER OF SECRET AGENTS OPERATING FROM COMMAND HEADQUARTERS.



We rely upon our Agents to feed back information to make further projects interesting and complex, to tax your ability and to guarantee many hours of enjoyment. We believe Mission Software Limited is the only company that supports its Field Agents with a mass of Secret Information to make the Mission exciting and enjoyable which makes it a must in Computer Games.

£6·95
Inc. P.P. & V.A.T.

48K Spectrum & Atari 400/600/800

Blue Thunder

by Richard Wilcox

After skilfully piloting your Jetcopter through a bombardment of Electronic Storms, Ground & Sea Based Missiles and attack from Armoured Barrage Balloons, you thought you were safe to complete your mission ... But No! ... yet another wave of deadly Jet Fighters appear from nowhere with only one objective...to eliminate you!

Only your Hyper-Phase Lasers and amazing arcade skill can keep you alive to complete a task that looks impossible. As the only survivor of a once mighty invasion force you must penetrate deep beyond enemy lines. From a remote island protected by a complex defensive screen you must rescue your wounded comrades held captive beside an unstable nuclear reactor, which you must first destroy!

The ultimate in 100% Machine Code Arcade Games from a Master Programmer, achieving a new peak in programming perfection and super smooth movement. Blue Thunder sets astounding new standards in Hi-Res Graphics with Pixel Scrolling over 6 screens 5 different missions, Hi-Score and incredible breathtaking PERSPECTIVE GRAPHICS!

Richard Wilcox Software carries a lifetime guarantee, should any of our games fail to load please return them for an immediate replacement.

All Richard Wilcox Software is available from leading software outlets or by completing the attached coupon.

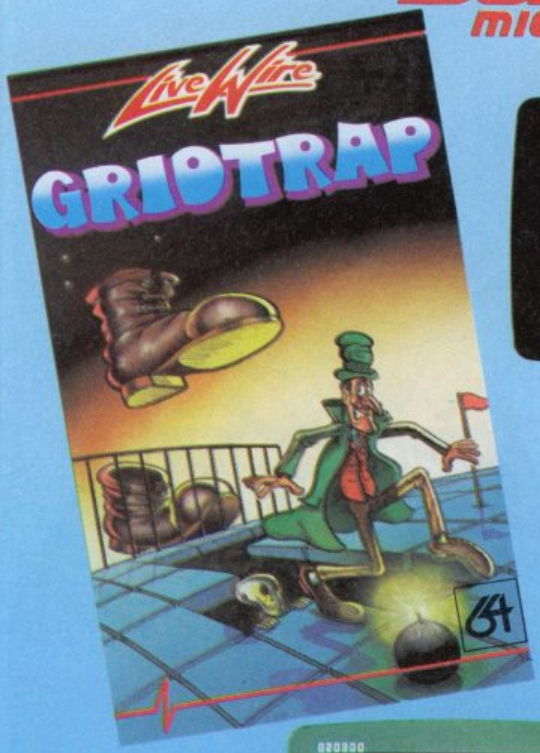
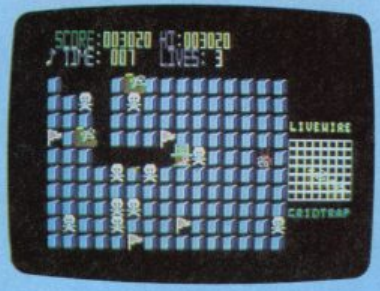
THREE EXCITING NEW GAMES
IN THE LIVEWIRE SERIES FOR THE 64
FROM SUMLOCK MICROWARE





GRIDTRAP 64

We promise you won't be able to turn it off! It's a real skill tester and loads of fun to play!

Play with the Keyboard or Joystick. Choose your own operating keys with our **User Definable System.** Compete with an opponent by selecting **Two Player Mode...** Great graphics, super sound effects in the Livewire tradition including a selectable Melody Mode where the tune is available at the touch of a key and Melody On is indicated by a quaver graphic.

Program No. LWO4 £8.95

Not just a game... an Experience!

IT HAS IT ALL!...EXCITEMENT... HUMOUR... STRATEGY

Jumpin' Jack leaps into a totally new look for the 64 created by **Three Dimensional Graphics** giving **Full Perspective** to the game... PLUS... hosts of features never seen before!

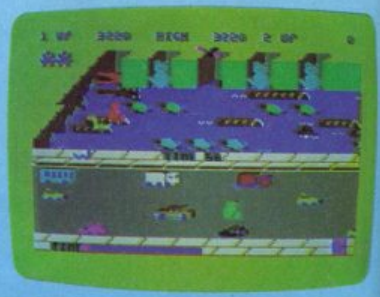
Submerging Turtles — Snakes — Crocodiles — Otters — Lady Frog — Dragonfly!!!

It's Fun ★★★

IT'S **FROGRIFFIC** ★★★

Program No. LW02 £8.95

JUMPING JACK 64



TRIAD 64

NEVER BEFORE HAS A COMPUTER GAME LOOKED SO EXCITING...

...FELT AND PLAYED SO EXCITING...

Watch astonished as the Triad hurl themselves towards your craft in a remorseless battle against your intrusion.

Feel the heat blast of their anti-matter fields.

Your pulse laser will have to turn white hot before this encounter is over...

Featuring:-

A new DIMENSION...

Into the realm of TOTAL PERSPECTIVE GRAPHICS...

Program No. LW03 £8.95

Clip the coupon below and return to Sumlock Microware Dept. CVG 2

Program notes

The program is written entirely in Basic and shows how easy it is to use the sprite and sound synthesis features of the Commodore 64.

The program contains comment lines which may be excluded. Please note that if a reversed-graphic symbol appears within a PRINT statement, it is either a CONTROL or COLOUR code.

The first print statement at line 5080 and the apparently empty string on line 7506 both contain the colour code generated by holding down the "Commodore" key and pressing "3". This code shows up on the screen, but does not show if listed on a Vic printer.

The planet looked peaceful as the exploration team climbed slowly down from EXPO-32, part of the survey fleet sent out to explore far flung sectors of the galaxy. The equipment was quickly set up and the various experiments began. Suddenly the peaceful scene was shattered by a warning alarm from the spacecraft. Meteors! A huge shower heading directly for the exploration team. Will the explorers manage to fight off the rock shower and survive until the mother-ship comes to their aid? Play on!

The meteors come in waves — 10 meteors to each wave. If you survive six waves, the mother-ship appears and collects the exploration team — departing impressively! You can only have one rocket on screen at a time. The "V" key fires a rocket angled toward the left, the "N" key fires rockets to the right, the "B" key fires one rocket vertically. You are also armed with three PANIC destructors which destroy rocks anywhere on the screen. These are activated by pressing the Space key. You may abort your mission by pressing "A" — but use this only as a last resort when destruction is inevitable.

Scoring: You get 100 × the wave number for shooting a meteor, a bonus at the end of each wave, a 5000 bonus for not being blown up, a 5000 bonus for being picked up by the mother-ship and an accuracy bonus depending on the number of rocks destroyed. The top ten scorers are featured in a Hall of Fame.

Write to Program Extra at *Computer and Video Games*, Durrant House, 8 Herbal Hill, London EC1R 5EJ. Please mark your letters "Program Extra". Remember we'll pay £10 for any tips or short programs we print.

PROGRAM EXTRA

Computer and Video Games is starting the New Year in real style with a Spectrum listing that will have professional software houses quaking in their shoes.

Talking of professional software we've got a great shoot-'em-up game by Jeff Minter of Llamasoft fame for the Commodore 64 in this month's issue.

Mark White's Demolition has caused quite a stir since it first bounced onto our reviewer's lap and into his tape recorder. I'm sure you'll be just as impressed with the game as we at *C&VG* were.

Program Extra talked to Mark recently about Demoltion and his plans for future games.

Demolition, it's hard to believe, was Mark's first attempt at writing a games program for the Spectrum. He spent a whole week of his school holidays working into the small hours to perfect Demolition.

Mark spent a lot of time on the program making sure it was efficient as possible because you know what they say about the Spectrum — you don't run a program, you "stroll it".

Mark gave me some tips on structured programming like sticking Data statements and game instructions at the bottom of the listing and For Next loops near the beginning.

Even Mark's programming talents have a limit and he's now abandoned Sinclair Basic in favour of Z80 machine code. Golf is his first m/c game and is a great improvement even on Demolition. Future issues of *C&VG* will no doubt feature some of Mr White's other achievements — Smurf Attack and Cricket to mention two.

How many programs do you think can fit in a BBC micro?

Alvin Rich from Newcastle has written to me with a tip which allows you to store up to 10 programs in the BBC simultaneously! I'll let Alvin explain.

"You first of all load a program into the computer in the normal way. Once it's been loaded type into the BBC as a command PRINT TOP. If everything has gone according to plan the Beeb should print up a number larger than 3000, let's use 5000 as an example. Now just type PAGE=5000 and press return. The second game can now be loaded using the normal methods. If at any time you want to return to the program enter the command PAGE=&E00.

If all that seems too much like hard work then just stick the listing below into your computer and it will take care of everything. What could be easier?

```
10 INPUT "Number of programs to be stored";W
20 DIMA(W)
30 FORS=1 to W
40 LOAD""
50 A(S)=TOP
60 PAGE=A(S)
70 NEXT S
80 PRINT "HERE IS THE LIST OF NUMBERS"
90 FORS= 1 TO W:
100 PRINT A(S): NEXT S
```

When the program's finished you'll have up to 10 games in your micro to switch between. This feature isn't just useful for playing but writing them too.

Two versions of a game can be kept in memory at the same time and new techniques and ideas can be compared against tried and tested methods.

The *C&VG* office is inundated every month with phone calls from new readers asking for advice, pleading and begging us to help them with their new micros. Even die-hard *C&VG* addicts have been heard to say they wished they knew more about Basic or had a better understanding of their machines.

With this in mind Program Extra have decided to launch Down to Basics, a regular new spot aimed at giving you some "Basic" training and all the information you'll need to enter our games listings with the least possible fuss.

Let's start by having a look at the origins of Basic. Basic, the language, had its beginning in the early '60s at a British University where it was developed for computing students as a "stepping stone" language before moving onto a more conventional programming language like Fortran or Cobol.

Today Basic is the world's most widely understood computer language. 2 million people use Sinclair Basic alone.

Basic is different from most other computer languages in that it's interpreted instead of compiled.

Interpreted languages are decoded by the computer line-by-line while the program is running. Whereas compiled dialects are changed into what is known as source code, a type of machine code that can then be executed as normal.

This difference also accounts for Basic's relative slowness compared with Fortran or Pascal for instance.

Next month we will be taking a closer look at Basic and discovering why it's so successful and finding a new pretender to Basic's throne.

That's it for this month except to remind you that February's issue is a *C&VG* special with a full 48 extra pages crammed with great games listings.

TERMINAL SOFTWARE

commodore 64 games cassettes

SUPER SKRAMBLE!
Personal Computer News (15-21 Sept '83) gave SUPER SKRAMBLE! an overall rating of NINETEEN OUT OF TWENTY and described it as: "Well implemented with beautifully smooth scrolling and very nice graphics."

SUPER GRIDDER
"... a compelling piece of frivolity that could give hours of fun." was the verdict of Personal Computer News (22-28 Sept '83).

SUPER SKRAMBLE!
"An excellent game" said Computer & Video Games magazine (Sept '83).

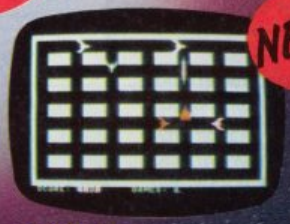
TERMINAL

SUPER DOGFIGHT
The first 64 games cassette to have SIMULTANEOUS TWO-PLAYER ACTION – realistic sound effects too.

STELLAR DODGER
A game of skill and anticipation in which you must dodge your way through asteroids to complete your mission.

NEW

NEW



HUNTER
A fast action game in which your pursuers gain in speed and intelligence as you master each successive screen.

sinclair Spectrum 48k

VAMPIRE VILLAGE and **SPACE ISLAND** are REAL-TIME graphic adventures and every game is different from the one before.

CITY is a unique REAL-TIME better-than-a-board game for 1-4 players that combines simplicity of use with complexity of form as the city you build takes on a life of its own.

Number charts

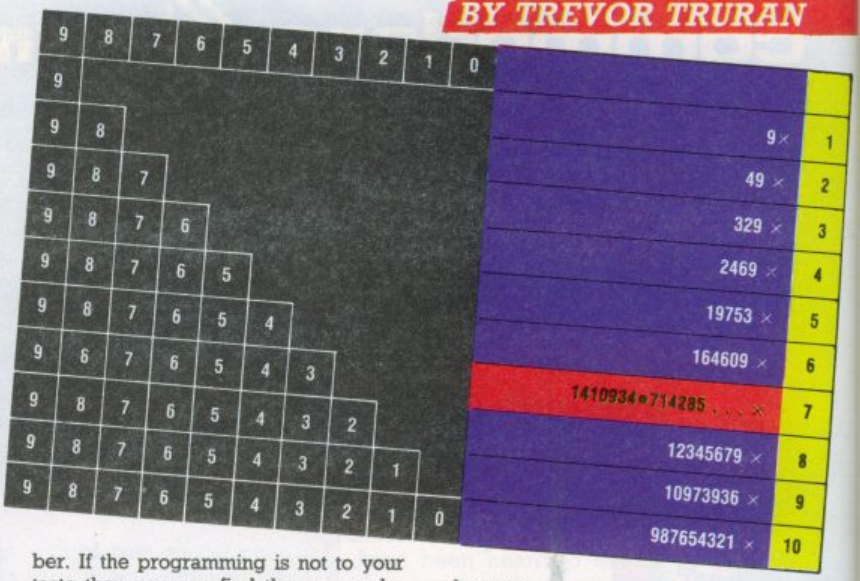
As our super de-luxe chart shows, 9876543210 is very nearly a remarkable number. It fails to qualify, as do so many mathematical marvels, when it reaches the *seventh* stage.

The property it nearly possesses, expressed somewhat formally, is that, **for N=1 to 10, the number formed by the first N digits can be divided exactly by N.**

In words we can understand, if accompanied by a flashing of the eyes from words to chart which will make them appear to be a couple of small comments in solar orbit, it will be clearer if we say that the number formed by the first 2 digits (98) can be divided without remainder by 2. Ditto the number formed by the first 3 digits (987) — 3 will go into it exactly. And so on . . . until we come to the seventh digit number which is not divisible by 7.

The strange thing is that there exists *just one* ten-digit number which uses the digits 0 to 9 once each which has the required property all the way through to 10.

Why not put your brain and your micro to work and cobble together a short program to search for that number. If the programming is not to your taste then you can find the answer by simple deduction and a spot of trial and error.



After all, it does not require the services of Bertrand Russell to realise that the tenth figure must be zero, the fifth is 5 and that odd and even digits must alternate.

When you have found the number, print it neatly on a card, add your name and address and hastily post to Puzzling Contest, *Computer and Video Games*, Durrant House, 8 Herbal Hill, London EC1R 5EJ.

Blooming petal problem

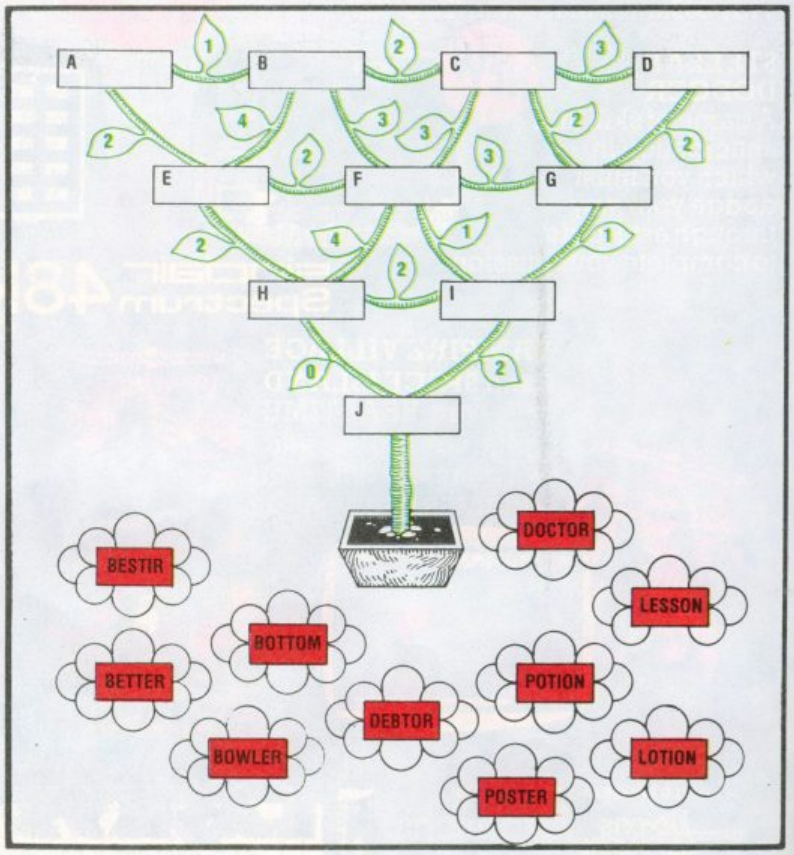
It may strike the more discerning among those present here at the perennial meeting of the East Chidgely Flower, Produce and Surf Riding Society, that it is not the ideal time of year to launch our latest botanical specimen, *Arboreas Literatus*.

As you can see, despite every precaution, the blossoms have already fallen and lie scattered on the floor. If we are to preserve this species for posterity, it will be necessary to replace each bloom in its correct position with spirit gum and take a quicker-than-instant picture.

There is one clue to where each word fell from — the leaves between adjacent blossoms bear a number which gives the *number of letters which are the same* in both the neighbouring flowers.

Thus if BOWLER were next to BESTIR, the leaf between them would have the number 2 since the letters B and R are the same in both. Note that, although both words contain the letter E, it is not counted as matching since the E's occupy different positions in the two words.

Can you save the photographer a long wait by working out the only possible position on the plant for each word?



A bit too big for its chips

The umpteenth generation of computers is getting a bit too big for its chips. Ask it a simple question, like, to take a random example, which of five people at a recent computer fair bought what computer with how many functions made in which country and you get the following stream of clever stuff:

DATA . . . The Putcom is English. It was not purchased by Mrs Bitt or Mr Putter.

DATA . . . The Cherry has more functions than the German computer.

DATA . . . Miss Watt bought the Supremo.

DATA . . . The French machine has 28 functions. This is more than Mr Jones' purchase and less than the Supremo.

DATA . . . Mrs Bitt's computer has less functions than the Cherry, but 14 more than the machine from Luxembourg, which is not the Supremo.

DATA . . . The SRG has twice as many functions as Mr Cross's computer.

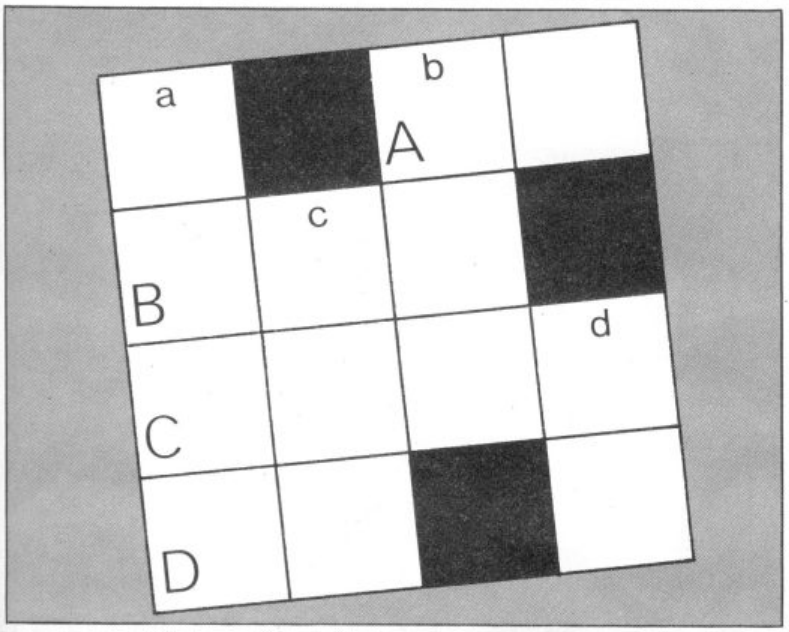
I ask you! And you know what's coming, don't you? Can you work out the name of the person who bought each machine, its country of origin and number of functions?

The grid can be used to sort things out, a cross in a square will indicate an impossible combination and a tick a positive link.

	COMPUTER					FUNCTIONS					COUNTRY				
	Cherry	Putcom	Mindswap	SRG	Supremo	14	21	28	35	42	England	Germany	France	Luxembourg	Switzerland
Mrs Bitt															
Mr Cross															
Mr Jones															
Ms Watt															
Mr Putter															
14															
21															
28															
35															
42															
England															
Germany															
France															
Luxembourg															
Switzerland															

NAME	MACHINE	COUNTRY	FUNCTIONS

So tiny a crossnumber



In this tiny crossnumber, which is both ridiculously simple and simply ridiculous, the answer to each clue is a number which is entered in the grid one digit to each square.

The mysterious X is also a number, though a mystery no more once you have found it.

Since you are only allowed 2 (yes two) minutes to complete this little poser it might be an idea to let your computer do the crunching.

CLUES ACROSS:

A. The cube of the difference between the digits of X.
B. X plus a prime.
C. X squared.
D. The digits add up to the square of the difference between the digits of X.

CLUES DOWN

A. 24X
B. A multiple of the product of the digits of X.
C. The square of the sum of the digits of X.
D. 2X.

That snow maze on my front lawn

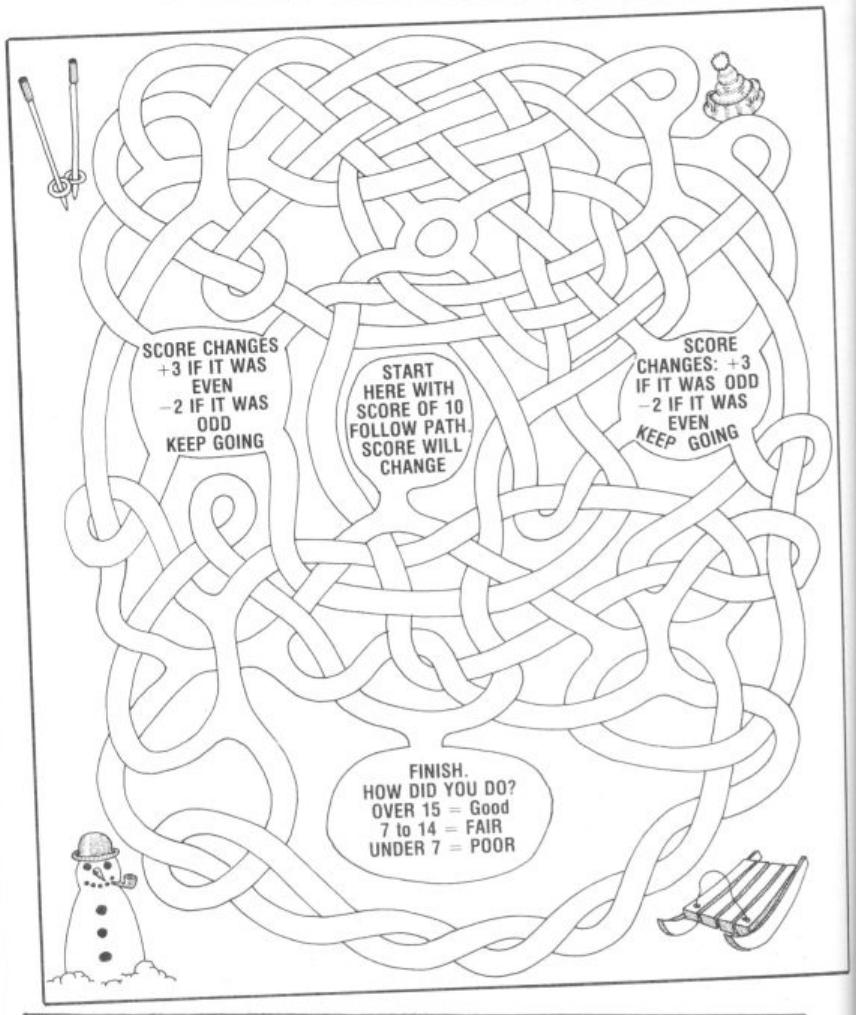
As a youth, Lewis Carroll liked to challenge his family and friends with mazes traced out in the snow which frequently fell on the Victorians of his generation.

Our Man in Washington, Paul McClenon, has put this winter's downfall to some purpose and tunnelled a maze on the front lawn of a local notorious residence, known as the WHITE (ouch, no pun intended) House. His intention being to give the president a more congenial task than counting missiles.

From the START, where you begin with a score of 10, wander along the paths, *going down each tunnel only once*, until you reach GOAL.

There are two chambers to visit along the way where your score can change for the better or worse.

You will, naturally, find little problem in reaching your goal, but can you find a way to arrive with a score of 16?

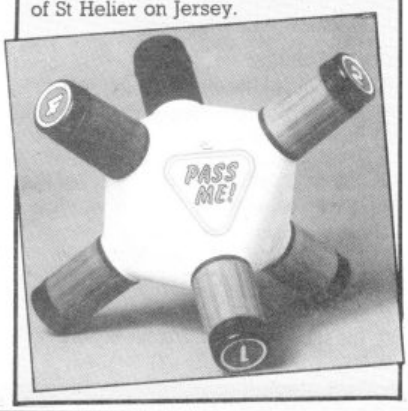


Prize to set you talking

Our fireworks brain teazer had lots of you stumped last month as you struggled to work out how much money's worth went up in smoke.

The correct answer is that Roman candles + 20+20+20+10+2+1=73p. Vesuvius = 20+10+10+10+5+1=56p. Catherine wheel = 10+10+10+5+2+2=39p.

The lucky winners of Pass Me talking games are Claire Goddard of Essex, Paul Hammond of Peterborough, Mr. J. W. Boyle of Essex, Guy Paintain of Bucks., and J. Dimond of St Helier on Jersey.



SOLUTION

SNOW TROUBLE
Come now! Since there is more than one way to slip from Start to Finish, apart from sweeping the whole thing into a corner and waiting for the melting warmth of Spring, we are not going to give the answer. Re-affix the mental skis, therefore, and go to it!

A FAIR REPORT
Mr Cross, Mindswap, Luxembourg, 14 functions. Mr Jones, Putcom, England, 21 functions. Mrs Bitt, SRG, France, 28 functions. Miss Watt, Supremo, Germany, 35 functions. Mr Putter, Cherry, Switzerland, 42 functions.

THE WORD TREE
A=Lotion; B=Debtor; C=Poster; D=Bowler; E=Doctor; F=Better; G=Bottom; H=Bestir; I=Lesson; J=Potion.

LOST IN THE JUNGLE

Welcome to the jungle! This issue we bring you the first part of an Adventure written by our Sharp expert Frank R. Rooney. You'll not want to miss what follows in future issues — otherwise you'll be lost forever — at the mercy of all those nasty wild animals! And there are more mysterious things in this jungle too! Like hidden cities and lost tribes of particularly nasty natives. Frank has written this Adventure with our younger readers in mind — but don't think it's going to be an easy one to solve just because of that. One problem about keying in Adventure listings is that you often know all the key words and locations when you've finished. So why not get a friend to help you key in the listing then you won't know too much about the game before you begin to play. Now turn the page and soon you'll be lost in the jungle . . .

BY FRANK R. ROONEY

RUNS ON A SHARP MZ80K

These words come from the pages of a diary found by the banks of a jungle pool . . .

It was the roar of some distant jungle beast that brought me back to my senses. Only then did I realise the danger I was in — alone, with miles of unexplored jungle between me and the nearest civilisation. Miles of jungle full of wild animals, deadly insects and reptiles and rife with legends of lost tribes of fierce cannibals.

Only a few short hours ago I had boarded the small light aircraft which was to fly me to exploration headquarters deep in the heart of this, the last uncharted jungle region. But soon after we crossed the river frontier of the jungle area the aircraft developed engine trouble. Suddenly smoke began to fill the cramped cockpit and we went into a steep uncontrollable dive. The aircraft smashed into the jungle canopy — and I must have been thrown clear, because I awoke some yards away from the wreckage. There was no sign of the pilot — just the sounds of some wild beast dragging something through the undergrowth . . .

Now the light is failing and the weird sounds of the jungle night are beginning to fill the air and I'm beginning to realise that I am well and truly lost in the jungle!

Enough of all this scene setting — what you need is some hard facts! You are lost in a jungle with only a gun — with six shots — a knife, a slingshot and two bottles of medicine.

Your aim is to find your way back to civilisation without getting killed — that's all!

You must try to keep up your energy by eating and drinking whenever possible — or you will quite simply die of exhaustion.

The jungle is 50 miles square and each move is the equivalent of one mile. Skilful judgement is required, but there are also random events that will make things even more interesting!

Will I ever be able to find my way back to civilisation? Luckily I have a small supply of emergency rations which I discovered among the wreckage of the aircraft — and water seems plentiful in this area of the jungle.

But what of the fierce natives and even fiercer jungle animals that I'll encounter on my trek through the unexplored undergrowth!

Will I be able to survive all the many dangers and hazards? Who knows! I have no choice but to attempt to find my way out of this vast jungle . . . otherwise I might just as well give myself up to the wild beasts now!

Don't miss next month's issue when we'll continue our exploration of Frank Rooney's weird and wonderful jungle. Don't get lost anywhere in the meantime will you!

Part Two next month

PROGRAM NOTES:

Line 30: calls title graphics & tune
40-150: bird-shoot routine (placed at beginning for speed of execution)
160-190: initialisation — start of game; (F & H determine random starting location in jungle — at least 10 miles into jungle from any direction); instructions called
200-240: random event selection
250: move a mile without incident
260-530: berry bush routine & graphics
540-800: quicksand routine
810-1370: wild animal routine
1360-1600: spider routine
1610-1850: pond routine & graphics
1860-2020: status & direction choice
2030-2060: success routine
2070-2080: sunlight routine
2090-2390: disease routine
2400-2680: river full of piranhas routine
2690-3080: coconut tree routine
3090-3760: bird routine
3770-4210: snake routine
4220-4520: coconut tree graphics
4530-4620: quicksand graphics
4630-4770: spider graphics
4780-5130: sunlight graphics
5140-5300: disease graphics
5310-5720: civilization graphics
5730-5850: piranha graphics
5860-6040: boat graphics
6050-6310: swimming graphics
6320-6470: lion graphics
6480-6630: wolf graphics
6640-6820: tree-climbing graphics
6830-6860: move mile graphics
6870-6950: instructions
6960-6980: jungle bird sounds
6990-7030: instructions cont.
7050-7240: failure music & graphics
7250-7280: option for new game
7290-7490: title graphics
7500-7540: title tune.

MAIN VARIABLES

K = energy
M = no. of bullets
MM = no. of bottles of medicine
SS = flag for slingshot
KK = flag for knife
F/H = position in jungle

NOTES ON SHARP BASIC

The program has been written in normal SP-5025 basic and occupies about 23.5K of memory.
POKE 53248 - POKE 54247 = Sharp screen locations
POKE 4466, X prints X lines down the screen
POKE 4465, Y prints Y columns across the screen
POKE 4513 & POKE 4514 are used for sound effects which are switched on by USR(68) and switched off by USR(71)
USR(62) sounds a bleep.

sinclair special 6

Inside...

Setting new standards in educational software with Sinclair-Macmillan

Plus six other learning programs

TODAY, LEARNING IS A NEW GAME

Subsidised microcomputers are now commonplace as teaching aids for the very youngest children and the ZX Spectrum is prominent amongst those micros at use in schools.

In the relatively short time that the Spectrum has been at work in the classroom, two questions have been answered. Yes: with the right software, the micro can and does teach effectively and thoroughly (and gives teachers more time to devote to individual pupils). Yes: young children think little of working rapidly and successfully, with a screen and keyboard, on even quite complex subjects.

In this Sinclair Special we reveal a range of educational software specifically designed to make full use of these advantages. The programs produced by Sinclair in collaboration with Macmillan Education are fascinating. They deal imaginatively and most effectively with early reading skills and take a truly refreshing approach to basic science.

In the Blackboard range we've programs which bring a light-hearted clarity to the tricky matters of spelling and punctuation.

These programs are designed for use both at home and in the classroom. Each program is accompanied by full documentation which gives parents helpful advice and guidance on the educational objectives.

The programs covered on these pages represent only a fraction of the full and fast-growing list of Spectrum software. Be assured we'll keep you in touch with new developments as they happen.

David Park
Education Marketing Manager

NEW WAYS TO LEARN WITH THE ZX SPECTRUM™

Programs from Blackboard Software

The new range of educational programs from Blackboard Software makes learning an enjoyable process by involving the child in a game which teaches as it entertains.

Each program has a step-by-step example section and gives correct answers after a number of attempts. Vocabulary changes can be made, allowing each program to keep pace with the child's development. This flexibility can also be used in the classroom to cater for children of differing ability.

The instructive and colourful games which follow the successful completion of each group of sentences provide useful practice in letter recognition and increase familiarity with the Spectrum keyboard.

All programs are written for the 48K RAM Spectrum.

Alphabet Games

Three games of letter recognition (using either upper or lower case) to help children learn the alphabet and find their way round the computer keyboard.

Alphagaps – The full alphabet is displayed, along with a second, incomplete version. The child must fill in the missing letters.

Random Rats – Press the letter key that is displayed on the gun to destroy the rats which have invaded the cellar!

Invaders – Stop little green men from landing on Earth by pressing the appropriate letter.

Early Punctuation

While an animated matchstick man marches above displayed sentences the child must decide which punctuation mark is missing and where to insert it. At the touch of a key the matchstick man drops the mark into place. After successful completion of every sentence in the exercise, light relief comes in the form of a bottle-shooting game!

The Apostrophe

As each sentence is displayed, a bird appears with a worm in its beak. The keyboard is used to move the bird and drop the worm into the correct place for the apostrophe. When ten sentences have been corrected, the Grub Game is displayed. Press the correct character to change the grub into a butterfly...before it munches through a flower!

Capital Letters

A program to teach the use of capital letters. Sentences incorporating proper nouns and sentences without opening capitals are displayed. The child inserts the correction by guiding an animated figure to the appropriate letter.

For each correct answer an apple grows on a tree. After ten correct answers the child's skills in recognising letters and using the Spectrum keyboard are needed to save the apples as they fall to the ground.

Speech Marks

A comprehensive program including sentences with one or two sets of speech marks ("inverted commas") and exercises in both direct and reported speech.

Using the Spectrum keyboard, a cursor is used to guide speech marks to the correct position. The program offers three levels of difficulty, with full examples for each section. Guide Max the mouse through a maze, after the correct completion of five sentences from each section, but beware of Persian cats!

Castle Spellerous

A spelling game with ten levels of vocabulary, including words with silent first letters, double letters and other difficult words. The Princess has been captured and carried off to Castle Spellerous. Helped by ten soldiers, the child can attempt a rescue by giving the right answers. Part of a siege tower is built for each correctly spelt word. Mistakes are costly – the wicked wizard appears as a vampire bat, turning the men into frogs, butterflies and bats!

When ten words are spelt correctly the rescue begins and the wizard takes flight.

SINCLAIR + MACMILLAN: A NEW DIMENSION IN EDUCATIONAL PROGRAMS

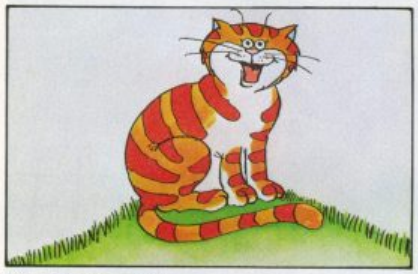
Sinclair have joined forces with Macmillan Education to produce a completely new and different range of educational software. The results so far can be seen in these exceptional programs.

The Learn to Read series is derived from Macmillan Education's best-selling primary school reading scheme, Gay Way. It offers a unique opportunity for parents and teachers to participate in the child's first experience in reading.

Macmillan Education's Science Horizons is one of Britain's most successful school science schemes. Each program concentrates on key scientific ideas and, through simulation of real life, makes the learning process entertaining and enjoyable.

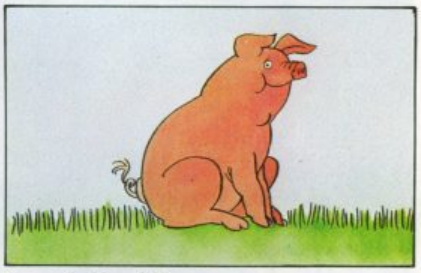
Learn to Read 1

Learn to Read 1 is designed for children who are just beginning to read. It is in four parts, each of which develops skills central to the reading process – letter recognition, sight vocabulary, early spelling and memory. The program is full of colour and fun and children will enjoy learning to read as they meet the animal characters – Ben the dog, Jip the cat and their friends.



Learn to Read 2

Learn to Read 2 extends the fundamental reading skills practised in the first program, as well as encouraging logical thinking. The child's vocabulary is gradually built up as new words such as "red," "green," "car," "ship" and "bus" are introduced. In addition, Learn to Read 2 features an attractive 'reward' system enabling children to see their achievements grow.



Learn to Read 3

Learn to Read 3 builds on the child's progress so far, so that he or she can gain the confidence to move on through the complex reading process. Learn to Read 3 features four different activities, all of which are colourful and lively. Further vocabulary is introduced until the child is reading more than 30 words.

Learn to Read 4

Learn to Read 4 is the alphabet program in the Learn to Read series.

Using various stimulating activities the program gives the child plenty of practice in working with the alphabet – matching initial letters to words and pictures and spotting missing letters. These exercises build familiarity with simple sequences within the alphabet.

Learn to Read 5

Learn to Read 5 teaches positional language – often difficult to understand and remember – by using words and phrases such as "behind" and "in front of," "inside" and "outside."

The program first demonstrates the meanings of the words using clear pictures. It then tests the child's understanding of the words in two lively games.

Cargo

Set sail around the world. Choose your ports of call – New York, Tokyo, Belem, Helsinki – then the real challenge begins! You must reach your destinations safely, weathering storms on the way. But first, load your cargo – using all your knowledge and skill. Poor loading can mean capsizing and sinking. Your rank, if not your life, is always at stake!

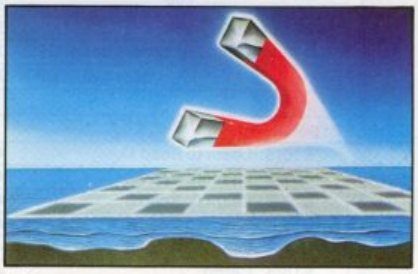
Glider

Be a glider pilot! The glider models real-life gliding conditions so that you can learn through experience. As the pilot you must consider the time of day, the amount of cloud cover and the kind of terrain below you in order to find the up-currents of air that will keep you airborne. Try to fly as far as possible and, when you are high enough, navigate your way back to your home airfield and land safely – if you can.

Survival

Discover what it is like to be an animal in the wild! Be a lion stalking your prey, escaping human hunters. Or be a hawk, mouse or even a butterfly, searching for food and avoiding predators.

Survival models the natural world and brings to life hazards that different creatures must face in their struggle to stay alive.



Magnets

With an army of small magnets you set out to conquer the powerful supermagnets of your opponent. You have one weapon – your forces of magnetic attraction and repulsion.

The strategy is simple: attract smaller magnets to build strength to repel the super-magnet. When cornered, just turn your poles on your enemy and see what happens!

Learn to Read and Science Horizons programs are written for a 48K RAM Spectrum, and are supplied complete with comprehensive supporting documentation for parents and teachers.

ZX INTERFACE 2
THE NEW ROM CARTRIDGE AND JOYSTICK INTERFACE

Now available in shops

Loads programs instantly
Takes two joysticks
Just plug-in and play

The ZX Interface 2 is the latest new peripheral for the ZX Spectrum system. It enables you to use new ZX ROM cartridge software: plug-in programs that load instantly. There are ten terrific games already available on cartridge. ZX Interface 2 also allows you to use one or two standard joysticks without the need for separate special interfaces.

To use new ZX ROM Cartridge programs, just connect Interface 2 to the rear of your Spectrum or Interface 1 and plug in the cartridge of your choice. Switch on and the program is then loaded, ready to run!

You can use any joystick that has a 9-way D plug. Use one or two of them for extra fun with suitable ZX ROM cartridge or Sinclair cassette programs – or with dozens of other Spectrum programs.

ZX MICRODRIVE/ ZX INTERFACE 1

The ZX Microdrive System is unique. This compact, expandable add-on system provides high-speed access to massive data storage. With just one Microdrive and a ZX Interface 1 you'll have at least 85K bytes of storage, the ability to LOAD and SAVE in a matter of seconds, the beginnings of a local area network of up to 64 Spectrums *and* a built-in RS232 interface. The cost? Less than £80.

How to get ZX Microdrive and ZX Interface™ 1

Spectrum owners who bought direct from us by mail order have been sent full details. Order forms are being mailed in strict rotation. If you haven't yet received your order form please bear with us. We're making good progress in meeting the huge demand.

If you didn't buy your Spectrum by mail order, send us the form at the bottom of this page and we'll add your name to the mailing list.

How to order

Complete the appropriate sections on the order form below. Note that there is no postage or packing to pay on software purchases. Orders may be sent FREEPOST (no stamp needed). Credit card holders may order by phone, calling 01-200 0200, 24 hours a day. Please allow 28 days for delivery.

™Sinclair, ZX Spectrum, ZX Microdrive, ZX, ZX Interface are trade marks of Sinclair Research Ltd.

GRAPHICS

By Garry Marshall

FANCY MAKING A DOUGHNUT?

This issue we present a short graphics program that shows how easily a complex shape can be plotted in a realistic way.

The object that is displayed has the shape of a ring doughnut, and its proper name is a Torus. By starting with a circle and a line that does not cut the circle anywhere, the shape of a Torus can be swept out by revolving the circle around the line. The accompanying illustrations, which were generated by our program, show cross-sections through the doughnut, all of which take the form of rings.

The program is written for the BBC Model B microcomputer and uses its highest resolution graphics mode. Since the only graphics commands in the program are the ones to set the graphics mode, and MOVE and DRAW, it is a simple matter to convert the program to run on any other micro having high-resolution graphics facilities.

The views of the Torus are drawn as they would be seen from a considerable distance. This simplifies the problem of constructing a perspective view. The direction of viewing is fixed by the two angles A1 and A2 as shown in the illustration.

The same names are used for the corresponding variables in the program. In fact these two angles are exactly those used in a co-ordinate system that is an invaluable aid in solid geometry and they are also used in astronomy, one of the angles is the azimuth.

In the program, R1 is the radius of the circle that sweeps out the Torus and R2 is its distance from the line about which it revolves.

The arrays X and Y hold the x- and y-coordinates of points on each cross-section of the Torus that is plotted. All the other variables hold intermediate results.

The illustrations were plotted using the following values.

For the first, R1 and R2 were 50 and 250 respectively, and A1 and A2 were both 45 degrees. For the second, R1 and R2 were 25 and 250, and A1 and A2 were both 60 degrees.

The program that produced the first Torus was the listing shown at the bottom lefthand side of this page.

These two illustration show the Torus plotted using the information in my article.

A FEELING OF DÉJÀ VU?

"Dear Sir", writes a reader from Cumbria, "after careful study of the Seventh Empire maps for November and December I think JADEG will provide the best trade index (about 1050).

"Furthermore I feel that only 23 battles will take place; with bonuses of −2 at XAPUS and −3 at GIRIX.

"All of these predictions will surely come about unless the JADEG "mole" is discovered in time.

"Please send me some software for my BBC model B as a prize when JADEG romps home again in January!"

I was rather surprised to find such a letter waiting for me. Did this man have hidden powers? Could he really predict so much detail about forthcoming games? There had to be a simple explanation; and unfortunately there was.

For some reason known only to the office Pet — the computer kind — the machine did not accept any of the moves which I so carefully typed in for turn 5 of the game. This is why the results as printed in December's issue are so similar to the previous set! In fact, most are identical apart from the odd imperial ship.

So I gathered the crumpled order forms from the darkest recesses of the *C&VG* office and typed them in again. With everything crossed that was physically possible I set the computer to re-process turn 5. And hey-presto, as they say, everything seemed to work fine!

So it appears that the results as printed in December's issue were incorrect. Therefore, we're going to forget that they ever existed and on this page you'll find the result of turn 5 again, but correct this time.

Your orders are due in for turn 6, which will now run in February's issue. If you have already sent turn 6 moves, I'm afraid that you'll have to send them again as your positions in the galaxy will have changed.

The computer will, as usual, be available on Friday afternoons if you'd like to give me a call. I should then be able to tell you your current positions if you have your code number handy. You'll find the 'phone number in the Seventh Empire rulebook.

TRADING COMPETITION

Quite a few people have applied to join the game during the last month, but I have not entered you as you would not have been able to supply moves in time. However, I'll keep your names. Then, if the game is restarted you will be on the top of the pile. Now, forgetting that December's page ever existed, here are the results of turn 5. Starting as always with the trading competition. Highest trade index is a LOKIK, with a value of 800. From a large pile of entries, there were 2 correct answers. The high scorer in the trade index was correctly predicted by Barry Wooffitt and D. Gritz. If these people could contact me with details of their computer I'll send you some software for your efforts.

BATTLE REPORT

Just ten battles were fought during turn 5, and again none was successful. Battle bonuses are all zero. The raid penalty is still 1. The new positions of the imperial ships and their controlling players are like this . . . D'Taan's Science empire is at soner and controlled by player 3201. Sun is at Widan (player 1781), Pirate is

	Compare new star to the star you left	Moving orders
MOVE:	Does it belong to a **friendly** empire? Is it 1 square away, either vertically, horizontally **or** diagonally?	
TRADE:	Does it belong to a **friendly** empire? Is it 1 square away, either vertically, horizontally **or** diagonally? Is it a **different** star **type**?	
RAID:	Is it 1 square away, vertically or horizontally but **not** diagonally?	Is it the **first** movement phase?
	Does it belong to an **alien** empire?	Is it **followed** by a Return order?
RETURN:	Is the fleet Returning to a star belonging to the **same** empire as it left on the first movement phase?	Is it the **second** movement phase?
	Is it 1 square away, vertically or horizontally but **not** diagonally?	Does it follow a Raid order?
ATTACK:	Does it belong to an **enemy** empire?	If it's first movement phase, is it followed by a Stay order?
	Is it 1 square away, vertically or horizontally but **not** diagonally?	If it's second movement phase, did fleet move in its own empire on first movement phase?
STAY:	Is fleet staying at present star?	Was your first order anything but a Raid order?
CARGO, JUMP AND PLUNDER:	Does fleet start game turn at a Gateway Star?	Has it only one order over both movement phases?
	Does it move to a Gateway Star?	Is the other movement phase crossed out?
	Is it a different Gateway Star?	

Friendly = Empire which a fleet's current empire is **not** at war with.
Enemy = Empire which a fleet's current empire **is** at war with.
Same = **Same** empire as the one you've left.
Alien = A star belonging to an empire **other** than the one you left.

The Checklist Chart is one way of ensuring that you have not entered an illegal order which may result in one of your fleets becoming lost in space.

Whatever movement orders you have given each of your seven fleets, they should be checked against this chart. And if you can answer "Yes" to each of the questions set out there, then the move is a valid one.

If you come up with a "No" then the order is illegal in that context. In order to prompt "Yes" answers, some of the questions are phrased in an unusual way.

TH EMPIRE

not placed but is now under the control of player 2064, Bloodline at gazor (1780). Deat at Yuses (2754), Amethyst at usug (1877) and water at Mupip (player at 2182).

SCORES

Top scorer for turn 5 is N. Faruque, who scored 6000 this turn. Owing to last month's error, overall scores for the next 2 turns will also include any profit generated by the machine during the first run of turn 5. However, all scores are relative and the top ten should not be affected. The rest of the top ten for turn 5 looks like this ...

From positions 9 to 1, players 3201 (5999 points), 3362 (5222), 3183 (5111), 1925 (5000), 1781 (5000), 2726 (4925), 3420 (4850), 2428 (4000) and player 1698 who also has 4000.

To find your own profit for turn 5, use the table above which should be right this month! Cargo profits are printed normally, while plunder profits are reversed.

The star travelled from is printed in full down the left hand side, while the star travelled to is abbreviated along the top.

Orders are now due in for turn 6. As I said before, any orders already with us for turn 6 will have to be sent again. Because of this, though, I will accept orders from these players over the telephone but ONLY between 11am and midday Monday to Friday. We're afraid that there will be nobody available at other times.

Please use the 'phone number as given in the rulebook, and ask for the Seventh Empire orders dept. Closing date for moves is Wednesday 21st December 1983.

fantasy SOFTWARE

THE PYRAMID is an arcade style game which has a very adventurous feel to it.

The Pyramid contains 120 chambers on 15 levels. In order to get from one chamber to another you must fight off the indigenous aliens to collect an energised crystal which will neutralize the force field guarding the two exits.

The Pyramid is inhabited by a total of 60 wierd and exotic alien types, all of which are beautifully animated. You will meet a whole variety of demons, droids, insects and monsters, with a sprinkling of the more unusual, the extra-terrestrial tweezers, galactic strawberry, cosmic claw, mutant eye, plus a whole host of entities that defy rational description. You will no doubt invent your own nicknames.

You proceed to explore the Pyramid from top to bottom with the difficulty generally increasing with the depth of level. Depending on the choice of exit from each chamber you are likely to have a different game every time you play.

Apart from the challenge of trying to achieve the highest score possible the pyramid contains a number puzzle to solve. The more chambers you successfully visit the more information is gathered to enable you to discover the secret numbers of the pyramid. The puzzle won't take you a few days to solve, it will probably take you a few months.

This is "ZIGGY". He is shown above in his exploratory capsule and is a true representation of the on screen graphics. You have total control over his movements as you explore the many chambers of "THE PYRAMID".

FANTASY SOFTWARE is available from W.H.Smiths, John Menzies and Computers For All

Compatible with all leading joysticks.

THE PYRAMID

For 48K Spectrum

THIS ONE YOU MUST NOT MISS!

Games galore in our bumper February edition with the action-packed Book of Games attached.

The Book of Games will be a 52 fun packed bumper add-on to your favourite computer magazine. All the top micros will be featured — with a couple of games for each machine all tried and tested by our review team to ensure top quality games.

We also intend to have a few surprise competitions thrown in with some of the listings to give our Book of Games that special added ingredient — more fun! So rush out to your newsagents on January 16th and get your hands on this extra special issue of *C&VG!*

And at last we hope to be bringing you the long awaited and much heralded Coleco Adam competition! Yes, we're finally going to get our hands on some of these computer systems from the people who brought you the ColecoVision video games centre.

Professor Video will be lecturing again in our Video Gaming pages with tips on Q*Bert and we'll also be bringing you all the latest news plus our regular Joystick Jury reviews.

The Seventh Empire WILL be striking back! All you long suffering Empire addicts shouldn't despair as the end — and the grand prize — is in sight. The glittering prize could be yours if you've managed to stay the course!

All that plus our regular articles and features which bring the wonderful world of computer gaming into your home.

Our brand new Program-Extra feature offers educational tips based on our games plus an extra helping hand for people who have just bought their micros.

Bug Hunter will be on hand to deal with any nasties who crept into your programs over the festive season.

Keith Campbell will be back on the trail of treasure, demons, dragons, and elves and bringing news of a fun competition where you could be the lucky winner of Melbourne House's brand new Sherlock Holmes game.

We will be announcing the winners of the Golden Joysticks Awards.

Throughout the year you have been filling in and sending us your votes for Best Arcade Type Game, Best Strategy Game, Best Original Game, Game of the Year and Software House of the Year.

The much sought after golden joysticks will be presented to representatives of the winning software houses at a special presentation lunch to be held in London in January.

But it's not just the software houses who will be receiving the goodies in our February issue. We will be also announcing the lucky ten winners of our Decathlon competition — each of whom will be receiving an Atari VCS plus three of Activision's latest games to go with each.

There will be an exclusive interview with the world's number one video game designer — Mr Pitfall — David Crane.

We also plan to bring you a round-up of computer add-ons to compliment our Games Players' Guide to Micros in our December issue. Plus a look at all the latest joysticks for micros and video games centres.

We might also be able to squeeze in a feature on laser discs and you'll soon be able to interface them with your friendly home computer and play even better games.

Me'n my newsagent are real close. His name's Bill or Fred or something ... Anyway we got an arrangement. Every month, you know what he does? He looks out my copy of *Computer & Video Games* and keeps it, just for me.

So none of the other punks on the street can get hold of my copy. And that's important to me. Mebbe it's important to you too. So go n' see your newsagent with that coupon below all filled out. If he's like Harry here, you're gonna like him.

To my newsagent: Please deliver/reserve me a copy of Computer and Video Games every month. Price 85p.

Children under 16 £1.50

AT LAST, A HOME COMPUTER THAT IMPROVES WITH AGE.

It's surprising how many first-time relationships with a home computer go sour with age.

You buy an attractive, discounted little machine so that you and the children can learn about computers.

Instead, you learn about its limitations: the dull graphics. The plugs that fall out. The cheap power supply. The unalterable "beginners" language. The stiff, fragile keys. No provision for future developments. If only you'd looked around a bit in the beginning...

"Quality costs a little more, but it's usually worth paying for" (Personal Computer News – CGL M5 Review, June '83.)

The CGL M5 is designed and built by Sord, one of Japan's leading computer specialists, with three main ideas in mind.

First, to be easy and fun to learn and operate.

Second, to be rugged enough to last through hours and hours of operation.

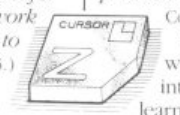
And third, to form the basis of a powerful, versatile home computer system that won't need replacing until you're ready for a dedicated business system.

Built to learn

The CGL M5 is designed to be easy for non-geniuses to use.

"On the M5, most of the work is done for you, and all that is left is the need to work out what to do next, rather than how to do it." (Personal Computer News, June '83.)

If you make a mistake, you can correct it with a simple movement of the cursor. So you only correct that mistake, not a whole line; nor do you have to indulge in complex edit commands.



Budding video game designers and computer artists will love to get their hands on the 16 colour graphics and 32 moveable images called "sprites."

"The M5 makes professional graphic effects very simple for even the beginner to achieve." (Personal Computer World, Aug. '83.)

Built to last

"It works first time, doesn't need a lot of mollycoddling and jiggery-pokery to persuade it to continue to do so, and what's even better, it continues to work well. You don't have to balance cold cartons of milk on the top, shove matches in the back to keep the plugs in, or press the keys with several pounds force to make them respond." (Personal Computer News, June '83.)

Being able to build things that work and carry on working without endless maintenance is something at which the Japanese seem to excel.

Built to grow

To be truly versatile, a home computer has to understand very different things.

So you need different "languages," which the M5 provides by supplying part of its memory in plug-in cartridges.

"The M5 eliminates the worst limitations on machines at this level, which is that they tend to be stuck with whatever language is provided by the management." (Personal Computer News, June '83.)

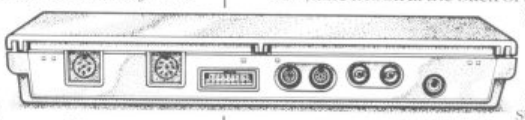
The computer is supplied complete with a Basic-I cartridge, a standard integer BASIC language and a simple learning text.

Plug in the Basic-G cartridge, and you can access the M5's incredibly sophisticated graphic and sound capabilities which are far in advance of similarly-priced computers.

Move on to the Basic-F cartridge, and you have scientific, technological and statistical computing power usually available only on big computers with equally big price tags.

The FALC cartridge provides a tailor-made language for data management, spreadsheet accounts and business problems. Combine FALC with a disc and you could *"turn the M5 into a small business machine."* (Personal Computer Magazine, August '83.)

Now, take a look at the back of the M5.



Notice the sockets (usually an extra) for a standard Centronics-type printer, the separate video monitor and hi-fi sound output.

Even the language cartridge socket has hidden potential:

"Unlike most such sockets, this one has 56 internal lines connected to it giving access to just about every function in the computer. This means that just about everything you can think of can be added onto the computer, ranging from a Prestel interface to second processor to use as an intelligent terminal on a timesharing computer"... (Electronics – The Maplin Magazine, March '83.)

Take a look at the home computer that will improve with age.

For a full technical specification of the CGL M5, details of the wide range of supporting software and to find out where to see a complete demonstration, send the coupon to: CGL, CGL House, Goldings Hill, Loughton, Essex IG10 2RR. Telephone number: 01-508 5600.

I'd like to know more about the CGL M5. Please send me a brochure and a list of dealers.

PARAMOUNT SOFTWARE

A Registered Trading Name of Workstations Ltd.

VIC 20 8K or 16K Expansion.

CHOCABLOC – *A fast moving, pure Machine Code action game, with Chocabloc our hero trying to sort out some Real Cool Choc Bars – until everything goes crazy and the action is on! Arcade standard. Fully featured. Excellent sound and graphics. Keyboard or Joystick.*
£6.50

OUTBACK – *Can you use the very sophistocated defence set-up to beat off the cunning Swagmen ? How long will you survive ? Pure Machine Code action. Fully featured. Superb colour and graphics. A game with a difference. Joystick.*
£5.50

Any VIC 20

VIC 20 8K or 16K Expansion.

COUNTDOWN – *Time is important. Accuracy essential. Courage mandatory. But above all, Nerve is the prime attribute needed for your mission as an agent in the crack S.M.U. A Superb Arcade/Graphical Adventure. Keyboard or Joystick.*
£5.50

MEGAWARZ– *Where does your fantasy go when your mind leaves your body? Megawarz will take you there you can be sure. High resolution, multi-colour graphics. Sprite graphics. Synthysound. Pure Machine Code action. Arcade standard. A magical planetary trip. Keyboard or Joystick.*
£7.50

Commodore 64

Dragon 32

CASTLE OF DOOM *Fully implemented graphical adventure. A compelling and devious plot which retains excitement and interest to the end – if you ever reach the end ! An experience in adventuring not to be missed. It's user freindly too !*
£6.50

JOGGER – *Truly a jogger amongst joggers. If you have trotted with the rest, now run with the best. Machine Code action Superlative sound. Creative colour. A quality programme from Paramount. Joystick.*
£5.50
Any VIC 20.

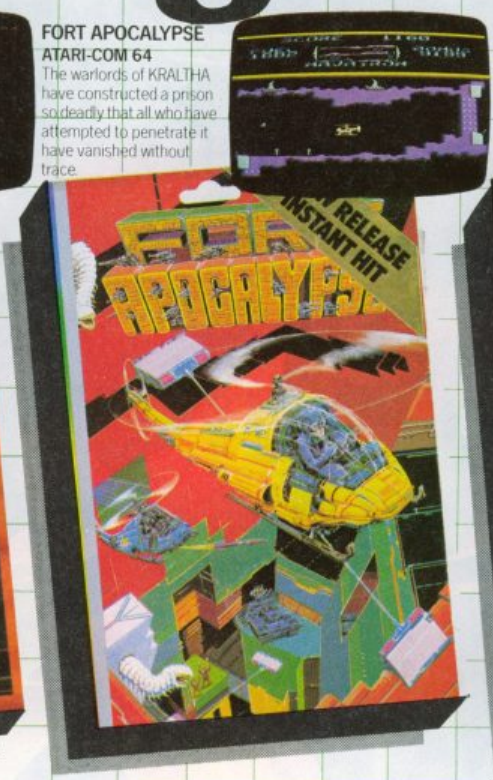
For big softies

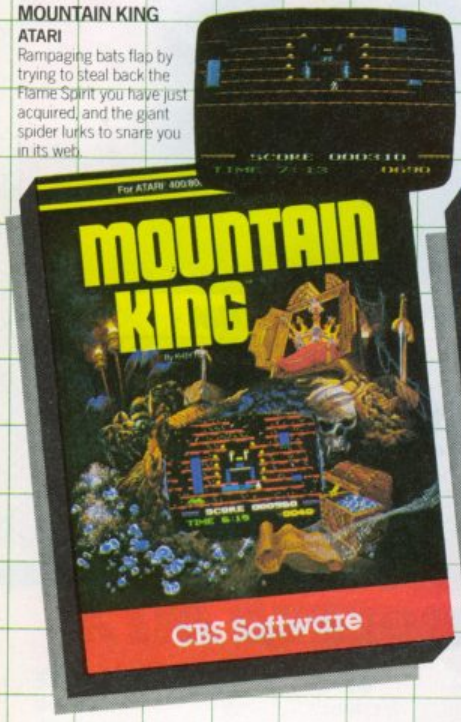
MOON SHUTTLE
ATARI-COM 64
As the pilot of this spectacular Moon Shuttle flight, you repeatedly encounter unexpected dangers as you blast through asteroids, bomb launchers and man 'o' wars.

FORT APOCALYPSE
ATARI-COM 64
The warlords of KRALTHA have constructed a prison so deadly that all who have attempted to penetrate it have vanished without trace.



CHOPLIFTER!
ATARI-COM 64
Most of us would like to be heroes. Trouble is we're often not properly prepared when the chance to do something heroic comes along. This is your chance.

MOUNTAIN KING
ATARI
Rampaging bats flap by trying to steal back the Flame Spirit you have just acquired, and the giant spider lurks to snare you in its web.



WIZARD OF WOR
ATARI
Can you defeat the Wizard of Wor? A host of monsters both visible and invisible, a changing pattern of mazes, and the wizard himself to contend with.

BLUE MAX
ATARI-COM 64
You are the Blue Max of the R.A.F. in command of a biplane fighter/bomber. Your mission is to pulverise the enemy's airfields and bridges. But watch out for the enemy fighters!

Atari 400/800® software

Dealers!—for information on how to become a CentreSoft stockist:
Write to CentreSoft House, Unit 16, Tipton Trading Estate, Bloomfield Road, Tipton, West Midlands DY4 9AH or telephone 021-520 7591.

s-everywhere!

When it's a Number 1 hit in Houston—we're already selling it in Euston! CentreSoft cream the best of U.S. and British software and rush it through our Nationwide network within days of launch date. If it's new, if it's exciting, if it's the best, CentreSoft put the action on your High Street!

You can buy with total confidence from any of the CentreSoft retailers below because we guarantee replacement—free of charge—on any faulty media.

If you haven't bought your own Home Computer System yet, all of the retailers shown carry a big choice of Hardware. Why not call in, for a quote, and a 'hands on' test run?

By the flick of a switch you could unleash the power of Genon in your own living room! But by thoughtful strategic play you could overcome Genon.

The only way this can be done is by destroying the powerful computer that controls all things.

After being transported to the Corridors of Genon you'll need your wits about you to master the door codes and venture through the corridors to locate the computer. While this is going on the computer will know your exact whereabouts and try to force you into a mistake by closing doors around you.

The computer also controls Bogul – the guardian of the corridors who can reduce your thought power (ESP) every time it finds and bogulises you, so you'd better listen out for its approaching footsteps!

Should you locate the computer and should your ESP be sufficient you'll have to pull on all your energy to try and master the 3 digit self destruct code.

With this done, now is the time to escape from the corridors. No door codes to worry about this time. But its no easy task as Bogul will have cloned – how many times though? Well that depends on how long you took to crack the self destruct code. There could be as many as eight! And you'd better be careful as only one Bogulisation and you've had it!

Full colour graphics, sound effects and, of course, 3D machine code action as you would expect from Malcolm Evans 'the 3D expert'*, to push your 48K Spectrum to its limits. 'Corridors of Genon' is supplied with a keyboard overlay and is also compatible with the Kempston joystick.

If you survive this you could try . . .

** Computer & Video Games*

We're not quite sure whether the World's ready for these games . . . but we've released them just the same.

VOYAGER SOFTWARE

DRAGON 32

The Marcon Empire have invaded Earth and enslaved the population. An endless stream of stellafreighters now plunder the earth's mineral wealth, draining the very lifeblood of the planet.

A small band of freedom fighters are still operating from an abandoned mining station on the Moon, one of them is you.

As you set out from your secret base your first objective is to manoeuvre through the barrier of lethal space mines to one of the enemy re-charging stations to re-charge your neodinium lasers; then you will be able to carry on with your mission of destroying the marauding stellafreighters.

There is rumour of a Marcon munition station near by, heavily defended by missiles. If only you could locate and plunder it, your heroic band of avengers would then have enough fire power to strike a massive blow for freedom . . . or die in the attempt . . .

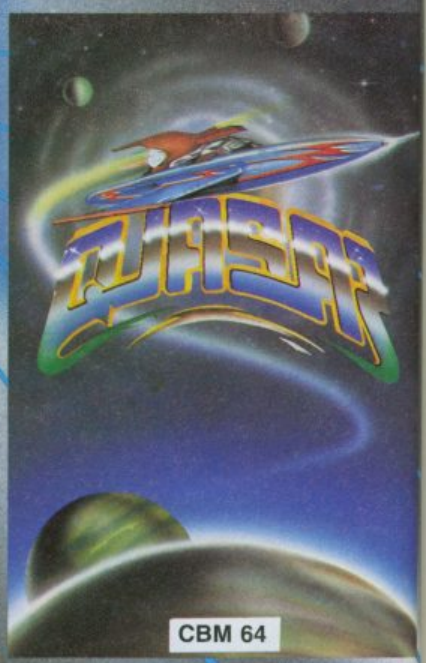
Avenger is for the Dragon 32.

Tension mounts as your Stratofighter enters the patrol area. Enemy Skyfreight Convoys are increasing as their need for Ividian Ore grows in the arms race against you.

Your raydon missile sight picks up an enemy convoy entering your quadrant. You select hyperdrive and are slammed back in your seat. Fingers hover over firing buttons as enemy fighters peel away from the convoy to engage you. As your epic battle begins the enemy Skyfreighters unleash wave after wave of air to air missiles against you. The battle rages on and your will to survive and determination to win increases. The convoy must be destroyed: your people are depending on you.

Night falls and glaring explosions fill the sky; don't let your concentration wander, if the convoy gets through your people are doomed, you must succeed, you must . . .

Attack Attack is for the Commodore 64.



CBM 64

Your mission: destroy the Ekron rocket base on the planet Hagon.

Piloting the most sophisticated space fighter yet conceived you know that if your missiles fails the awesome Ekron rocket attacks will destroy your galaxy.

Entering the fearsome space tunnel, the first of Hagons many sophisticated defence systems, every fibre of your being is filled with dread.

The Hagon fleet have been alerted and wave after wave of Astrofighters come hurtling toward you. As you battle your way to the end of the tunnel you begin to realise just how suicidal this mission could be.

Zooming through Hagon's defensive asteroid belt your concentration intensifies; you have only a fraction of a second to differentiate between asteroids, space mines and Ekron rockets as they flash toward you.

Hugging the planet's surface, dodging defence poles and trying to deal with everything else the Hagon's throw at you, you remind yourself that the fate of an entire galaxy rests on the outcome of your mission; you must succeed . . . Quasar is for the Commodore 64.

Known by some as 'getting knotted'. You won't find a game for the 48K Spectrum quite like this anywhere else!

Imagine yourself in a capsule hurtling through a void while leaving a trail behind you. The only manoeuvres possible are up, down, forward, left and right. How long can you survive without crashing into your own trail? As the trails build up so your reactions will need to sharpen up. To make the game that little bit more interesting we've added the complication of up to four rogue chasers that attempt to block your path. The challenge is not only to avoid the chasers and score points but to try and work out a playing strategy – you won't find this easy!

Naturally you'll be terminated when you out manoeuvre yourself and get caught in 'the knot'!

Don't just take our word for it –

'A highly original, professional and exciting game and one that I could play all night – very highly recommended' – ZX Computing.

'Knot in 3D must be one of the most beautiful, graphically, games to be seen on the Spectrum' – Popular Computing Weekly.

'Even 3D maze games can get repetitive but Knot in 3D contrives to be an interesting and innovative game by standing the 3D maze concept on its head'. – Personal Computer News.

'Most 3D games have either a graphic display or an addictive playable game – but not both, this is one of the few that combine these qualities'. – Computer & Video Games. But that's not all . . .

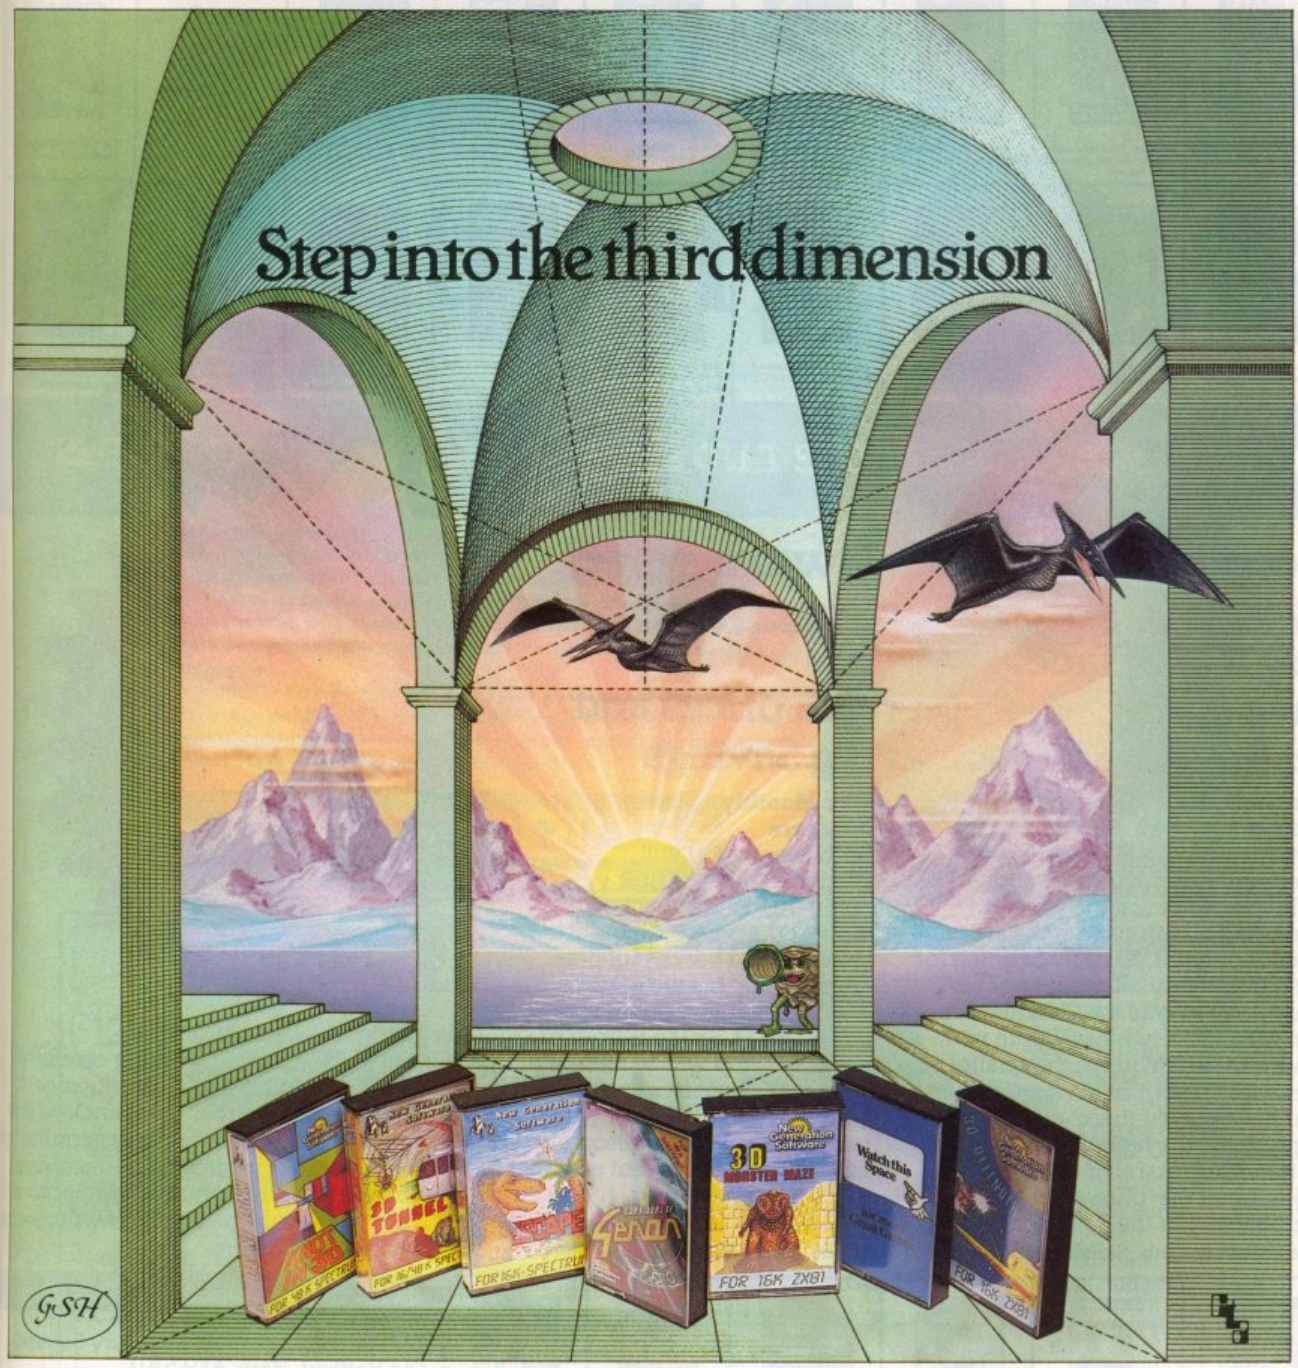
DEALER ENQUIRIES WELCOME



Take a giant step closer to reality with New Generation Software. The 3D Graphics of New Generation programs bring the screen alive and makes other games look as flat as snakes and ladders.

Spectrum owners will find that seeing is believing when they open the door on 'THE CORRIDORS OF GENON', the latest creation from New Generation. You will be saving the Universe from the evil that now controls all things. But beware – the sound of footsteps approaching could be Bogul!

Hurtle into a void leaving a trail for your unseen pursuers in 'KNOT IN 3D'. Weave your way through up to five trails but be careful, you could get knotted! Or travel through the depths of a moving tunnel full of bats, rats, spiders and toads in '3D TUNNEL', with a special surprise in the 48K version.

Stamina is the vital ingredient of 'ESCAPE', as you'll be venturing into the maze pursued by walking and flying dinosaurs.

ZX81 owners must be prepared for the shock of coming face to face with the T. Rex that leaps out from '3D MONSTER MAZE'. '3D DEFENDER' takes you out of this world and plunges you into space in a fast moving game to defend your home planet against alien spacecraft in a blitz of explosions, plasma blasts and photon beams.

All these exciting 3D games have been designed by Malcolm Evans, the 3D expert. They'll have you leaping out of your seat because you don't just play New Generation games, you live them.

Corridors of Genon for 48K Spectrum £5.95
'It is a superb program, and a well conceived plot. Brilliant!' 'Value for money 100%' Home Computing Weekly

JOIN THE SOFTWARE CLUB AND SAVE £££ ON YOUR TAPES ...

Home Computer Software

SPECIAL INTRODUCTORY OFFER!

Buy any 3 Tapes
Save up to £18.43 on retail prices and get further Software at Big Savings

CHOOSE ANY 3 FOR ONLY £2.99 EACH PLUS P&P

Join the Software Club and enjoy the better way to buy your software by simply returning the coupon below – select any three of the introductory software from the large selection illustrated on this page at the amazing price of only £2.99 each. Sending for the introductory offer does not bind you in any way to the Club and we don't require any money until you have had time to judge the quality of the tapes, in your own home. When you have played them, and appreciated the high quality you will be taking the first step towards enjoying all the 'plusses' of your membership in the Software Club

Free Monthly Colour Brochure

Each month you will receive a copy of The Software Review, packed with all the very best software and the best of pre-releases – all that we request of you is that you purchase a minimum of six tapes from the many hundreds you will be offered during your first year as a member of The Software Club. When you see the vast range, at the heavily discounted prices you will probably want a lot more, but that's up to you.

*All prices quoted are manufacturer's recommended prices.

All you have to do

Fill in the coupon, marking carefully the Code Nos of the 3 Introductory Tapes you require. Do not enclose any money now – we offer only genuine tap – from all the leading manufacturers backed by our no quibble replacement service should you have any problems with our software.

The Software Club, Salisbury Square, Old Hatfield, Herts AL9 5AD.

C & VG SOFTWARE FORM

Have you written a games program which you feel is just right for C&VG? If so we have come up with a form to ensure that we can test it out and give you our views on it, as quickly as possible.

We would prefer a tape and listing but can work from just a tape and will return it to you if it doesn't find its way into the magazine. We will also need an additional sheet explaining the game and its theme. And any documentation like lists of variables or how certain routines are working, would be of great help to beginners. Please make sure that your name, address and the program name is on everything you send us, including the cassette itself.

This form will merely help us to keep a check on your game as it goes through our testing process and make sure we have all the information we need to present it properly in the magazine.

If you don't want to cut up the magazine, we will accept photocopies or close copies of this page. This form will be appearing regularly in C&VG issues from now on.

Remember we pay £10 for each listing published and you could win our Programmer of the Year Contest where we will try to turn the winner into a best-selling games author.

HOW-DE-DO PARDNERS?

YEP FOLKS — IT'S HERE "CALIFORNIA GOLD RUSH"

This here's Prospector Jake. I sure am havin' one helluva time tryin' to peg ma claim with those damned Injuns a hootin' and a hollerin' all over this territory. Ma job gets harder as I move from one Gold Field to another. I know, that is me an' ma stubborn hornery ol' Mule here know of 24 rich an' I mean rich seams of pure Gold. All it needs to make this here ol' critter happy is that you help me peg every doggone last one of them claims.
Can YOU help Jake become rich, help him peg his claim, dodge the arrows, avoid the tomahawks, and plant the Dynamite in just the right place? . . . YOU CAN!!!

YIPPEE . . . Git yer Picks an' Shovels and join the CALIFORNIA GOLD RUSH . . . NOW

Amazing Arcade Action . . . Stunning Sound and Graphics
Available NOW for Commodore 64, Spectrum 48, and Dragon

More
WINNING GAMES
from
LYVERSOFT
LUNAR RESCUE (48K SPECTRUM)
A team of research scientists are trapped on the moon and you have to pilot the rescue pod from the mother ship and ferry them back safely. But you have only space for one scientist at a time. 100% M/C action with super smooth HI-RES GRAPHICS AND JOYSTICK OPTION.
LIBERATOR (16K/48K SPECTRUM)
This game tests your aim and reactions as you command a gunsight on a homeward bound space freighter. Your cargo is the royal treasures of the empire and many people want them. A machine code presentation that should have you hooked.
THUNDERHAWK (48K SPECTRUM)
Based on the popular arcade game Pheonix. This 100% full colour epic pitches you against the evil Albertrons who are set to destroy your race, five levels of fast action bring you to the command centre of battle fleet, can you finish the job. WITH JOYSTICK OPTION
GOLF (48K SPECTRUM)
Using M/C graphic routines, a game to absorb the keen novice and the scratch player. Play on a 9 or 18 hole course, with full selection of clubs. Along the greens and fairways hours of addictive sport can be had.
PICTURE PUZZLE (DRAGON 32)
With HI RES graphics and 100% M/C. You are set the problem of putting the picture back together. Test your skill against the dragon 32 computer. A game guaranteed to hold you spell bound for hours.
ANDROID INVADERS (DRAGON 32)
In a change of tactics the beings beyond the stars have developed an android of human form to do their dirty work. And with the aid of sensor jamming they may prove formidable. Using full colour, M/C, hi-re graphics this game can offer up to 21 levels of combat.
VOYAGER (VIC 20 8 OR 16K)
The mission is simple, but its completion is far from being so. As captain of starship you have all the best facilities at your disposal. Unfortunately the klingons oppose you. A great M/C version of this classic computer game.
SPHINX (VIC 20 8 OR 16K)
A riveting, full colour graphic adventure. That pits you against the spells and guardians of the tomb. In your quest to uncover the treasure of the pharoahs. This game will have you enthralled.
BIRD OF PREY (BASIC VIC 20)
Evil baron von fritz is out to kill his cousin, the much loved Prince Rupert. The Baron intends to throw the prince from his plane into the sacred fire pit. But you the eagle of the north will make every endeavour to save your friend Prince Rupert. With colour, sound, this M/C game is a must.

Swiss Cottage, Hastings Road,
St. Leonards-on-Sea TN38 8EA.
Tel. Hastings (0424) 53283

The sharp-eyed amongst you will have spotted the subtle changes made to the classified advertising section in this issue of *Computer & Video Games*.

These changes will be even more apparent from February onwards when we shall be offering lineage advertising to those of you selling goods and services for profit (what's that?). These will appear under the heading of **MicroAds** together with semi-display advertisements (formerly "Supermarket"). For semi-display ads the minimum size will now be two centimetres and we shall also offer the opportunity of taking an ad across two or even three columns.

If you've got an old ZX80 gathering dust in the attic, a collection of unused software cluttering up your shelves or anything else you want to get rid of you can still do so through the **MicroSell** section of the magazine which has now been going for several months.

To place a semi-display advertisement in the magazine send in your copy to **C&VG, 8 Herbal Hill, London EC1R 5EJ.** To place a lineage advertisement, in either **MicroAds** or **MicroSell** fill in the order form on page 167 of this issue.

We hope you take advantage of these new advertising options and would like to take the opportunity of wishing you all a very prosperous New Year.

SITUATIONS AVAILABLE AT

IMAGINE SOFTWARE LTD is the largest and most successful game software house outside of the U.S.A. with more than 100 staff occupying 19,000 square feet of premises throughout Liverpool. Imagine Software are at the forefront of todays exciting software industry. As a result of Imagines' advanced and imaginative expansion program the following positions have become available. In all cases renumeration is commensurate with ability and seniority and is above industry standards. In many cases a new car and numerous fringe benefits will be part of the package. Relocation assistance will be given to successful candidates wherever needed.

SENIOR SOFTWARE MANAGER

A position exists for a Senior Manager who will be responsible for several departments working in diverse areas of software design and production. Applicants must have proven experience in commercially orientated software environments and a wide range of technical knowledge and skills.
This is a very senior position with many exciting and rewarding aspects. Career prospects are excellent.

SOFTWARE MANAGERS

Two positions exist to manage large software departments at the forefront of the games industry.
Applicants must have a proven knowledge and interest in computer games. A wide range of software skills and experience in managing programming staff.

SOFTWARE ARTISTS/GAMES PROGRAMMERS

Eight positions are available for programmers with both the technical ability and the creative skills needed to invent and code best selling games.
Fluency in at least one assembly language, artistic ability plus proven experience are the necessary qualifications. The successful applicants will be working in an innovative environment with the best available development software and equipment and will be provided with a high level of technical back up. This is the ultimate career opening for games programmers.

SYSTEMS SOFTWARE PROGRAMMERS

Two positions exist for systems software programmers working on very advanced products. Both positions are exciting and innovative.
For the first, applicants must be fluent in the 'C' language and MCS68000 assembler and be familiar with Unix type operating systems.
Applicants must be able to demonstrate a wide knowledge of advanced development tools.
The second position requires a fluency in pascal and MCS68000 assembler and familiarity with the UCSD operating system.
Experience of computer graphics and general business orientated applications software will be an advantage.

PROGRAMMERS

Thirty positions exist for programmers working in a team environment on many diverse aspects of microcomputer software, including the conversion and adaption of games to new microcomputers.
Applicants should be fluent in at least, one assembly language and have great familiarity with at least one currently popular consumer microcomputer. Experience is not necessary but provable ability is a qualifying factor.

GRAPHICS PROGRAMMERS

Two positions are available for programmers with skills, experience and knowledge of microcomputer graphics as applied to games software.
Applicants must be fluent in at least one popular microcomputer assembly language and preferably have a working knowledge of one other, plus familiarity with currently available microcomputer capability. Provable experience and/or ability essential.

COMPUTER MUSICIANS

Two openings are available for programmers who have the ability to write music and sound effects for popular micros.
The applicants must have a good knowledge of an assembly language and proven musical skills.

GAME DESIGNERS

Two positions exist for game designers to design a wide variety of entertainment software. Applicants will have both experience in general games design and theory plus a working knowledge of microcomputers.

TECHNICAL WRITER

An opening exists for a technical writer to prepare software manuals for both commercial products and internal development tools.
A recognised writing qualification will be necessary for applicants as will a very wide working knowledge of microcomputers.

GRAPHIC ARTISTS

There are six positions available for artists working on games design and production using computer based graphic tools.
A knowledge of microcomputer graphics plus excellent artistic skills are the qualifications for these positions.

Applicants should in the first instance send thier C.V. to:
PERSONNEL DEPARTMENT, IMAGINE SOFTWARE LIMITED
IMAGINE HOUSE, 5 SIR THOMAS STREET, LIVERPOOL L1 6BW
or ring for an application form:– **051-236 8100 (20 lines)**

ABBEX MAGIC

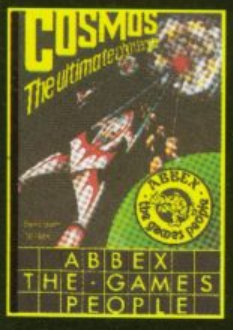
8 GREAT NEW GAMES FOR THE SPECTRUM, VIC 20 and CBM 64

1 KRAKATOA – 48K SPECTRUM – £5.95

..."My whole body ached as I scrambled back into the chopper... the subs were back! In the five days that the tanker had been sheltering in the bay, not one hour had gone by when they hadn't tried to dispatch a defenceless tanker to the deep... The rockets were coming in over Krakatoa and the constant explosions had brought the volcano to life! I had a tough choice to make, I could stay with the tanker and make sure it didn't end up like the others, or get the Islanders off the volcano, it wasn't going to be easy! Almost impossible! But I was going to try both! Arming the rockets I lifted off and headed for trouble..."

2 PILOT – 64 – Commodore 64 – £7.50

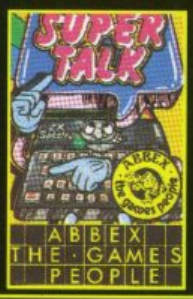
It's your first solo flight. Pilot the "Leander", Class 454, 30 seat prop plane out of Norwich airport. Using your memory of the route shown to you before take off, safely negotiate the crosswinds, military air-zones and other hazzards. With over sixteen different types of analog and digital read out, including artificial horizon, air speed indicator, compass, flaps, instrument landing systems and stall warning, fly your way back to base and land. Superb machine coded simulation of night flying programmed by a real pilot! HIGHLY COMPLEX, DIFFICULT YET FASCINATING GAME for the Commodore 64.



3 COSMOS – SPECTRUM 16 / 48K

SPECIAL XMAS OFFER ONLY £3.50

Wave after unrelenting wave of Xenophobic alien attack interspersed with ever more frequent Asteroid and Cosmiad raids, combine into an unending rain of deadly debris. WITH RADAR AND THERMOCLASTIC HEAT LANCES, LET RIP IN THIS GRAPHIC MAELSTROM.



4 SUPERTALK – 48K SPECTRUM – £6.95

Add any speech, accents, sentences and sound affects to your program. Incredibly simple to use. Record the noise or word on the tape recorder and play it back to the computer and it's synthesised! Great fun results as the sound of real people, guns, cars, planes in your program. stuns and amazes all! A new concept in speech synthesis a must for all programmers.

5 ATLANTIS – 16K VIC-20 – £5.95

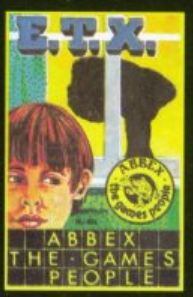
It's feature packed. With over sixteen different boards, each with gradually increasing difficulty. Manipulate your submarine past 10 different types of danger. Avoid depth-charges, force-fields, booby traps, rocks, enemy submarines, mines, crabs, sharks, underwater missiles, mazes and whole hosts of under water hazzards as you battle your way to Atlantis. Supreme colour, sound, and graphic action. All machine coded with joy-stick option, 2-player option and high score.

6 SPIDER STORM — UNEX. VIC 20 — £5.95

The enormous XITAN 1 rocket streaked skywards, its vital mission to save the last remnants of the human race that resided in its holds. Dennis Droid sat contently in the hatchery quietly reviewing his new and important job. When suddenly the ship shook violently as it was invaded by swarms of the most devilish destructive spiders you could possibly imagine. Dennis sprung into action, seizing his Megadon Atomizer he began blasting... 'Take that! and that! ZAP!! POW!! The battle continued... How many can there be left?!!

7 WAR GAME — 16K SPECTRUM — £5.95

I couldn't believe my eyes, but there they were: the telltale red lines I'd seen so often in training. Fourteen years of boredom in this seat and it had happened! As if in a dream my hand flashed across the terminal keyboard, storing, projecting and calculating. The computer helped, but I **pressed the buttons**: destroying those evil missiles before they struck the cities below! Was this the end!



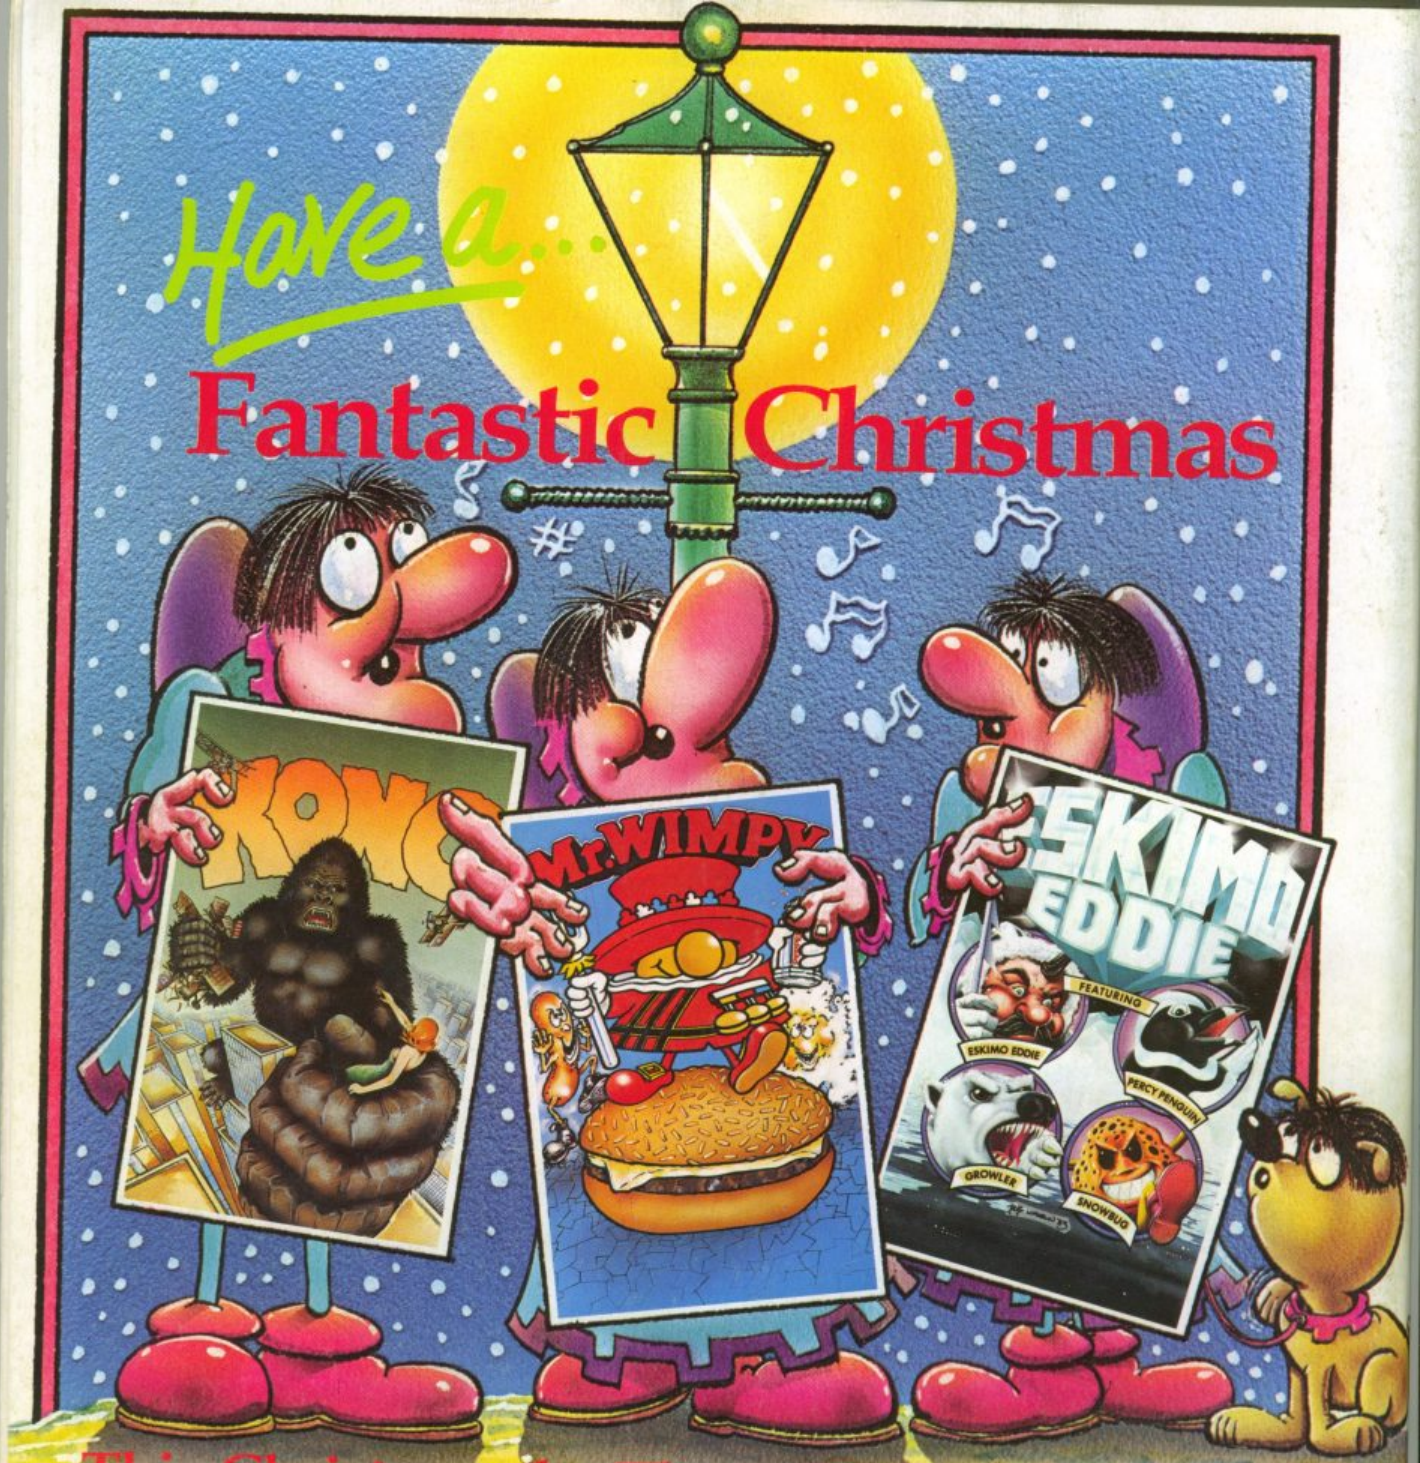
8 E.T.X — 16-48K SPECTRUM — £5.95

'Home Computing' magazine say... Speech is effective and must be at the limit of Spectrum capabilities, graphics are excellent and animation superb. A combination of graphics adventure, maze and chase games, makes this an unusual fascinating and addictive program which must rank among the Spectrum classics. 'VALUE FOR MONEY 100%! GRAPHICS 100%! SCORE 100%! This is an objective assessment by an independent body. There can be no doubt that this is the best.

ABBEX IS LOOKING FOR PROGRAMMERS capable of writing quality educational and games software for all computers including the TS 2000 (U.S. Spectrum). Computers will be supplied. If you want your programs professionally retailed around the world come and talk to us!

ABBEX ELECTRONICS — TAVISTOCK HOUSE, 34-36 BROMHAM RD, BEDFORD, HERTS. HK40.
Tel: 0234-213571 / 2 / 3 / 4 ext. 2.

One of the first software houses, Abbex has shied away from the trend of producing as many games as is technically possible, rather we have concentrated on value for money with games that are really good fun! With over 30 programmers submitting original material for the CBM 64, Dragon, Oric, Spectrum, Laser and VIC 20, we are bound to have your PERFECT PROGRAM. With SUPERB ORIGINAL GAMES CONCEPTS we feel we live up to our GUARANTEE OF EXCELLENCE. If your dealer doesn't stock Abbex software ORDER DIRECT AND GET FIRST CLASS 24 HOUR DELIVERY.



This Christmas the Three Kings are from Ocean

As well as the chart-topping Kong, who's *always* been climbing, there's the new, exciting Mr. Wimpy – something to get your teeth into! Hunchback – sure to ring your bell! and Eskimo Eddie – chills and thrills in Santa Land.

Christmas is going a Ding Dong Merrily with these three new crackers
